Startle Response - Federal Aviation Administration Chapter 6
 Single Pilot Resource6-1 Introduction While crew resource
 management (CRM) focuses on pilots operating in crew
 environments, many of the concepts apply to single pilot
 operations. Many CRM principles have been successfully applied
 to single-pilot aircraft and led to the development of single-pilot
 resource management (SRM).Chapter 6: Single-Pilot Resource
 ManagementThe Risk Management Handbook was produced by
 the Federal Aviation Administration (FAA) with the assistance of
 Safety Research Corporation of America (SRCA). The FAA wishes

CHAPTER 1 - PERSONNEL I. Introduction This section discusses the qualifications, training, certification, and currency requirements necessary to perform as a Single Engine Airtanker (SEAT) pilot, as well as the duties and responsibilities of the SEAT

Manager and SEAT Coordinator. II.

NWCG Standards for Single Engine Airtankers

Resources must not only be identified, but a pilot must also develop the skills to evaluate whether there is time to use a particular resource and the impact its use has upon the safety of flight. For example, the assistance of ATC may be very useful if a pilot becomes lost, but in an emergency situation, there may be no time to contact ATC.
