Croatia, with its long coastline on the Adriatic Sea, captivates with its varied landscape, which includes raging waterfalls, untouched landscapes, and more than 1000 islands. The same applies to Montenegro, where you can find rugged mountains, medieval villages, and narrow beaches along the Adriatic coast. Dubrovnik, Split, and Zagreb are characterized by Gothic, Renaissance, and Baroque buildings.

The available material in English discussing Latin American anarchism tends to be fragmentary, country-specific, or focused on single individuals. This new translation of Ángel Cappelletti's wide-ranging, country-by-country historical overview of anarchism's social and political achievements in fourteen Latin American nations is the first book-length regional history ever published in English. With a foreword by the translator. Ángel J. Cappelletti (1927-1995) was an Argentinian philosopher who taught at Simon Bolivar University in Venezuela. He is the author of over forty works primarily investigating philosophy and anarchism. Gabriel Palmer-Fernandez is Distinguished Professor of Philosophy and Religious Studies at Youngstown State University.

How can ideas about the social construction of reality be reconciled with the material and embodied aspects of our being? In what ways can a realist framework inform social constructionist research? What are the limits of social constructionism? This accessible text draws together for the first time a wide range of emerging issues, ideas and discussions in constructionist psychology. It shows how these issues are relevant to everyday life, using carefully-chosen examples to illustrate its arguments, and provides a coherent and challenging introduction to the field. The book explores the growing conviction that dominant 'discursive' trends in social constructionism - which deal with the analysis of language and discourse to the exclusion of the material world, embodiment, personal-social history, and power - are inadequate or incomplete and risk preventing social constructionism from maturing into a viable and coherent body of theory, method and practice. In highlighting what are seen as deficiencies in current constructionist approaches, it inevitably takes a somewhat critical stance. However, the contributing authors are committed to a constructionist analysis of the human condition - into which they seek to reintegrate the material and embodied aspects of our nature. As a result, the completion of social constructionism is brought a step closer and its continued importance is underlined.

This timely study examines the processes by which modern states are created within multiethnic societies. How are national identities forged from countries made up of peoples with different and often conflicting cultures, languages, and histories? How successful is this process? What is lost and gained from the emergence of national identities? Natividad Gutiérrez examines the development of the modern Mexican state to address these difficult questions. She describes how Mexican national identity has been and is being created and evaluates the effectiveness of that process of state-building. Her investigation is distinguished by a critical consideration of cross-cultural theories of nationalism and the illuminating use of a broad range of data from Mexican culture and history, including interviews with contemporary indigenous intellectuals and students, an analysis of public-school textbooks, and information gathered from indigenous organizations. Gutiérrez argues that the modern Mexican state is buttressed by pervasive nationalist myths of foundation, descent, and heroism. These myths--expressed and reinforced through the manipulation of symbols, public education, and political discourse--downplay separate ethnic identities and work together to articulate an overriding nationalist ideology. The ideology girding the Mexican state has not been entirely successful, however. This study reveals that indigenous intellectuals and students are troubled by the relationship between their nationalist and ethnic identities and are increasingly questioning official policies of integration.

International corporate tax issues are prominent in public debate, notably with the G20-OECD project addressing Base Erosion and Profit Shifting ('BEPS'). But while there is considerable empirical evidence for advanced countries on the cross-country fiscal externalities at the heart of these issues, there is almost none for developing countries. This paper uses panel data for 173 countries over 33 years to explore their magnitude and nature, focusing particularly on developing countries and applying a new method to distinguish between spillover effects through real decisions and through avoidance—and quantify the revenue impact of the latter. The results suggest that spillover effects on the tax base are if anything a greater concern for developing countries than for advanced—and a significant one.

This bilingual volume—English and German on facing pages—brings together the writings Wittgenstein composed during his stay in Dublin between October 1948 and March 1949, one of his most fruitful periods. He later drew more than half of his remarks for Part II of *Philosophical Investigations* from this Dublin manuscript. A direct continuation of the writing that makes up the two volumes of *Remarks on the Philosophy of Psychology*, this collection offers scholars a glimpse of Wittgenstein's preliminary thinking on one of his most important works. G. H. von Wright and Heikki Nyman both teach at the University of Helsinki.

