*Soil Liquefaction During Earthquakes*  
Getty Publications  
Comprising 26 chapters, this volume

deals with the genetic transformation of medicinal plants. It describes methods to obtain plants resistant to insects, diseases, herbicides, and plants with an increased production of compounds of medicinal and pharmaceutical importance. The plant species included are *Ajuga reptans*, *Anthemis nobilis*, *Astragalus* spp., *Atropa belladonna*, *Catharanthus roseus*, *Datura* spp., *Duboisia leichhardtii*, *Fagopyrum* spp., *Glycyrrhiza uralensis*, *Lobelia* spp., *Papaver somniferum*, *Panax ginseng*, *Peganum hamala*, *Perezia* spp., *Pimpinella anisum*, *Phyllanthus niruri*, *Salvia miltiorrhiza*, *Scoparia dulcis*, *Scutellaria baicalensis*, *Serratula tinctoria*, *Solanum aculeatissimum*, *Solanum commersonii*, *Swainsona galegifolia*, tobacco, and *Vinca minor*. The book is of

special interest to advanced students, teachers, and researchers in the fields of pharmacy, plant tissue culture, phytochemistry, molecular biology, biomedical engineering, and plant biotechnology in general.

The definitive guide to 100% original and correct Porsche 911 restoration, this book covers every inch of each air-cooled 911 generation in precise detail. It includes mechanical details, bodywork, interiors, and more, all illustrated with exquisite color photographs and in-depth text. The last word on the Porsche 911, this book is the resource that no collector--whether a practical restorer or a die-hard enthusiast--can afford to be without.

*Dead by Sunset* Brill Academic Pub

With the growing incidence of fragility fractures in Europe and North America over the last three decades, bone loss and osteoporosis have become active

areas of research in skeletal biology.

Bone loss is associated with aging in both sexes and is accelerated in women with the onset of menopause. However, bone loss is related to a suite of complex and often synergistically related factors including genetics, pathology, nutrition, mechanical usage, and lifestyle. It is not surprising that its incidence and severity vary among populations. There has been increasing interest to investigate bone loss and osteoporosis from an anthropological perspective that utilizes a biocultural approach. Biocultural approaches recognize the inter-relationship between biological, cultural, and environmental variables.

Anthropological studies also highlight the value of evolutionary and population approaches to the study of bone loss.

These approaches are particularly suited to elucidate the multifactorial etiology of bone loss. The idea for this volume came out of a symposium organized by the editors at the 70th annual meeting of The American Association of Physical Anthropologists in Kansas City, Missouri. Many of the symposium participants, along with several additional leading scientists involved in bone and osteoporosis research, are brought together in this volume. Each chapter focuses on a different aspect of bone loss and fragility with a fresh and stimulating perspective.

Walter de Gruyter GmbH & Co KG  
 "Eleven historians bring their knowledge and insights to bear on the long

Braudelian sweep of Southeast Asian history. In doing so they seek both to debunk simplistic assumptions about fragile traditions and transformational modernities, and to identify real repeating patterns in Southeast Asia's past: clientelistic political structures, periodic tectonic and climatic disasters, ethnic occupational specializations, long cycles of economic globalization and deglobalization. Their contributions range across many centuries: from the Austronesian expansion to the Aceh tsunami, and from the Sanskrit cosmopolis to the Asian financial crisis. The book is inspired by, and dedicated to, Peter Boomgaard, a scholar whose work has embodied the Braudelian spirit in Southeast Asian historiography"--

### Environment

This report reviews the key features and public policy issues regarding the property & casualty insurance industry in Canada. It begins with an overview of the business and structure of the industry: the nature and composition of the property and casualty business, the industry in the context of the Canadian financial services sector, financial structure, and regulation of the industry. It then discusses the following issues: the financial capacity of the industry to handle claims resulting from a major earthquake; the likelihood of major industry consolidation; potential changes in the industry's distribution system in the near future; and the impact of technology in general.

This book provides the state-of-the-art survey of green techniques in preparation of different classes of nanomaterials, with an emphasis on the use of renewable sources. Key topics covered include fabrication of nanomaterials using green techniques as well as their properties and applications, the use of renewable sources to obtain nanomaterials of different classes, from simple metal and metal oxide nanoparticles to complex bioinspired nanomaterials, economic contributions of nanotechnology to green and sustainable growth, and more. This is an ideal book for students, lecturers, researchers and engineers dealing with versatile (mainly chemical, biological, and medical) aspects of nanotechnology,

including fabrication of nanomaterials using green techniques and their properties and applications.

The author of eight New York Times bestsellers, Ann Rule first won nationwide acclaim with *The Stranger Beside Me*, about serial killer Ted Bundy. Her Crime Files volumes, based on fascinating case histories, have assured her reputation as our premier chronicler of crime. Now the former Seattle policewoman brings us the horrific account of a charismatic man adored by

beautiful and brilliant women who always gave him what he wanted...sex, money, their very lives.... When attorney Cheryl Keeton's brutally bludgeoned body was found in her van in the fast lane of an Oregon freeway, her husband, Brad Cunningham, was the likely suspect. But there was no solid evidence linking him to the crime. He married again, for the fifth time, and his stunning new wife, a physician named Sara, adopted his three sons. They all settled down to family life on a luxurious estate. But gradually, their marriage became a nightmare.... In this gripping account of Cheryl's murder, Ann Rule takes us from Brad's troubled boyhood to one of the most bizarre trials in legal history, uncovering multiple marriages, financial manipulations, infidelities, and

monstrous acts of harassment and revenge along the way. Dead By Sunset is Ann Rule at her riveting best.

