Penguin

A NEW YORK TIMES
NOTABLE BOOK OF THE
YEAR • The riveting story
of the conflict over same-
sex marriage in the
United States—the most
significant civil rights

breakthrough of the new
millennium "Full of
intimate details, battling
personalities, heated
court cases, public
persuasion." —John
Williams, The New York
Times On June 26, 2015,
the U.S. Supreme Court
ruled that state bans on
gay marriage were
unconstitutional, making
same-sex unions legal
across the United States.

But the road to that
momentous decision was
much longer than many
know. In this definitive
account, Sasha Issenberg
vividly guides us through
same-sex marriage's
unexpected path from the
unimaginable to the
inevitable. It is a story
that begins in Hawaii in
1990, when a rivalry
among local activists
triggered a sequence of

events that forced the state to justify excluding gay couples from marriage. In the White House, one president signed the Defense of Marriage Act, which elevated the matter to a national issue, and his successor tried to write it into the Constitution. Over twenty-five years, the debate played out across the country, from the first legal same-sex weddings in Massachusetts to the epic face-off over California's Proposition 8 and, finally, to the landmark Supreme Court

decisions of *United States v. Windsor* and *Obergefell v. Hodges*. From churches to hedge funds, no corner of American life went untouched. This richly detailed narrative follows the coast-to-coast conflict through courtrooms and war rooms, bedrooms and boardrooms, to shed light on every aspect of a political and legal controversy that divided Americans like no other. Following a cast of characters that includes those who sought their own right to wed, those who fought to protect the

traditional definition of marriage, and those who changed their minds about it, *The Engagement* is certain to become a seminal book on the modern culture wars.

Lemon-Aid Used Cars and Trucks 2011-2012

Veloce Publishing Ltd
Car values fluctuate wildly, never more so than in our current economic environment. Pricing information is a must for collectors, restorers, buyers, sellers, insurance agents and a myriad of others who rely on reliable authoritative

data. With well over 300,000 listings for domestic cars and light trucks, and various import vehicles manufactured between 1901 and 2012, this is the most thorough price guide on the market. This invaluable reference is for the serious car collector as well as anyone who wants to know the value of a collector car they are looking to buy or sell. Prices in this must-have reference reflect the latest values, in up to six grades of condition, from the esteemed Old Cars

Price Guide database. New information for the most recent model year will also be added to our new Old Car Report database. *Explorer's Guide Las Vegas: A Great Destination* Veloce Publishing Ltd Whether you're searching for your first job or apartment, navigating the treacherous waters of office politics, or just trying to figure out how to file your tax return, Gradspot.com's Guide to Life After College tackles the most common issues

facing twentysomethings as they find their feet in the "real world." Authors Chris Schonberger, Stuart Schultz, David Klein, and Tory Hoen (twentysomethings themselves) have been through it all before, and they maintain a sense of humor about their triumphs and missteps along the way. In addition to sharing their own experiences and anecdotes, they have polled hundreds of recent grads and consulted topic experts to give readers the information they

need, to find their feet beyond campus. Packed with indispensable tips, candid advice, and humorous dispatches from early adulthood, this easy-to-use guide has everything you need to know but didn't learn in college! Topics include: Finding an Apt, Job Hunting, Healthcare, Credit, Top Recent Grad Cities, Cars, Student Debt, Saving & Investing, Office Etiquette, Networking, Dating, Travel, Cooking, Moving Home, The "One-Year Rut", 401(k)s, and more.

