Penguin UK

An indispensable reference for scholars and students of eighteenth-century English literature This addition to the celebrated Wiley-Blackwell Keywords series explores the meanings of fifty-eight of the most important words in British literature of the period 1640-1789. Professor DeMaria focuses on words used with frequency and urgency throughout the works of most major and several minor writers of the British Neoclassical era, with the occasional reach back to the early seventeenth century for a definitive usage found in Francis Bacon, for instance, and look forward to the nineteenth century to the works of Wordsworth, Austen, and Keats. Through discussions of words such as atom, economy, humanity, labor, machine, slavery, society, and system he reveals underlying assumptions about the way writers of the period thought about the physical and social world. Likewise, considerations of words such as happiness, passion, truth, and virtue shed light on the ethical and moral commitments of the age. Unlike dictionaries and many big-data semantics projects, this book brings forth the ambiguities, nuances, and ironies that accrued to word usages during the period through a heightened awareness of the contexts in which they occurred. Highlights and exposes the salient cultural and literary debates and metamorphic moments of cultural thought Reveals an increase in irony and a decrease in allegorical usage as an important trend in the evolution of literary language during the Neoclassical period Stresses the contexts within which words or phrases appear in order to offer a fuller understanding of their meanings and significance than available from digital databases Draws upon a vast compilation of sources from one of the most transformative eras of English literature Rigorous in its scholarship and historical reach, *British Literature 1640-1789: Keywords* is an indispensable resource which scholars and students of British Neoclassical literature will want to keep close at hand. It is certain to become a fixture of most university reference libraries.

A Dictionary of the English Language Krishna Kumar Sharma Published anonymously in 1729, Jonathan Swift's satirical essay, *A Modest Proposal*, puts forth the darkly comical idea that the starving poor of Ireland might alleviate their economic condition by selling their children as food for wealthy gentlemen and ladies. At its core, Swift's *Modest Proposal* satirizes English exploitation of Ireland in particular and the heartless attitude that rich elites can develop towards the poor in general. Along with Gulliver's

Travels, *A Modest Proposal* is an early English example of the black comedic genre. Modern Arabic Literature Manchester University Press Before the Empire of English offers a broad re-examination of Eighteenth-century British literary culture, centred around issues of language, nationalism, and provinciality. It revises our tendency to take for granted the metropolitan centrality of English-language writers of this period and shows, instead, how deeply these writers were conscious of the traditional marginality of their literary tradition in the European world of culture. The book focuses attention on crucial but largely overlooked aspects of Eighteenth-century English literary culture: the progress of English topos since the death of Cowley and the cultural aspirations and anxieties it condenses; the concept of the republic of letters and its implications for issues of cultural centrality and provinciality; and the importance of cultural nationalist emphases in 'Augustan' poetics in the context of these concerns about provinciality. The book examines imperial aspirations and imaginings in the English literary culture of the period, but it shows how such aspirations are responses to provincial anxieties more so than they are marks of imperial self-assurance.

What role should reason play in the creation of a free and just society? Can we claim to know anything in a field as complex as politics? And how can the cause of political rationalism be advanced when it is seen as having blood on its hands? These are the questions that occupied a group of British poets, philosophers, and polemicists in the years following the French Revolution. Timothy Michael argues that much literature of the period is a trial, or a critique, of reason in its political capacities and a test of the kinds of knowledge available to it. For Wordsworth, Coleridge, Shelley, Burke, Wollstonecraft, and Godwin, the historical sequence of revolution, counter-revolution, and terror in

France—and radicalism and repression in Britain—occasioned a dramatic reassessment of how best to advance the project of enlightenment. The political thought of these figures must be understood, Michael contends, in the context of their philosophical thought. Major poems of the period, including *The Prelude*, *The Excursion*, and *Prometheus Unbound*, are in this reading an adjudication of competing political and epistemological claims. This book bridges for the first time two traditional pillars of Romantic studies: the period's politics and its theories of the mind and knowledge. Combining literary and intellectual history, it provides an account of British Romanticism in which high rhetoric, political prose, poetry, and poetics converge in a discourse of enlightenment and emancipation.

