A highly useful resource for both scholars and students.

The Works of the Great Albionean Divine ... Mr Hugh Broughton, Etc. [With a Biographical Preface by John Lightfoot and an Engraved Portrait.] Stanford University Press

A consideration of China's Mount Emei, long important in Chinese culture and history and of particular significance to Buddhists.

John Wiley &amp; Sons

Throughout the War of Resistance against Japan (1931–1945), the Chinese Nationalist government punished collaborators with harsh measures, labeling the enemies from within hanjian (literally, traitors to the Han Chinese). Trials of hanjian gained momentum during the postwar years, escalating the power struggle between Nationalists and Communists. Yun Xia examines the leaders of collaborationist regimes, who were perceived as threats to national security and public order, and other subgroups of hanjian including economic, cultural, female, and Taiwanese hanjian. Built on previously unexamined code, edicts, and government correspondence, as well as accusation letters, petitions, newspapers, and popular literature,

Down with Traitors reveals how the hanjian were punished in both legal and extralegal ways and how the anti-hanjian campaigns captured the national crisis, political struggle, roaring nationalism, and social tension of China's eventful decades from the 1930s through the 1950s.

This pathbreaking work argues that literate gentry women in 17th-century Jiangnan, far from being oppressed or silenced, created a rich culture and meaningful existence within the constraints of the Confucian system. Momentous socioeconomic and intellectual changes in 17th-century Jiangnan provided the stimulus for the flowering of women's culture. The most

salient of these changes included a flourishing of commercial publishing, the rise of a reading public, a new emphasis on emotions, the promotion of women's education, and, more generally, the emergence of new definitions of womanhood. The author reconstructs the social, emotional and intellectual worlds of 17th-century women, and in doing so provides a new way to conceptualize China's past, one offering a more realistic and complete understanding of the values of Chinese culture and the functioning of Chinese society.

In this funny, outrageous and empowering book, Dr. Lissa Rankin answers all the secret gynecological questions that most women wonder about, but have always been afraid to ask. Suppose you had a wise, warm, funny best friend-who just happened to be a gynecologist. You're out with the girls for cocktails and the conversation turns to sex, and then to girly parts. One by one, you start asking her all the questions you've secretly wondered about-and discover that you have a lot in common. If you were to write those questions down, then you'd have *What's Up Down There?*, a life-changing little book that answers: - Do old ladies have

saggy vaginas? - How do male gynecologists have a sex life without feeling like they're stuck at the office? - Is it normal for your inner labia to hang out of your outer labia? - Can the baby feel its mom having sex during pregnancy? - How common is it for one's boobs to be two totally different sizes? And so much more! As outrageously funny as it is empowering, this book reveals how to love yourself and your body-and will have you recommending it to every woman you know. From off-the-wall sex questions to serious topics of women's sexual health, *What's Up Down There?* provides answers to women of all ages and stages.

This book analyzes the recent growth of Guangzhou, Shenzhen, Fuzhou, Shanghai, Hangzhou, Nanjing, and Hong Kong, seven major Chinese coastal cities. The authors detail theoretical mechanisms, spatial and non-spatial models of development, all while exploring possible directions to sustainability. They also look at how these cities have developed over the last 30 years, from the late 1970s to the 21st century. Each has its own unique

background, regional and national positions, advantages, and functions. Using diversified approaches and measurements for each city, the authors argue that structural changes are necessary to achieve much needed sustainable development. The book covers developmental issues such as the regaining of central city and global city statuses, the role of governments in steering development, and achieving goals through mega projects, urban competitiveness, positioning, and branding. Including varied assessment and intense suggestions for structural changes, this book addresses core concerns for the sustainable growth of these metropolises. A valuable book for students, researchers and policy makers. *The Encyclopedia of Taoism* A&C Black

Daoism is the oldest indigenous philosophic-spiritual tradition of China and one of the most ancient of the world's spiritual structures. The name Daoism comes from the term dao, which means a "way" or a "road" through the field or woods to one's village. It is also means the "way" to do something, such as how a master craftsman carves wood, makes a bell, or even butchers an ox. But dao is also a nominative in the history of Daoism, referring to the energizing process that permeates and animates all of reality and moves it along. However, both text and practice in this tradition insist that dao itself cannot be described in words; it is not God in the sense of Western philosophy or religion. Daoism has no supreme being, even if there is an extensive

grammar about nominally self-conscious entities and powers for which the Chinese use the word “spirit” (shen). For example, the highest powers of Daoism are variously called Taishang Laojun (the deified Laozi), the Celestial Worthy of Primordial Beginning (Yuanshi tianzun), the Jade Emperor (Yuhuang Shangdi), or the Perfected Warrior (Zhenwu). But these are expressions of dao in specific shen; they are not identical to Dao, except in the most unique case—when Laozi, the putative founder of Daoism and author of its major work, Daodejing, is said to be one with the dao. Historical Dictionary of Daoism contains a chronology, an introduction, appendixes, an extensive bibliography, and more than 400 cross-referenced entries related to the Chinese belief and

worldview known as Daoism, including dozens of Daoist terms, names, and practices. This book is an excellent resource for students, researchers, and anyone wanting to know more about Daoism.