The volumes of this classic series, now referred to simply as "Zechmeister" after its founder, L. Zechmeister, have appeared under the Springer imprint ever since the series was founded in 1938. The volumes contain contributions on various topics related to the origin, distribution, chemistry, synthesis, biochemistry, function or use of various

classes of naturally occurring substances ranging from small molecules to biopolymers. Each contribution is written by a recognized authority in his field and provides a comprehensive and up-to-date review of the topic in question.

Addressed to biologists, technologists and chemists alike, the series can be used by the expert as a source of information and literature citations and by the non-expert as a means of orientation in a rapidly developing discipline.

Using the ecosystem concept as his starting point, the author examines the complex relationship between premodern armed forces and their environment at three levels: landscapes,

living beings, and diseases. The study focuses on Europe's Meuse Region, well-known among historians of war as a battleground between France and Germany. By analyzing soldiers' long-term interactions with nature, this book engages with current debates about the ecological impact of the military, and provides new impetus for contemporary armed forces to make greater effort to reduce their environmental footprint. *BCIRA Abstracts of Foundry Literature* Springer

In his last essay just weeks before his death at the age of 91, David S. Nivison says, "Breaking into a formal system - such as a chronology - must be like breaking into a code. If you are successful, success will show right off." Since the late 1970's Nivison has

focused his scholarship on breaking the code of Three Dynasties (Xia, Shang, Zhou) chronology by establishing an innovative methodology based on mourning periods, astronomical phenomenon, and numerical manipulations derived from them. Nivison is most readily known in the field for revising (and then revising again) the date of the Zhou conquest of Shang, and for his theory that Western Zhou kings employed two calendars (His so-called "Two yuan" theory), the second being set in effect upon the death of the new king's predecessor and counted from the completion of post-mourning rites for him (i.e., a "second 'first' year"). Nivison's enabling discovery that the Bamboo Annals (BA) had a historical basis was initially designed to make

Wang Guowei's analysis of lunar phase terms (the so-called "Four quarter" theory that separated each month into four quarters) work for Western Zhou bronze inscriptions. In order to do so he had to assume that some inscriptions used a second yuan counted from completion of mourning. The king's death was the most important event late in a reign, so this implied that a king's reign-of-record was normally counted from the second yuan, omitting initial mourning years. It follows that when the unexpressed mourning years are forgotten (or edited out) but the dates of the beginning and end of the dynasty are still known, the remaining reigns-of-record cluster toward the beginning and end, and a reign in the middle is enlarged. Problems, ideas, and solutions

like the one described above are found throughout this new collection of important works on chronology, astronomy, and historiography. Income Averaging Springer Science & Business Media  
Past Glacial Environments, Second Edition, presents a revised and updated version of the very successful first edition of Menzies' book, covering a breadth of topics with a focus on the recognition and analysis of former glacial environments, including the pre-Quaternary glaciations. The book is made up of chapters written by various geological experts from across the world, with the editor's expertise and experience bringing the chapters together. This new and updated volume includes at least 45% new material,

along with five new chapters that include a section on techniques and methods. Additionally, this new edition is presented in full color and features a large collection of photographs, line diagrams, and tables with examples of glacial environments and landscapes that are drawn from a worldwide perspective. Informative knowledge boxes and case studies are included, helping users better understand critical issues and ideas. Provides the most complete reference concerning the study of glacial processes and their geological, sedimentological, and geomorphological products. Comprised of chapters written by various geological experts from across the world. Includes specific case studies to alert readers to important ideas and issues. Uses text boxes

throughout to explain key concepts from glacial literature. Presents full color photographs, line diagrams, and tables throughout.

 Part A: Structure and Mechanisms  
 Springer Science & Business Media

*Environment, Trade and Society in Southeast Asia* Information Gatekeepers Inc

The two-part, fifth edition of *Advanced Organic Chemistry* has been substantially revised and reorganized for greater clarity. The material has been updated to reflect advances in the field since the previous edition, especially in computational chemistry. Part A covers fundamental structural topics and basic mechanistic types. It can stand-alone; together, with Part B: *Reaction and Synthesis*, the two volumes provide a comprehensive foundation for the study in organic chemistry. Companion websites provide digital models for study of structure, reaction and selectivity for students and exercise solutions for instructors.

*General Information, General Index*

This book suggests that the history and theory of Israeli foreign policy challenge many of the popular assumptions of American grand strategy theory. Focusing on the tenure of Prime Minister Menachem Begin (1977-83), this study suggests why Israeli foreign relations are conceptually distinct from many of grand strategy's core assumptions. This monograph contains an appendix which contemplates how the idea of an American "Offshore Balancer" grand strategy might impact Israel and how Israeli history might challenge many paradigms that its proponents use to look at the world.

*The J. Paul Getty Museum Journal*

The J. Paul Getty Museum Journal has been published annually since 1974. It

contains scholarly articles and shorter notes pertaining to objects in the Museum's seven curatorial departments: Antiquities, Manuscripts, Paintings, Drawings, Decorative Arts, Sculpture and Works of Art, and Photographs. The Journal also contains an illustrated checklist of the Museum's acquisitions for the previous year, a staff listing, and a statement by the Museum's Director outlining the year's most important

activities. Volume 19 of the J. Paul Getty Museum Journal includes articles by Nicholas Penny, Ariane van Suchtelen, Thomas DaCosta Kaufmann and Virginia Roehrig Kaufmann, Frits Scholten, David Harris Cohen, and Dawson W. Carr.
