This book is divided into
chapters that cover MRI of
all structures of the knee

joint in the order that is
usually used in practice -
cruciate ligaments,
collateral ligaments,
menisci, cartilage,
subchondral bone, patella,
synovia, muscles and
tendons, arteries, veins
and bones. With the aid of
numerous images, each
chapter provides
comprehensive
descriptions of the

anatomy, the normal MR
appearance, pathological
MR findings, and
postoperative MRI
appearance. A text box at
the end of each chapter
clearly describes how the
MRI report should be
compiled and identifies
what should be included
when reporting on specific
lesions. The book will be
an ideal guide for

radiologists and will also be relevant for orthopaedic surgeons, rheumatologists, and physiotherapists.

Body Image, Eating, and Weight BoD – Books on Demand

Liver disease is a widespread and increasing problem throughout the world, however little is published on how different types and degrees of liver dysfunction affect the body's ability to handle medicines. "Drugs and the Liver" is designed to assist practitioners in

making pragmatic choices for their patients. It aims to: enable the practitioner to assess liver function using biochemical markers, other tests, signs, symptoms and disease knowledge; identify which pharmacokinetic and pharmacodynamic parameters of a drug are likely to be affected by different types of liver disease; and consider the impact of a drug's side effects on a patient with liver disease. This practical guide covers background information on liver

function, the principles of drug use in liver disease and includes a section of worked examples of commonly asked questions. It will be invaluable to clinical pharmacists and anyone making medicine choices in patients with liver impairment.

This handbook provides an easily navigable source of information about the day-to-day management of patients requiring palliative and hospice

care. Succinct, evidence-based, topically focused content is supplemented by extensive tables and algorithms. The table of contents and balance of coverage follows the core curriculum of the American Board of Hospice and Palliative Medicine, thus meeting the educational and clinical information needs of students, residents, fellows, and nurse practitioners. An expert team of clinicians, led by world renowned Eduardo Bruera, address approach to care; psychosocial and

spiritual issues; impending death; grief and bereavement; assessment and management of pain; management of non-pain symptoms such as nausea, dyspnea, depression, insomnia, and bleeding; communication and team work; and ethical and legal decision making.

Part of the pleasure of owning a dog is the mutual fun that results from the playing of games. However these games also have a role in the development and well-being of dogs, not least of which is building up a dog's self confidence and boosting dog/owner relationships. The purpose of this book is to help pet owners discover and

employ games and activities on an everyday basis that both owners and dogs will enjoy, and that will contribute towards the animal's fitness and training. Marvel at the super-abilities of your dog's sense of smell. Make his daily walks an exciting adventure. Find enough inspiration in your living room to exercise his basic play instincts. Take the opportunity when appropriate to turn your garden into a dog's adventure playground.

This book equips readers with the knowledge required to improve diagnosis and treatment and to implement integrated prevention programs in patients with eating and weight disorders. It does so by providing a comprehensive, up-to-date review of research findings and theoretical assumptions concerning the interface and interactions between body image and such disorders as anorexia nervosa, bulimia nervosa, binge

eating disorder, other specified feeding and eating disorders, orthorexia nervosa, overweight, and obesity. After consideration of issues of definition and classification, the opening part of the book examines the concept of body image from a variety of viewpoints. A series of chapters are then devoted to the assessment of the multidimensional construct “body image”, to dysmorphophobia/body dysmorphic disorder, and to muscle dysmorphia. The third part discusses

body image in people suffering from different eating disorders and/or overweight or obesity, and two final chapters focus on body image in the integrated prevention of eating disorders and obesity, and cultural differences regarding body image. The book will be of interest to all health professionals who work in the fields of psychiatry, clinical psychology, eating disorders, obesity, body image, adolescence, public health, and prevention.

 In this pioneering volume,
 Peter L. Rudnytsky and
 Rita Charon bring
 together distinguished
 contributors from
 medicine, psychoanalysis,
 and literature to explore
 the multiple intersections
 between their respective
 fields and the emerging
 discipline of narrative
 medicine, which seeks to
 introduce the values and
 methods of literary study

into clinical education and
 practice. Organized into
 four sections-
 contextualizing narrative
 medicine, psychoanalytic
 interventions, the
 patient's voice, and acts
 of reading-the essays take
 the reader into the
 emergency room, the
 consulting room, and the
 classroom. They range
 from the panoramas of
 intellectual history to the
 close-ups of literary and
 clinical analysis, and they
 speak with the voice of
 the patient as well as the
 physician or professor,
 reminding us that these

are often the same. Book
 jacket.

