Enhanced Computer Concepts and Microsoft Office 2013 Illustrated World Scientific

The world contains an unimaginably vast amount of digital information which is getting ever vaster ever more rapidly. This makes it possible to do many things that previously could not be done: spot business trends, prevent diseases, combat crime and so on. Managed well, the textual data can be used to unlock new sources of economic value, provide fresh insights into science and hold governments to account. As the Internet expands and our natural capacity to process the unstructured text that it contains diminishes, the value of text mining for information retrieval and search will increase dramatically. This comprehensive professional reference brings together all the information, tools and methods a professional will need to efficiently use text mining applications and statistical analysis. The Handbook of Practical Text Mining and Statistical Analysis for Non-structured Text Data Applications presents a comprehensive how-to reference that shows the user how to conduct text mining and statistically analyze results. In addition to providing an in-depth examination of core text mining and link detection tools, methods and operations, the book examines advanced preprocessing techniques, knowledge representation considerations, and visualization approaches. Finally, the book explores current real-world, mission-critical applications of text mining and link detection using real world example tutorials in such varied fields as corporate, finance, business intelligence, genomics research, and counterterrorism activities. - Extensive case studies, most in a tutorial format, allow the reader to 'click through' the example using a software program, thus learning to conduct text mining analyses in the most rapid manner of learning possible - Numerous examples, tutorials, power points and datasets available via companion website on Elsevierdirect.com - Glossary of text mining terms provided in the appendix

As more students engage the help of an education consultant when applying for colleges, how can students have an edge over their competition? Often times, students go about the application process on their own or seek the advice of an agency, many of which are led by individuals who have not personally experienced applying to and being accepted by elite American colleges. Regardless of a student's choice, this book provides students and parents with an in-depth, holistic view of American college applications. In a competitive applicant market where it is increasingly difficult to gain acceptance into top universities, specific useful insights found in this book are necessary for students and parents who want to succeed. This book discusses successful and unsuccessful application trends and guides readers on how to avoid common mistakes. The author, who was accepted to 18 universities and graduated from Yale University, knows the entire application range. Having spent several years in China working with students on college applications, she has knowledge of both the Western and Asian systems that would help international applicants OCo particularly Asian students OCo in their endeavors."

This eye-opening book brilliantly explores the true roots of over-parenting, and makes a case for the vital importance of family life. Parents naturally worry about the future. They want to prepare their children to compete in an uncertain world. But often, argues political philosopher and father of three Matt Feeney, today's worried parents surrender their family's autonomy to gain a leg up in this competition. In the American ideal, family life is a sacred and private sphere, distinct from the outside world. But in our hypercompetitive times, Feeney shows, parents have become increasingly willing to let the inner life of the family be colonized by outside forces that promise better futures for their kids: prestigious preschools, "educational" technologies, youth sports leagues, a multitude of enrichment activities, and -- most of all -- college. A provocative, eye-opening book for any parent who suspects their kids' stuffed schedules are not serving their best interests, *Little Platoons* calls us to rediscover the distinctive, profound solidarity of family life.

Next-generation mobile communications are likely to employ different techniques and standards. The implementation in software of as many receiver functionalities as possible appears to be the

most effective solution for coping with the multiplicity of communications alternatives. The concept of software radio, dating back to 1991, originally attracted commercial interest owing to the possibility that transmission layer functions could be fully software-defined. The same approach can be extended to protocols of the higher layers too, thus conceiving a programmable hardware to implement the functionalities of several layers of protocols by resident software or software downloaded from the network. Consisting of selected technical contributions to the Workshop on "Software Radio", this volume deals with state-of-the-art surveys of the enabling technologies and the prospective services of software radio implementations for future mobile communications. Original and state-of-the-art research and development is presented in fields such as: - Software radio for universal wireless internet access - Software radio for multimedia communications - Software radio architecture - Network architecture, protocols and services - Software radio technology towards pervasive appliance. This volume on software radio is a valuable reference for both researchers and telecommunications professionals.

The Admissions Secret that Gets You Into College and Beyond "O'Reilly Media, Inc."

Tell your story and connect with the college of your dreams for admission and financial aid "If everyone wrote essays like this, admissions officers would have to take every student's essay seriously." --Steve LeMenager, founder of Edvice Princeton and former director of admission at Princeton University "With patience, contagious confidence, and plenty of real-life examples, Carol illuminates a process that can help anyone discover and articulate those stories that will help them stand out in their own way, and in their own words." --Shelley Krause, college counselor, Rutgers Preparatory School, and curator of the College Lists Wiki "Because the college essay offers applicants their lone opportunity to demonstrate what truly matters to them, and to share the qualities that make them unique, the stakes could not be any higher. With meticulous detail, Barash delivers a foolproof plan for helping college applicants strike essay gold." --Chad Troutwine, cofounder and CEO of Veritas Prep To write out loud is to write and speak in a way that makes people pay attention. Write Out Loud teaches the Story To College program--with its proven storytelling-based approach, the Moments Method. This program has helped more than 8,000 students from high schools in the United States and around the world create effective, authentic application essays to win admission and financial aid at their top college choices. Write Out Loud enables anyone to masterfully integrate past experiences and future ambitions into successful application essays and interviews. The guided exercises help college essay writers get past the stress and confusion of writing about themselves. Write Out Loud reveals how to find unique topics for compelling essays, shows how to make the transition from a spoken story to a written essay, and provides examples of successful essays. The book also walks students through the Common Application, the online college application form used by more than 500 colleges and universities in the US and abroad. Inside, students will find: The 12 tools of the Moments Method Specific guidance for completing the Common Application Charts and checklists to organize essays and supplements Insight from admissions officers on what characterizes a successful college application essay With Write Out Loud, students build confidence to show their best selves in writing and to gain admission into the college or university they desire.
