Essentials of Business Statistics Jones & Bartlett Publishers

This is the only textbook that helps students develop a thorough understanding of the legal environment of business and enhances their ability to engage in critical thinking and ethical analysis. The legal environment of business is thoroughly treated in an extremely reader-friendly manner; various topics include: the American legal system, dispute resolution, constitutional principles, cyberlaw, white-collar crime, contracts, sales, product and service liability, the law of property, agency law, labor-management relations, environmental law, securities trading and issuance, antitrust laws, and debtor-creditor relations. An excellent desk reference for the legal departments of any business, this book also provides an interesting read for anyone interested in business and ethics.

Interviewing and Investigating Penguin
Based on Michael Quinn Patton's Utilization Focused Evaluation, this briefer and more condensed 'essentials' book provides both an overall framework and concrete advice for how to conduct useful evaluations that actually get used. This book integrates both theory and practice and is not only based on research, but also professional experience.

A guide to the types of intellectual property and how startups can best

manage intellectual property in the early stages of the company. Startups face a variety of risks. The biggest risk is market risk, and entrepreneurs should be spending most of their time addressing the market risks - not learning law. The Startup Guide to Intellectual Property helps startups grow by showing how intellectual property is used to build and keep a sustainable competitive advantage. Moreover, The Startup Guide to Intellectual Property discusses the cost - benefit trade-offs when trying to capture a company's intellectual property and provides guidance on how to make those decisions. It includes a practical description of the types and uses of intellectual property and presents workable options for protecting that intellectual property early.

#1 NEW YORK TIMES BESTSELLER If you want to build a better future, you must believe in secrets. The great secret of our time is that there are still uncharted frontiers to explore and new inventions to create. In *Zero to One*, legendary entrepreneur and investor Peter Thiel shows how we can find singular ways to create those new things. Thiel begins with the contrarian premise that we live in an age of technological stagnation, even if we're too distracted by shiny mobile devices to notice. Information technology has improved rapidly, but there is no reason why progress should be limited to computers or Silicon Valley. Progress can be achieved in any industry or area of business. It comes from the most important skill that every leader must master: learning to think for yourself. Doing what someone else

already knows how to do takes the world from 1 to n, adding more of something familiar. But when you do something new, you go from 0 to 1. The next Bill Gates will not build an operating system. The next Larry Page or Sergey Brin won't make a search engine. Tomorrow's champions will not win by competing ruthlessly in today's marketplace. They will escape competition altogether, because their businesses will be unique. Zero to One presents at once an optimistic view of the future of progress in America and a new way of thinking about innovation: it starts by learning to ask the questions that lead you to find value in unexpected places.

A less-expensive grayscale paperback version is available. Search for ISBN 9781680923018. Business Law I Essentials is a brief introductory textbook designed to meet the scope and sequence requirements of courses on Business Law or the Legal Environment of Business. The concepts are presented in a streamlined manner, and cover the key concepts necessary to establish a strong foundation in the subject. The textbook follows a traditional approach to the study of business law. Each chapter contains learning objectives, explanatory narrative and concepts, references for further reading, and end-of-chapter questions. Business Law I Essentials may need to be supplemented with additional content, cases, or related materials, and is offered as a foundational resource that focuses on the baseline concepts, issues, and approaches.

3 things to know about the focus of Dynamic Business Law, 2e: -Emphasis on

ETHICAL DECISION-MAKING. In chapter 2, the authors introduce a framework for making ethical business decisions that students can use on a regular basis. Following each case there are questions designed to train students to apply this approach. Then repeatedly throughout the chapters, questions about business ethics are raised in the text. This framework is designed to help improve the learning process of students and to give a sense of relevancy to the ethical decision making process. -Emphasis on CRITICAL THINKING. Neil Browne, one of the co-authors of this text, has written a successful text on critical thinking. His framework is included in Dynamic Business Law as well - to help students learn how to frame and reframe a question/issue. Critical thinking questions are also included at the end of each case, to further tie in this component. -Emphasis on the BUSINESS in business law. Dynamic Business Law emphasizes the tie of legal issues back to the core business curriculum. This will help both students and faculty. Students need to understand how the concepts they learn in this course tie into their business careers. Instructors can easily show that the study of business law is best seen as a foundational component of the larger study of business administration. Dynamic Business Law now includes Connect Business Law as a packaging option. Connect includes Interactive Applications for each chapter of the textbook and helps students apply legal concepts to business, stimulates critical thinking, and reinforces key topics. Overview: Dynamic Business Law, 2e is appropriate for the two-term business law course. - Emphasis on the BUSINESS in business law. Dynamic Business Law emphasizes the tie of legal issues back to the core business

curriculum. This will help both students and faculty. Faculty need to know how this is integrated as they are constantly 'defending' the inclusion of this course in the business curriculum. And students need to understand how the concepts tie to their future business careers. - Emphasis on TEACHING. Many professors teaching this course are attorneys first and academics second. They do not have a lot of time to prepare or think about how to apply this information effectively for their business students. Dynamic Business Law contains a helpful instructor's manual, particularly for the many adjuncts teaching this course. - Emphasis on CRITICAL THINKING. Neil Browne, one of the co-authors of this text, has written a successful text on critical thinking. His framework is included in Dynamic Business Law as well - to help students learn how to frame and reframe a question/issue. Critical thinking questions are also included at the end of each case, to further tie in this component. Instructor's Supplements: The Online Learning Center contains the complete IM, Test Bank, PowerPoint, image library, and video clips. - Instructor's Manual: The Instructor's Manual provides a clear outline of how to begin using this text and is especially helpful to adjuncts who teach Business Law. Sample syllabi are included, as well as detailed lecture outlines incorporating PowerPoints and other materials professors can bring into their lectures. Exciting and new examples from outside the text are also included, and can be discussed in class to help generate excitement and involvement in the course from students. - Test Bank: The Test Bank, developed by Vonda Laughlin of Carson-Newman College, contains a variety of true/false, multiple choice, and essay questions - as