The Marketing Book
Anchor Academic Publishing
Motoring the Future: VW

and Toyota Vying for Pole Position deals with the challenges facing the global car industry today, analyzing Volkswagen and Toyota, with some surprising results. The book provides insights into each car manufacturer's corporate culture, products, production, leadership and technologies, as well as some thoughts on the future of the car. These two opponents vying for pole position could hardly be more different: Toyota, with a focus on manufacturing excellence,

is dominant in its home market, the USA and south-east Asia, whereas VW, with its strategy of product excellence, leads in western Europe, Brazil and China. Industrial dominance will be important to them in the future, with both companies needing to master the next steps in product and manufacturing excellence. The race is by no means over, offering a deep insight into the challenges for carmakers moving away from fossil fueled combustion to alternative

energy vehicles for the mass market. Major players are trying to answer the key question: How will the car of the future look? VW and Toyota now need to keep ambitious competitors at bay. Timing is everything: US manufacturers are focused on their own revival; Korean and Chinese players are progressing surprisingly fast. However, it looks like the battle for pole position will likely remain between Toyota and VW. Motoring the Future offers updates on Volkswagen's and

Toyota's next generation vehicles, both plotting a new course into the future. In this thoroughly revised edition the book, new facts and material have extended the scope to American manufacturers and to new competitors from the Far East.

Billboard e-artnow sro Canada's automotive "Dr. Phil" says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar, a worldwide recession driving prices downward, and a more

competitive Japanese auto industry that's still reeling from a series of natural disasters.

"The automotive maven and former Member of Parliament might be the most trusted man in Canada, an inverse relationship to the people he writes about." - The Globe and Mail
Lemon-Aid shows car and truck buyers how to pick the cheapest and most reliable vehicles from the past 30 years of auto production. This brand-new edition of the

bestselling guide contains updated information on secret service bulletins that can save you money. Phil describes sales and service scams, lists which vehicles are factory goofs, and sets out the prices you should pay. As Canada's automotive "Dr. Phil" for over 40 years, Edmonston pulls no punches. His Lemon-Aid is more potent and provocative than ever. Simon and Schuster
The book combines perspectives from leading environmental taxation scholars on both the

theory and impact of different policies. It covers topics such as theoretical assumptions of environmental taxes; the relationship between environmental taxes and t

Work Oxford Business Group

Governments of many countries consider the electrification of individual passenger transport as a suitable strategy to decrease oil dependency and reduce transport-related carbon dioxide (CO₂) and air pollutant emissions. However, battery-electric vehicles

(BEVs) and plug-in hybrid-electric vehicles (PHEVs) have been more expensive than their conventional counterparts and suffer from relatively short electric driving ranges, which still hampers the market potential of these vehicles. Despite persisting shortfalls, mechanisms such as technological learning and economics of scale promise to improve the techno-economic performance of BEVs and PHEVs in the short- to mid-term. Here, the

author seeks to obtain insight into the techno-economic prospects of BEVs and PHEVs by: (i) establishing experience curves and (ii) quantifying user costs and the costs of mitigating carbon dioxide and air pollutant emissions in a time-series analysis. The analysis captures the situation in Germany between 2010 and 2016.

Dundurn

Can it be rational to be religious? Robert Audi gives a persuasive

positive answer through an account of rationality and a rich, nuanced understanding of what religious commitment means. It is not just a matter of belief, but of emotions and attitudes such as faith and hope, of one's outlook on the world, and of commitment to live in certain ways. Vincent Motorcycles The Countryman Press The first in a series of five books which chronicle in definitive depth the history of the evergreen 911, from the earliest design studies to the

water-cooled cars of today. This volume covers original design, the 901 prototype, the early 911s (including 912s) and the 2.2 litre cars. *Commerce Business Daily* Veloce Publishing Ltd The car - once everybody's dream and a key status symbol in most countries and cultures - has been extensively questioned in the last decades and in the last few years particularly. Urbanisation, traffic congestion, pollution problems, heavy reliance on scarce oil supplies,

safety issues and ever-growing competition, have all provided significant business challenges for the automotive industry. Many car manufacturers have had to fundamentally rethink their design, brand and marketing strategies to thrive in a savvy, consumer-led culture, and markets that are becoming increasingly restrictive in size and opportunity. Auto Brand provides a roadmap to branding and marketing success in the automotive

industry from a leading industry expert and features:

- Case studies on major car brands personally conducted by the author including: Audi, BMW, Holden, Mercedes-Benz, Opel, Porsche, Saab, Seat, Skoda, Vauxhall, Volkswagen, and Volvo
- The findings from 100 interviews conducted with CEOs, marketing managers, sales managers, sales people, after sales managers at all levels from the manufacturer level to small rural dealers, as well as

industry experts, policy makers, free-stranding repair shops and professional organizations

- The results of a new international study on car buyer behaviour based on 4,700 survey answers

Auto Brand is essential reading for marketing managers, sales managers, CEOs, development managers and dealers in all types of companies in the car industry including: manufacturers, national sales companies/importers, dealers, finance

companies, insurance companies, free-standing repair shop channels and more. The first book to specifically address how to deal with the challenges facing the automotive industry it illustrates how companies can take advantage of new technologies, adapt to emerging trends in consumer behaviour, improve profitability and build even more successful brands in the future.

Discusses general theory of computability, computable functions, operations on computable functions, Turing machines self-applied, unsolvable decision problems, applications of general theory, mathematical logic, Kleene hierarchy, more. *America's Quarter-Century Struggle Over Same-Sex Marriage* Penguin

ABOUT THE BOOK The most important thing to remember about my

College Crossroads blog at Forbes.com is that my posts are different than what is typically written elsewhere on college planning, and that is because I bring a rather unique perspective to this specialized area. For almost twenty years I have specialized in helping families determine their best strategy to pay for college, and doing so requires a rare knowledge of how four key areas must come together to form a family's best strategy: College

selection, financial aid, tax aid, and personal resources. College admissions and financial aid professionals know their respective areas well, as do tax and financial advisors, but virtually none have a solid grasp of the areas outside their own, let alone how each area impacts the others for college planning purposes. That's where I come in. I have spent twenty years working with families and collaborating with these other professionals, making it my business to

make the connections, gain the insights, and innovate ways to help families determine their best strategy to pay for college and enjoy a Real Life Retirement. My blog posts are less about what the latest studies or headlines say, and more about what you really need to know. I am about answers, not more and more information. If I think you need to know about a single topic in more detail, I go to the experts on those topics and interview them in the context of the four key

areas: College selection, financial aid, tax aid, and the use of your personal resources to pay your share of the cost, with or without financial aid. It keeps the focus on strategy and simplicity; the best strategy to pay for the colleges that are the best fit. Finally, unless a student is independently wealthy, getting a college degree is ultimately about getting a job. The blog and this book cover that too. ABOUT THE AUTHOR Troy Onink is a nationally-known authority on

college planning. Troy has specialized in college planning for twenty years, during which he pioneered this specialized field by integrating the areas of financial planning, investing, college admissions, financial aid, tax strategies, and wealth management, for the purpose of determining each family's best strategy to pay for college. Troy views college as a tollbooth on the road to retirement, and by having a strategy families choose the right

exits, pay the toll as wisely as possible, and stay up to speed for retirement. Troy is CEO of Stratagee.com, the firm he co-founded to create innovative college planning software to help families identify where their children may be able to get in to college and get aid, and determine the family's best strategy to pay for the colleges that are the best fit for their children. EXCERPT FROM THE BOOK Why College Co-Op Programs Totally Rock "I made \$46,000 working as a Co-

Op student for a great company while I was getting my college degree from a well-known university, and now the company that I did my Co-Op with wants to hire me." This isn't too good to be true. The truth is that College Co-Op programs totally rock, and I could have gotten that quote from thousands of Co-Op students nationwide. There are several reasons why college Co-Op programs rock. Added Work Experience and Job Offers Think about this: One student goes to

college, tries to find a job in the summer just to help with expenses, and then graduates on time with good grades but no work experience, and a boat load of student loans. Another student goes to college for the first half of the year, then goes to work at a company that is part of her university's Co-Op program, gains six months of work experience for which she is paid \$11,000 - \$18,000, then goes back to campus to learn in the classroom, repeating this cycle until she graduates with both a

degree and meaningful work experience. Buy the book to read more!