A Glossary of Literary Terms Houghton Mifflin Harcourt It appears that literary work possesses eternal temporal validity due to its autonomous aesthetic value, whereas criticism provides points of view having temporary and transitory significance. Despite such claims, the vector of methodology in our series of books, dealing with the history of English literature, relies on Viktor Shklovsky, T. S. Eliot, Mikhail Bakhtin, and especially Yuri Tynyanov, whose main reasoning would be that literature is a system of dominant, central and peripheral, marginalized elements - to us, "tradition" (centre) versus "innovation" (margin) engaged in a "battle" for supremacy, demarginalization, and the right to form a new literary system - and the development or historical advancement of literature is the substitution of systems. Roman Jakobson and French structuralism, on the whole, later Linda Hutcheon, with her "system" and "constant", and Bran Nicol with the "dominant", to say nothing about Itamar Even-Zohar and his theory of polysystem, to a certain extent Julia Kristeva, and even Homi Bhabha - as well as our humble contribution, by means of the books in the present series, we would like to believe - maintain Tynyanov's line of thinking and concepts alive, which have developed and emerged nowadays more like a kind of "neo-formalism".

Eighteenth-Century Poetry Academic Foundation Boileau has traditionally been regarded as the spokesman of French neo-classicism, but some elements of scholarship have discounted the importance of neo-classical doctrine in general and of Boileau's particular contribution to it. Many critical approaches have stressed instead the liveliness and wit of Boileau's poems, his love of language and his passionate temperament. Mr Pocock uses these critical approaches to demonstrate in detail how Boileau's verve, love of contrasts, and

essentially dramatic imagination animate the major poems. But he also argues that such approaches do not in themselves suffice to explain Boileau's special qualities. Neo-classicism was an important element in the intellectual life of Europe in the most critical period of the decline of Christianity and the rise of rationalism and science. Mr Pocock proposes a reformulation of those views which take account not only of modern criticism but also of Boileau's commitment to neo-classicism and his embodiment of it in his work.

This book looks at neo-classicism as a context for understanding early-modern English historical writing, and traces the implications of neo-classical history for English political culture at large. By paying close attention to historical genres and audiences, it reassesses both the famous and lesser-known historians of this era, dramatizing them as engaged in a struggle to preserve ancient models of historical composition in the face of a rapidly modernizing society characterized by party politics, print, Christianity, and antiquarian erudition.

The eighteenth century in English literature has been called the Augustan Age the Neoclassical Age, and the Age of Reason. The term 'the Augustan Age' comes from the self-conscious imitation of the original Augustan writers, Virgil and Horace, by many of the writers of the period. Specifically, the Augustan Age was the period after the Restoration era to the death of Alexander Pope (~1690 - 1744). The major writers of the age were Pope and John Dryden in poetry, and Jonathan Swift and Joseph Addison in prose. Dryden forms the link between Restoration and Augustan literature; although he wrote ribald comedies in the Restoration vein, his verse satires were highly admired by the generation of poets who followed him, and his writings on literature were very much in a neoclassical spirit. I particularly aimed at interpretation of sociopolitical milieu of Augustan Age, of social change, of literary tendencies of the age, and of prose, novel, poetry and drama of the Augustan Age.

Designed by the acclaimed Coralie Bickford-Smith and beautifully set, these slim, A format volumes are the ultimate gift editions for poetry lovers. Lyrical Ballads (1798) is a landmark collection of poems that marks the beginning of the English Romantic Movement in literature. Co-written by friends William Wordsworth and Samuel Taylor Coleridge, the collection broke away from traditional poetic form. Of the twenty-three poems, Wordsworth penned works such as 'Lines written a few miles above Tintern Abbey' and 'The Idiot Boy' that use colloquial speech and take the everyday as their theme. The collection also includes Coleridge's greatest poem 'The Rime of the Ancient Mariner', a supernatural tale of a sailor's voyage.

This book explores literary culture in England between 1630 and 1700, focusing on connections between material, epistemic, and political conditions of literary writing and reading. In a number of case studies and close readings, it presents the seventeenth century as a period of change that saw a fundamental shift towards a new cultural configuration: neoclassicism. This shift affected a wide array of social practices and institutions, from poetry to politics and from epistemology to civility.

In this study, J. Douglas Canfield contends that baroque disruption persists even as English literature becomes more neoclassical. It twists forms and meanings. From paradoxical, mysterious moments in Paradise Lost, amazing metaphors in Cavendish and Philips, momentous materializations in Waller and Dorset, and revealing displacements in Buckingham and Rochester to outrageous attack in Dryden and Pope, astonishing ventriloquizing in Killigrew and Finch and Montagu, and eccentricity and grotesquerie in Gulliver's Travels - the baroque comes back to disturb neoclassical regularity.--BOOK JACKET.
