"The fox knows many things, but the hedgehog knows one big thing." This ancient Greek aphorism, preserved in a fragment from the poet Archilochus, describes the central thesis of Isaiah Berlin's masterly essay on Leo Tolstoy and the philosophy of history, the subject of the epilogue to *War and Peace*. Although there have been many interpretations of the adage, Berlin uses it to mark a fundamental distinction between human beings who are fascinated by the infinite variety of things and those who relate everything to a central, all-embracing system. Applied to Tolstoy, the saying illuminates a paradox that helps explain his philosophy of history: Tolstoy was a fox, but believed in being a hedgehog. One of Berlin's most celebrated works, this extraordinary essay offers profound insights about Tolstoy, historical understanding, and human psychology. This new edition features a revised text that supplants all previous versions, English translations of the many passages in foreign languages, a new foreword in which Berlin biographer Michael Ignatieff explains the enduring appeal of Berlin's essay, and a new appendix that provides rich context, including excerpts from reviews and Berlin's letters, as well as a startling new interpretation of Archilochus's epigram.

Throughout history, thinkers within every part of society have been crippled by an ingrained bias toward their own views and the views of their preferred social groups. As these dangerous egocentric and sociocentric tendencies continue to pose the greatest threat to the advancement of rational societies, *Liberating the Mind* reveals a way forward. Dissecting the core of how humans naturally learn, think, and chose to act, internationally recognized critical thinking leader Linda Elder illuminates root causes of dysfunctional thought and shows us how to free ourselves from both selfishness and groupthink

through explicit tools of rationality. This instant intellectual classic offers a cohesive, integrated theory of mind that takes into account pathological tendencies shared by all humans, while offering a clear path toward the cultivation of fairminded critical thinking throughout the world. Elder illuminates how, by taking the intrinsic problems in our thinking seriously, we can follow the example of Socrates and live the examined life, even in times of upheaval and doubt.

The first two parts of the book trace each of these traditions, whereas the third part revisits both in the light of recent contributions to the discipline.