This book documents
 current knowledge and
 standards of care for
 acute muscle injuries. The
 full range of injuries is
 covered, including those
 to the hamstring, hip
 adductor, quadriceps,
 calf, pectoralis major,
 biceps brachii, latissimus
 dorsi and rectus
 abdominis muscles.
 Evidence-based content is
 combined with experience
 from medical experts

from around the globe in order to provide the reader with a full picture of the latest insights into terminology, trauma mechanisms, basic principles of healing, diagnosis and treatment. Helpful diagnostic and treatment algorithms are included and clear guidance provided on ensuring optimal rehabilitation and rapid return to sports. The book is structured in such a way that it will serve as an ideal reference manual for orthopaedic surgeons, sports medicine

physicians, physiotherapists, general practitioners, paramedics, sports managers, athletes and coaches.

Endoscopic Approaches to the Paranasal Sinuses and Skull Base CreateSpace

Provides guidelines and tips for creating a welcoming library space for children and teenagers, covering such concerns as design facilitation, spatial planning, architectural and environmental elements, and mood and ambience.

giornale internazionale

settimanale de medicina, chirurgia e scienze affini IOS Press

This book contextualizes translational research and provides an up to date progress report on therapies that are currently being targeted in lung cancer. It is now well established that there is tremendous heterogeneity among cancer cells both at the inter- and intra-tumoral level. Further, a growing body of work highlights the importance of targeted therapies and personalized medicine in

treating cancer patients. In contrast to conventional therapies that are typically administered to the average patient regardless of the patient's genotype, targeted therapies are tailored to patients with specific traits. Nonetheless, such genetic changes can be disease-specific and/or target specific; thus, the book addresses these issues manifested in the somatically acquired genetic changes of the targeted gene. Each chapter is written by a

leading medical oncologist who specializes in thoracic oncology and is devoted to a particular target in a specific indication. Contributors provide an in-depth review of the literature covering the mechanisms underlying signaling, potential cross talk between the target and downstream signaling, and potential emergence of drug resistance.

A Guide to Evaluation and Reporting Simon and Schuster

This text is aimed at experts who have been

interested in implant dentistry for many years and who wish to implement this clinical application with the high predictability that comes from following the correct, scientifically based guidelines.

Molecular Biology of Prostate Cancer Springer
Tui na: The Chinese Massage Manual is a comprehensive and well established handbook for students and practitioners of Tui na in the West. The author describes the roots and development of Tui na, how it works

therapeutically with the context of Chinese medicine, and how to become an effective Tui na practitioner. The book contains detailed and clearly illustrated descriptions of Tui na techniques, how to practice them, their clinical applications and therapeutic effects. Foundation area routines are provided to support the development and fluidity of manual skills and to give an initial structure for building treatments. The book has a unique approach to

creating and planning Tui na treatments. Avoiding the prescriptive approach usually employed, the author discusses the principles of practice and enables the student practitioner to make choices and formulate treatments by bringing together their knowledge and skills. Frameworks are provided, and techniques, methods and approaches suggested for presenting patterns of disharmony within the treatment of common ailments. The book features - Over 120

photographs clearly illustrating the techniques - The application of the ancillary therapies of cupping, gua sha and moxibustion - The application of external herbal media - 'Tips for Practice' easy reference to support the learning of techniques - Case histories illustrating the treatment of common clinical ailments - Treatment foundation area routines - Yin and yang styles of practice - Demonstration of how to combine Tui na and acupuncture in practice -

a related series of videos (available online) showing how to apply all the major techniques

Breast Cancer in Young Women Springer Nature

A brand-new Courtney Series adventure. The action-packed new book in the Courtney Series and the sequel to Courtney's War. Just because the war is over and Hitler dead, doesn't mean the politics he stood for have died too. Saffron Courtney and her beloved husband Gerhard only just survived the brutal war, but Gerhard's Nazi-

supporting brother, Konrad, is still free and determined to regain power. As a dangerous game of cat-and-mouse develops, a plot against the couple begins to stir. One that will have ramifications throughout Europe. . . Further afield in Kenya, the last outcrop of the colonial empire is feeling the stirrings of rebellion. As the situation becomes violent, and the Courtney family home is under threat, Leon Courtney finds himself caught between two powerful sides - and a

battle for the freedom of a country. Legacy of War is a nail-biting story of courage, bravery, rebellion and war from the master of adventure fiction.