Anarchism in Latin America MIT Press

"What determines the significance of a work of art? Does it abide eternally within the work? Or is it continually constructed and reconstructed from the outside, through the work's presentation? The historical shift from autonomous modernist object to postmodernist critique of institutions, from artwork to discursive context, is the subject of Douglas Crimp's essays and Louise Lawler's photographs in *On the Museum's Ruins*. Taking the museum as paradigmatic institution of artistic

modernism, Crimp surveys its historical origins and current transformations. The new paradigm of postmodernism is elaborated through analyses of art practices broadly conceived--not only the practices of artists but also those of critics and curators, of international exhibitions, and of new or refurbished museums."--back cover.

Spawned by the Cold War, NATO's existence was justified by Soviet threats to Western Europe. That raison d'être is long gone with the collapse of the Soviet Union and the end of the Cold War. Still NATO globalized relentlessly, moving from defensive to offensive under pretexts of humanitarianism, starting with Yugoslavia, then East Africa, Afghanistan, and most recently Libya, acting as an arm of the Pentagon. The danger to global equilibrium is a growing NATO being expanded further by American and British ambitions into a monster military force of world proportions, way beyond any Atlantic or European alliance. NATO expansion, intrusive military hardware, such as cyber technology/interference and the murderous capacity of drones is threatening North/South peace. The creeping NATO expansion into Asia, the attempt to surround Russia, China and others can only end badly for the billions of human beings involved. The recent mini-US occupation of Australia, the interference in the ASEAN countries by US arms dealers and naval forces, the menacing presence of US aircraft carriers in the Indian Ocean, the South China Sea and the Strait of Malacca should remind historians of just why the Japanese considered it necessary to attack Pearl Harbor to end the US naval strangle hold imposed upon them. NATO as it expands today is absolutely not what the world of struggling economies and deprived populations require. It is nothing, but a negative force. "I hope this book will be read by very, very many who can turn this morbid fascination with violence into constructive conflict resolution." ♦Johan GALTUNG, Professor Emeritus of Peace Studies and Sociology at the University of Oslo "Mahdi Darius Nazemroaya's prolific writings give us a comprehensive understanding of the character of the military thrust and it's all out, no holds barred STRATEGIC plans and moves to invade, occupy and plunder the resources of nations, inflict unprecedented barbaric acts on the civil populations. He is one the prescient thinkers and writers in contemporary times who deserves to be read and acted upon by people with a conscience and concern for humanity's future". ♦VISHNU BHAGWAT, Admiral and Chief of the Naval Staff of India (1996-1998): Mumbai, India. "This book is a must read for those committed to reversing the tide of war and imperial conquest by the world's foremost military machine". ♦MICHEL CHOSSUDOVSKY, Professor Emeritus

Explicating clearly and concisely the full implication of a praxis-oriented language pedagogy, this book argues for an approach to language teaching grounded in a significant scientific theory of human learning—a stance that rejects the consumer approach to theory and the dichotomy between theory and practice that dominates SLA and language teaching. This approach is based on Vygotsky's sociocultural theory, according to which the two activities are inherently connected so that each is necessarily rooted in the other; practice is the research laboratory where the theory is tested. From the perspective of language education, this is what is meant by the 'pedagogical imperative.' Sociocultural Theory and the Pedagogical Imperative in L2 Education • Elaborates a new approach to dealing with the relationship between theory and practice—an approach grounded in praxis—the dialectical unity of theory and practice • Presents an analysis of empirical research illustrating praxis-based principles in real language classrooms • Brings together cognitive linguistics and sociocultural theory – the former provides the theoretical knowledge of language required of praxis and the latter furnishes the theoretical principles of learning and development also called for in a praxis approach • Offers recommendations for redesigning teacher education programs Its timely focus on the theory-practice gap in language education and its original approach to bridging it put this book at the cutting edge of thinking about Vygotskian sociocultural theory in applied linguistics and SLA.