well as "scenario-based" questions, which are application-based, and use a situation described in a narrative, with 3 - 5 multiple-choice test questions based on the situation described in the narrative. We've aligned our Test Bank with the new AACSB guidelines, tagging each question according to its knowledge and skills areas. Categories include Global, Ethics and Social Responsibility, legal and other External Environment, communication, Diversity, Group Dynamics, Individual Dynamics, Production and IT. Designations aligning questions with Learning Objectives, features, and case, exist as well. - PowerPoint Presentation slides: Developed by Jeff Penley at Catawba Valley Community College, we offer two different sets of slides for professors. The "Basic" set consists of an outline of each chapter. The "Premium" set expands on this outline to include hypotheticals and ethical dilemmas, allowing the instructor to incorporate application into the lecture. Instructor Video DVD (ISBN: 0077339118, 13-digit: 9780077339111): The Instructor Video DVD contains video clips from CBS that highlight current legal issues. Instructor Notes, located on the OLC, give insight into how to incorporate segments into the classroom and offer questions to stimulate discussion. "Most of these videos are also part of Premium content - a big plus for instructors teaching online/hybrid courses." *Dynamic Business Law: The Essentials* McGraw-Hill Education Dynamic Business Law is appropriate for the one-semester Business Law course. It contains the basics of business law but does not get bogged down in the kind of details that are more appropriate in an upper-level law class. The text provides an examination of the basic questions,

concepts, and legal rules of business law. • **Emphasis on the BUSINESS in business law.** *Dynamic Business Law: The Essentials* emphasizes the tie of legal issues back to the core business curriculum. BUSINESS STRATEGY. "The 4 Disciplines of Execution" offers the what but also how effective execution is achieved. They share numerous examples of companies that have done just that, not once, but over and over again. This is a book that every leader should read! (Clayton Christensen, Professor, Harvard Business School, and author of "The Innovator's Dilemma). Do you remember the last major initiative you watched die in your organization? Did it

go down with a loud crash? Or was it slowly and quietly suffocated by other competing priorities? By the time it finally disappeared, it's likely no one even noticed. What happened? The whirlwind of urgent activity required to keep things running day-to-day devoured all the time and energy you needed to invest in executing your strategy for tomorrow. "The 4 Disciplines of Execution" can change all that forever.

Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control - from the author of *The Laws of Human Nature*. In the book that *People* magazine proclaimed "beguiling" and "fascinating," Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence ("Law 1: Never Outshine the Master"), others teach the value of confidence ("Law 28: Enter Action with Boldness"), and many recommend absolute self-preservation ("Law 15: Crush Your Enemy Totally"). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, *The 48 Laws of Power* is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.

Presenting a brand new approach to teaching consumer behaviour, Szmigin and Piacentini move beyond traditional psychological learning to acknowledge more holistic perspectives of consumer behaviour and incorporate new areas of research, such as Consumer Culture Theory, which are enhancing our understanding of this fascinating subject. The latest behavioural, psychological and sociological approaches are presented alongside emerging techniques, such as neuromarketing, with their application to marketing explicitly drawn out. Theory is firmly set in context for students through extensive use of international examples and extended cases on topics such as repertoire shopping in China, lifestyles of Indian consumers, and learning about brands through Havaianas in Brazil. Each chapter includes Consumer Insights covering topics such as social media marketing in the Netherlands, repositioning Lucozade in the UK, and finding the right celebrity endorser. These features bring together the themes discussed and encourage students to engage with the material on a more practical level. Central to the book is the recognition of how businesses and government are likely to use knowledge of these theories and techniques in marketing strategies and business decision making. Each chapter includes a Practitioner Insight from a professional working in marketing, advertising, government or charity, including Dubit,

Thinkbox and Age UK to provide real world views on the topics being discussed and the possible future direction of these areas. The authors acknowledge consumer behaviour as a research discipline. To reflect this, Research Insights features throughout each chapter include links to seminal papers to present students with the opportunity to take their learning further. The accompanying Online Resource Centre provides superior ready-to-use support for both students and lecturers: For students: * Author blog, responding to changes within the subject and supporting the currency of the textbook; * Web links illustrating consumer behaviour in practice including examples from print, video and web; * Multiple choice questions with instant feedback; * Links to seminal articles as highlighted in the Research Insights feature; * Web exercises to encourage students to test their knowledge and apply their learning; * Flashcard glossary to test understanding of key terms. For lecturers: * Comprehensive customizable PowerPoint slides; * Learning activities (including, more detailed workshop-based activities, shorter lecture-based in-class exercises and suggestions for assessment approaches) * An instructor's manual (containing guidance on how to use the case studies and Practitioner Insights in class, indicative answers, and some additional questions).