*The Paradox of Being* BRILL

The Encyclopedia of Taoism provides comprehensive coverage of Taoist religion, thought and history, reflecting the current state of Taoist scholarship. Taoist studies have progressed beyond any expectation in recent years. Researchers in a number of languages

have investigated topics virtually unknown only a few years previously, while others have surveyed for the first time textual, doctrinal and ritual corpora. The Encyclopedia presents the full gamut of this new research. The work contains approximately 1,750 entries, which fall into the following broad categories: surveys of general topics; schools and traditions; persons; texts; terms; deities; immortals; temples and other sacred sites. Terms are given in their original characters, transliterated and translated. Entries are thoroughly cross-referenced and, in addition, 'see also' listings are given at the foot of many entries. Attached to each entry are references taking the reader to a master bibliography at the end of the work. There is chronology of Taoism and the

whole is thoroughly indexed. There is no reference work comparable to the Encyclopedia of Taoism in scope and focus. Authored by an international body of experts, the Encyclopedia will be an essential addition to libraries serving students and scholars in the fields of religious studies, philosophy and religion, and Asian history and culture.

The question of truth has never been more urgent than today, when the distortion of facts and the imposition of pseudo-realities in the service of the powerful have become the order of the day. In *The Paradox of Being Poul Andersen* addresses the concept of truth in Chinese Daoist philosophy and ritual. His approach is unapologetically universalist, and the book may be read as a call for a new way of studying Chinese culture, one that does not shy away from approaching “the other” in terms of an engagement with “our own” philosophical heritage. The basic Chinese word for truth is zhen, which means both true and real, and it bypasses the separation of the two ideas

insisted on in much of the Western philosophical tradition. Through wide-ranging research into Daoist ritual, both in history and as it survives in the present day, Andersen shows that the concept of true reality that informs this tradition posits being as a paradox anchored in the inexistent Way (Dao). The preferred way of life suggested by this insight consists in seeking to be an exception to ordinary norms and rules of behavior which nonetheless engages what is common to us all.

Chromosomal Variation in Man BRILL

This book offers a balanced assessment of the dynamics and consequences of the decentralization of power and resources in post- Mao China. The author argues that decentralization has increased tensions amongst ethnic groups and unleashed much competition and emulation among local governments. This book is an authoritative study of an issue that will remain highly visible on China's political agenda for the foreseeable future.

Written in clear and lucid style and

ambitious both in scope and methodology, this book offers a fascinating window into Chinese culture, religion, and history. Ranging from historical and ethnographic documents to a wide variety of literary sources, it weaves them all into a compelling narrative. In this fashion, Shahar is uniquely able to bring together social, historical, and mythological elements, providing a demythologized account of martial Chinese traditions such as Shaolin Boxing. This is sinology at its best.—Bernard Faure, Columbia University "The book clearly belongs in a new group of books challenging conventional understandings of Buddhism and violence. Meir Shahar documents with meticulous accuracy and mellifluous prose the fighting monks

of Shaolin monastery in China, who appear first in the Tang dynasty (618–907) and continue to the present. Scholars of Buddhism and Chinese history will learn much from the author's scrupulous analysis of the historical record—particularly the texts on stone steles at the monastery—that documents the monastery's traditions of fighting. Anyone interested in martial arts or Bruce Lee films will find it fascinating to learn about the actual history of the monastery's fighting techniques. I found the book a powerful and compelling read." —Valerie Hansen, Yale University "Meir Shahar's book will assure that the martial arts of Shaolin take a prominent place in the history of Chinese Buddhism. Shahar has mastered a prodigious amount of secondary

scholarship, pored over a wealth of primary documents, and brought a critical rigor to the study of these materials that is unprecedented in any language. Throughout, his analysis is cogent and clear. The result is a delightful tour of one of the most enigmatic and compelling stories of Chinese religion: the emergence and development of martial arts at Shaolin Si. Entertaining as the book is, it delivers as well a meditation on the sources of Chinese religion, and how fiction and scripture, myth and history combine to produce novel traditions. The Shaolin Monastery will appeal not only to scholars of Chinese religion, but to those interested in military history, self-cultivation, martial arts, and popular culture."—John Kieschnick, University of

