Safety and Occupational Health (SOH) Requirements Manual (EM 385-1-1,)(March 2024) Notion Press
 Covering all aspects of production safety, this is an invaluable reference guide for the independent programme maker, freelancer, manager, producer, tutor and student filmmaker. Robin Small identifies all the major risks and gives advice on how to control and/or eliminate them. Each hazard section includes useful references to the relevant legislation, documents and licences, as well as addresses of organisations for essential advice and recommended further reading. An appendix lists samples of vital certificates,

with visual references provided on www.focalpress.com. Important information about hazard identification, risk assessment and safety policy is provided in the chapters covering legislation, health and safety management, personal protective equipment and insurance. Particular hazards are then split into individual sections for ease of reference. These hazards include: Asbestos Cranes Explosives and pyrotechnics Food and catering Manual handling and lifting Visual display screens Working at heights The appendices provide comprehensive contact information for UK and European Health and Safety sources. They also include sample forms to draw up your own safety system. Robin Small is Senior Lecturer in Television, Media Department at the University of Huddersfield.

THIS BOOK WILL MAKE YOUR BIRTH BETTER. IT IS FOR EVERY WOMAN AND EVERY TYPE OF BIRTH. AS FEATURED ON DRAGONS' DEN. 'Siobhan manages to completely demystify hypnobirthing, making it accessible and relevant to all women and all births. This book will be a complete game changer and I will be recommending it to mums-to-be from now on' Sarah Turner, author of The Unmumsy Mum Expert hypnobirthing teacher and founder of The Positive Birth Company

Siobhan Miller has made it her mission to change the way women around the world approach and experience birth. Through her teaching she seeks to educate and empower women - and their birth partners - so that they can enjoy amazing and positive birth experiences, however they choose to bring their babies into the world. In this book, Siobhan debunks common myths about hypnobirthing and explains why she believes it can make every type of birth a better experience - from a water birth at home to an unplanned caesarean in theatre. So, what is hypnobirthing? Essentially, it's a form of antenatal education, an approach to birth that is both evidence-based and logical. Hypnobirthing certainly doesn't involve being hypnotised; instead, it teaches you how your body works on a muscular and hormonal level when in labour and how you can use various relaxation techniques to ensure you are working with your body (rather than against it), making birth more efficient and comfortable. Siobhan's advice and guidance will change your mindset and enable you to navigate your birth with practical tools that ensure you feel calm and in control throughout. By the time you finish this book you'll feel relaxed, capable and genuinely excited about giving birth.

This NEBOSH-endorsed textbook is matched to the latest syllabus of the National Certificate in Construction Safety and Health. Within the construction industry the need for specialist health and safety training is high due to the high risks involved. This is reflected in recent legislation such as CDM 2007 and explains the consistent demand for courses and learning materials. The text is easy to read, highly illustrated in full color, and supported with checklists, report forms and record sheets used currently in the industry. Students are supported with end-of-chapter questions, a study skills chapter and specimen assignments including specimen answers. As NEBOSH actively grow their qualifications internationally, demand for this book and it's sister titles continues to increase overseas. High growth markets are the Middle East, Malaysia, India and China.

This guide gives authoritative advice on current tree climbing techniques which are both safe and effective. It has been updated to take into account advances in tree climbing equipment and techniques since 1999. Incorporating the Work at Height Regulations 2005, Health and Safety Executive research and the latest techniques and equipment the all-new AA A Guide to Good Climbing Practice replaces the AA/FASTCo Guide to Good Climbing Practice (1999) and the AA/FASTCo Aerial Rescue Guidance Notes (1997). "The Guide sets out techniques and systems of work that can be considered as best practice guidance in arboriculture and helps anyone in the business meet their legal obligations." Dr Richard Nourish, Head of the Agriculture and Food Section, Health and Safety Executive.

Risk Assessment Kogan Page Publishers
Logistics is a complex industry that exposes employees to a whole variety of risks. These include not only accidents on the road and deaths and injuries resulting from unsafe use of forklifts, but also the consequences of poor fire safety, long-term health risks due to poor manual handling technique and problems relating to mental health. Many thousands of incidents are recorded every year. This book examines each aspect of health and safety in turn, with a focus on warehousing and transportation. Health and Safety in Logistics informs managers about potential hazards found in the industry and explains in detail how they can make the workplace as safe as possible.