Keep Him Busy Throughout the Day
Springer Science & Business Media

The main strength of this book is that it examines the challenges facing the field of Bioethics today from medical, ethical and legal perspectives. A critical exchange of ideas from professionals in interdisciplinary fields

allows everyone to learn and benefit from the insights gained through others' experiences. Examining, analyzing and understanding these complex medical-ethical-legal issues and cases and how they are resolved will serve as a paradigm for all professionals who will be confronted with these complex bioethical issues now and in the future. The more we face these challenges directly, examine them critically and debate them enthusiastically the more knowledge will be gained

and hopefully, we will gain more practical wisdom. *The Medicine of Homeopathic Hybrids* American Library Association
Acclaimed writer Elif Shafak writes a letter to Jacinda Ardern, Prime Minister of New Zealand after the Christchurch attack. Actress Yasmine AlMassri pens a poem about war for her mother. Activist and TV presenter June Sarpong addresses designer Diane Von Furstenberg. These are a few of the moving and insightful letters that

make up *From Women to the World*, a book by journalist, author and executive Elizabeth Filippouli, which brings together letters from a global group of accomplished women - politicians, royalty, actors, writers, activists and more - every one addressed to a woman who means something to each of them. The results are extraordinary, heartfelt letters to historical figures, mentors, family members or inspiring ordinary people. Each is based on these women's

personal histories and experiences, drawing attention to social issues such as homelessness, war, LGBT activism, mental health care or the plight of international refugees. From Women to the World is more than a simple collection of letters - it is a book that shows a new model of leadership based on emotional intelligence and demonstrates how we have the wisdom to inspire, motivate and reinvent our world.

Oncothermia is the next generation medical innovation that delivers selective, controlled and deep energy for cancer treatment. The basic principles for oncothermia stem from oncological hyperthermia, the oldest approach to treating cancer. Nevertheless, hyperthermia has been wrought with significant controversy, mostly stemming from shortcomings of controlled energy delivery. Oncothermia has been able to overcome these insufficiencies and

prove to be a controlled, safe and efficacious treatment option. This book is the first attempt to elucidate the theory and practice of oncothermia, based on rigorous mathematical and biophysical analysis, not centered on the temperature increase. It is supported by numerous in-vitro and in-vivo findings and twenty years of clinical experience. This book will help scientists, researchers and medical practitioners in understanding the scientific and conceptual

underpinnings of oncothermia and will add another valuable tool in the fight against cancer. Professor Andras Szasz is the inventor of oncothermia and the Head of St Istvan University's Biotechnics Department in Hungary. He has published over 300 papers and lectured at various universities around the world. Dr. Oliver Szasz is the managing director of Oncotherm, the global manufacturer and distributor of medical devices for cancer

treatment used in Europe & Asia since the late 1980s. Dr. Nora Szasz is currently a management consultant in healthcare for McKinsey & Co. *MRI of the Knee* Cadmos Verlag GmbH This unique volume provides a mechanistic look at key aspects of the inflammatory response seen in critical illness. Key cells and mediators involved in the innate inflammatory response and the pathways employed to combat infection or respond to injury are emphasized. It

has become clear that a delicate balance exists to allow eradication of infection with minimal immune-mediated tissue injury in the process. For this reason an up-to-date discussion of how the inflammatory response down regulates itself has been included. The inflammatory response in the critically ill is vastly different than in healthy hosts. For this reason, discussions about the mechanisms of pharmacologic immune suppression and other less commonly considered

immunomodulated states seen frequently in critical care medicine have been included. Given the differences in immune function seen in critical illness, the importance of considering the immune

system an organ whose function must be monitored and optimized for the best possible outcome has been highlighted. In addition, we have included up-to-date discussions of prevention and diagnostic

approaches to extremely common infectious entities which must be monitored for and treated appropriately in the setting of critical illness induced immune dysfunction.