Bristol The Shaolin Monastery charts, for the first time in any language, the history of the Shaolin Temple and the evolution of its world-renowned martial arts. In this meticulously researched and eminently readable study, Meir Shahar considers the economic, political, and religious factors that led Shaolin monks to disregard the Buddhist prohibition against violence and instead create fighting techniques that by the twenty-first century have spread throughout the world. He examines the monks' relations with successive Chinese regimes, beginning with the assistance they lent to the seventh-century Emperor Li Shimin and culminating more than a millennium later with their complex relations with Qing rulers, who suspected them of rebellion. He reveals

the intimate connection between monastic violence and the veneration of the violent divinities of Buddhism and analyzes the Shaolin association of martial discipline and the search for spiritual enlightenment. Shahar's exploration of the evolution of Shaolin fighting techniques serves as a prism through which to consider martial-art history in general. He correlates the emergence of the famous bare-handed techniques of Taiji Quan, Xingyi Quan, and Shaolin Quan in the sixteenth and seventeenth centuries to the social, political, and religious trends of that age. He then goes on to argue that these techniques were created not only for fighting, but also for religious and therapeutic purposes. Thus his work fills an important gap in the understanding of

Chinese religion and medicine as well as the martial arts. The Shaolin Monastery is the most exhaustive study to date on the topic and the most systematic introduction to the history and the religious context of the Chinese martial arts tradition. It will engage those interested in Chinese religion and history and martial arts, illuminating for specialists, martial artists, and general readers alike the history and nature of a martial tradition that continues to grow in popularity in its native land and abroad.

The Making and Remaking of China's "Red Classics" Politics, Aesthetics, and Mass Culture Hong Kong University Press

**A Berlin Symposium** BRILL

The Making and Remaking of China's

“Red Classics” is the first full-length work to bring together research on the “red classics” across the entire Maoist period through to the reform era. It covers a representative range of genres including novels, short stories, films, TV series, picture books, animation, and traditional-style paintings. Collectively, the chapters offer a panoramic view of the production and reception of the original “red classics” and the adaptations and remakes of such works after the Cultural Revolution. The contributors present fascinating stories of how a work came to be regarded as, or failed to become, a “red classic.” There has never been a single answer to the question of what counts as a “red classic”; artists had to negotiate the changing political circumstances and

adopt the correct artistic technique to bring out the authentic image of the people, while appealing to the taste of the mass audience at the same time. A critical examination of these works reveals their sociopolitical and ideological import, aesthetic significance, and function as a mass cultural phenomenon at particular historical moments. This volume marks a step forward in the growing field of the study of Maoist cultural products. “The Making and Remaking of China’s ‘Red Classics’” analyzes the creation of literature in the Maoist era as well as the way in which the revolutionary canon was rediscovered and imagined during the reform period. This book is a timely and fascinating set of studies, critically illuminating a foundational time during

PRC history and its aftermath.” —Wendy Larson, professor emerita, University of Oregon “Creative works produced in the Mao era (1942-1976) are often dismissed as mere propaganda. Despite the fact that they are artistic reflections of that remarkable period, scholars have generally ignored these ‘red classics.’ This book throws much needed light on them. It is a must-read for anyone wanting to understand the cultural scene in China.” —Kam Louie, honorary professor, University of Hong Kong and UNSW, Australia  
*Prosodia in Vocabularium Bilingue, Latinum et Lusitanum* University of Hawaii Press  
 In early medieval China hundreds of Buddhist miracle texts were circulated, inaugurating a trend that would continue

for centuries. Each tale recounted extraordinary events involving Chinese persons and places—events seen as verifying claims made in Buddhist scriptures, demonstrating the reality of karmic retribution, or confirming the efficacy of Buddhist devotional practices. Robert Ford Campany, one of North America’s preeminent scholars of Chinese religion, presents in this volume the first complete, annotated translation, with in-depth commentary, of the largest extant collection of miracle tales from the early medieval period, Wang Yan’s *Records of Signs from the Unseen Realm*, compiled around 490 C.E. In addition to the translation, Campany provides a substantial study of the text and its author in their historical and religious settings. He shows how these

lively tales helped integrate Buddhism into Chinese society at the same time that they served as platforms for religious contestation and persuasion. Company offers a nuanced, clear methodological discussion of how such narratives, being products of social memory, may be read as valuable

evidence for the history of religion and culture. Readers interested in Buddhism; historians of Chinese religions, culture, society, and literature; scholars of comparative religion: All will find Signs from the Unseen Realm a stimulating and rich contribution to scholarship.
