Anak autisme memiliki kebutuhan dasar yang sama dengan anak normal lainnya. Namun akibat dari gangguan perkembangan yang dialami menyebabkan mereka tidak atau kurang mampu memenuhi kebutuhannya tersebut secara mandiri. Tujuan penelitian ini adalah mengetahui kapasitas orang tua terhadap personal hygiene anak autisme. Jenis penelitian deskriptif. Populasi penelitian ini adalah semua orang tua yang memiliki anak autisme dengan jumlah sampel 30 responden. menggunakan teknik total sampling. Variabel dalam penelitian ini adalah kapasitas orang tua terhadap personal hygiene anak autisme. Instrumen penelitian menggunakan kuesioner. Data yang diperoleh kemudian diproses editing, coding, scoring dan tabulating. Hasil penelitian menunjukkan bahwa sebagian besar orang tua memiliki kapasitas maksimal terhadap personal hygiene (mandi) anak autisme yaitu 21 orang (70%). Sebagian besar orang tua memiliki kapasitas maksimal terhadap personal hygiene (keramas) anak autisme yaitu 21 orang (70%). Sebagian besar orang tua memiliki kapasitas maksimal terhadap personal hygiene (gosok gigi) anak autisme yaitu 22 orang (73,3%). Sebagian besar orang tua memiliki kapasitas maksimal terhadap personal hygiene (cuci tangan) anak autisme yaitu 20 orang (63,7%). Sebagian besar orang tua memiliki kapasitas maksimal terhadap personal hygiene (memotong kuku) anak autisme yaitu 19 orang (63,3%). Saran dari hasil penelitian yaitu memberikan pendidikan dan pelatihan kepada orang tua yang memiliki anak autisme dalam mengelola sumber-sumber daya yang dimiliki, paling tidak uang dan waktu dalam upaya peningkatan kapasitas orang tua terhadap personal hygiene anak autisme. Diharapkan hasil penelitian ini dapat dikembangkan dengan menyertakan variabel yang belum diangkat dalam pelaksanaan penelitian ini.

 Sobotta - Atlas of Human Anatomy: the exam atlas for understanding, learning, and training anatomy The English-language Sobotta Atlas with English nomenclature is specifically adapted to the needs of preclinical medical students. Right from the start, the book and the Internet content concentrate on exam-relevant knowledge. The new study concept simplifies learning—understanding—training: Descriptive legends help the student identify the most important features in the figures. Clinical examples present anatomical details in a wider context. All illustrations have been optimized, and the lettering reduced to a minimum. Note: The image quality

and clarity of the pictures in the E-Book are slightly limited due to the format. Volume 1 "General Anatomy and Musculoskeletal System" includes the following topics: General Anatomy Trunk Upper Extremity Lower Extremity

Dermatology in Public Health Environments CRC Press

This book provides a reference guide in the field of dermatology, presenting and discussing its interface with public health. Dermatological diseases are extremely common in populations around the globe, and the systematization of knowledge about these dermatoses and their relationships with different epidemiological factors may help us to understand the challenges that governments and private institutions face and must try to overcome in order to improve global health. Undergraduate and graduate students, dermatologists and general practitioners who study and / or work in the area will find scientific support in this book, which is intended as a reference work for dermatological practice and public health. The book has ten sections addressing carefully selected topics, including: 1. concepts in dermatoepidemiology and the international strategies in programs of Public Health; 2-6. the most significant skin diseases (including dermatology in tropical medicine) ; 7. diseases that are not primarily dermatological, but have a high impact on public health and may have skin and mucosal manifestations; 8. a number of emerging issues in dermatology in public health; 9. clinical approaches (diagnosis and management) to common dermatological symptoms and 10. multidisciplinary approaches in dermatology. The editors have brought together authors with extensive experience in their respective fields in order to provide a reference book for those involved in or with an interest in the relationship between dermatology and public health.

A Comprehensive Textbook Springer Publishing Company

With sexually transmitted infections (STIs) a major cause of morbidity and mortality throughout the world, the new edition of ABC of Sexually Transmitted Infections is a much-needed introduction and reference guide providing concise and practical information on a range of conditions. This sixth edition includes the latest guidance on the prevalence, prevention and treatment of STIs, screening programmes and new testing methods. It features new chapters on service modernisation and new care providers, high risk and special needs groups, the use of the internet for information and education, systemic manifestations and sexually transmitted infections in resource-poor settings. Contraception is also covered, reflecting the increasing integration of STI and contraceptive services. With an international authorship, the ABC of Sexually Transmitted Infections is an authoritative guide and reference for all practitioners, especially those providing community based STI diagnosis and management such as GPs, primary care physicians and contraceptive service providers. Junior doctors, medical students, and nurses working in community or specialist services will also find it a valuable resource as will those working in the fields of obstetrics and gynaecology and public health. This new edition also provides information useful for new STI care providers such as pharmacists, those in the voluntary sector and providers of STI services in resource-poor settings.

A high standard of hygiene is a prerequisite for safe food production, and the foundation on which HACCP and other safety management systems depend. Edited and written by some of the world's leading experts in the field, and drawing on the work of the prestigious European Hygienic Engineering and Design Group (EHEDG), Hygiene in food processing provides an authoritative and comprehensive review of good hygiene practice for the food industry. Part one looks at the regulatory context, with chapters on the international context, regulation in the EU and the USA. Part two looks at the key issue of hygienic design. After an introductory chapter on sources of contamination, there are chapters on plant design and control of airborne contamination. These are followed by a sequence of chapters on hygienic equipment design, including construction materials, piping systems, designing for cleaning in place and methods for verifying and certifying hygienic design. Part three then reviews good hygiene practices, including cleaning and disinfection, personal hygiene and the management of foreign bodies and insect pests. Drawing on a wealth of international experience and expertise, Hygiene in food processing is a standard work for the food industry in ensuring safe food production. Geriatric dentistry, or gerodontics, is the branch of dental care dealing with older adults involving the diagnosis, prevention, and treatment of problems associated with normal aging and age-related diseases as part of an interdisciplinary team with other healthcare professionals. Prosthodontics is the dental specialty pertaining to the diagnosis, treatment planning, rehabilitation, and maintenance of the oral function, comfort, appearance, and health of patients with clinical conditions associated with missing or deficient teeth and/or oral and maxillofacial tissues using biocompatible materials. Periodontology, or Periodontics, is the specialty of oral healthcare that concerns supporting structures of teeth, diseases, and conditions that affect them. The supporting tissues are known as the periodontium, which includes the gingiva (gums), alveolar bone, cementum, and the periodontal

ligament. Oral biology deals with the microbiota and their interaction within the oral region.

Research in oral health and systemic conditions concerns the effect of various systemic conditions on the oral cavity and conversely helps to diagnose various systemic conditions.

- (a Young Man Tries to Challenge the Virnal Regime and Is Pursued by a Mysterious Adventuress) London School

Abstract: A biocultural approach to nutrition emphasizes the impact of the social sciences on food intake. Purchasing, preferences and ideology are heavily influenced by social, economic, political, and cultural processes. Food consumption surveys, data collection and analysis (including types of dietary surveys), the interview, statistical methods, and reliability of methods are discussed. Time and cost factors have led to new approaches in dietary assessment such as scalogram analysis, food scores, and quality indices. Widely divergent dietary patterns of Americans are discussed by ethnic group: Puerto Ricans, Black Americans, Mexican Americans, American Indians (several tribes), and Asian Americans (Chinese, Japanese, Vietnamese, Filipinos, Hawaiians). Food habit modification is complex due to a rigid structure of social values that determine behavior. Nutrition/communication specialists are needed for research activities, mass media, governmental nutrition action programs and mandated nutrition education programs. Ethics of nutrition intervention are an important concern in affecting dietary changes. Each chapter is followed by a lengthy bibliography. (rkm).
