No one knows how to have fun like kids

do. But sometimes, even kids can use some fresh ideas for finding the fun in their lives. Fun is everywhere, and with this charmingly illustrated children's book, Annie F. Downs wants to help children ages 3 to 8 find it! Can it be found in science experiments, at the farmer's market, or in the kitchen? Yes! Can it be found on rainy days and starlit nights? You bet! Can it be found with friends or parents or even annoying little brothers? Of course! It's no secret that the world has felt a little less fun lately. What Sounds Fun to You? is the perfect book to get kids thinking about how to create their own fun right where they are, right now. And it's the perfect companion for parents who have run out of ideas!

The uniquely prominent role of French intellectuals in European cultural and political life following World War II is the focus of Tony Judt's newest book. He analyzes this intellectual community's most divisive conflicts: how to respond to the promise and the betrayal of Communism and how to sustain a commitment to radical ideals when confronting the hypocrisy in Stalin's Soviet Union, in the new Eastern European Communist states, and in France itself. Judt shows why this was an all-consuming moral dilemma to a generation of French men and women, how their responses were conditioned by war and occupation, and how post-war political choices have come to sit uneasily on the conscience of later generations of French intellectuals. Judt's analysis extends beyond the writings of fashionable "Existentialist" personalities such as Jean-Paul Sartre, Albert Camus, and Simone de Beauvoir to include a wide intellectual community of Catholic

philosophers, non-aligned journalists, literary critics and poets, Communist and non-Communist alike. Judt treats the intellectual dilemmas of the postwar years as an unfinished history. French intellectuals have not fully come to terms with the gnawing sense of what Judt calls the "moral irresponsibility" of those years. The result, he suggests, is a legacy of bad faith and confusion that has damaged France's cultural standing, notably in newly liberated Eastern Europe, and which reflects the nation's larger difficulty in confronting its own ambivalent past.

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course

represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, *Concepts of Biology* is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of *Concepts of Biology* is that instructors can customize the book, adapting it to the approach that works best in their classroom. *Concepts of Biology* also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

Fun Retrospectives is a book with the necessary tools to develop the main element of continuous improvement: an effective, committed team! With several years working with agile teams, Paulo Caroli and Tainã Caetano Coimbra know there are two main ingredients to finding the path to success and continuous improvement. First, a team that is aligned and committed to the project. Second, a work environment that fosters collaboration, one in which everyone can

openly reflect, debate, and learn. But how can we achieve that? Each person in a team brings a different life experience and perspective, and we know that a group of people doesn't become a team overnight. That's why the main purpose of this work is to offer the necessary activities and tools to make everyone comfortable, aligned, and ready to be part of the best possible experience. The authors have gathered years of experience in this book, offering simple and straightforward activities. There will always be ups and downs, but everything that happens is essential for the team's growth, and a fun, safe environment allows you to get the best out of every situation.

 Some people lost their sense of proportion, others their sense of scale, but Simon Dykes, a middle-aged, successful London painter, has lost his sense of perspective in a most disturbing fashion. After a night of routine, pedestrian debauchery, traipsing from toilet to toilet, and imbibing a host of narcotics on the way, Simon wakes up cuddled in his girlfriend's loving arms. Much to his dismay, however, his girlfriend has turned into a chimpanzee. To add insult to injury, the psychiatric crash team sent to deal with him as he

flips his lid is also comprised of chimps. Indeed, the entire city is overrun by clever primates, who, when they are not jostling for position, grooming themselves, or mating some of the females, can be found driving Volvos, hanging out on street corners, and running the world. Nonetheless convinced that he is still a human, Simon is confined to the emergency psychiatric ward of Charing Cross Hospital, where he becomes the patient of Dr. Zack Busner, clinical psychologist, medical doctor, anti-psychiatrist, and former television personality—an expert at the height of his reign as alpha male. As Busner attempts to convince him that “everyone who is fully sentient in this world are chimpanzees,” Simon struggles with the horrifying delusion that he is really a human trapped in a chimp’s body. Written with the same brilliant satiric wit that has distinguished Self’s earlier fiction, *Great Apes* is a hilarious, often disturbing, and absolutely original take on man’s place in the evolutionary chain. In a strange and twisted tale that recalls Jonathan Swift and Franz Kafka’s *Metamorphosis*, Will Self’s comic genius is impossible to ignore.

A New York Times Bestseller • A Read with Jenna Today Show Book Club Pick! Named a Best Book of the Year by The New York Times Book Review, The Washington Post, People, Entertainment Weekly, USA Today, TIME, The A.V. Club, BuzzFeed, and PopSugar “I can’t believe how good this book is.... It’s wholly original. It’s also perfect.... Wilson writes with such a light touch.... The brilliance of the novel [is] that it distracts you with these weirdo characters and mesmerizing and funny sentences and then hits you in a way you didn’t see coming. You’re laughing so hard you don’t even realize that you’ve suddenly caught fire.” —Taffy Brodesser-Akner, author of *Fleishman is in Trouble*, New York Times Book Review From the New York Times bestselling author of *The Family Fang*, a moving and uproarious novel about a woman who finds meaning in her life when she begins caring for two children with a remarkable ability. Lillian and Madison were unlikely roommates

and yet inseparable friends at their elite boarding school. But then Lillian had to leave the school unexpectedly in the wake of a scandal and they've barely spoken since. Until now, when Lillian gets a letter from Madison pleading for her help. Madison's twin stepkids are moving in with her family and she wants Lillian to be their caretaker. However, there's a catch: the twins spontaneously combust when they get agitated, flames igniting from their skin in a startling but beautiful way. Lillian is convinced Madison is pulling her leg, but it's the truth. Thinking of her dead-end life at home, the life that has consistently disappointed her, Lillian figures she has nothing to lose. Over the course of one humid, demanding summer, Lillian and the twins learn to trust each other—and stay cool—while also staying out of the way of Madison's buttoned-up politician husband. Surprised by her own ingenuity yet unused to the intense feelings of protectiveness she feels for them, Lillian ultimately begins to accept that she needs these strange children as much as they need her—urgently and fiercely. Couldn't this be the start of the amazing life she'd always hoped for? With white-hot wit and a big, tender heart, Kevin Wilson has written his best book yet—a most unusual story of parental love.

The Book of Dave is Booker-shortlisted author Will Self's dazzling sixth novel. What if a demented London cabbie called Dave Rudman wrote a book to his estranged son to give him some fatherly advice? What if that book was buried in Hampstead and hundreds of years later, when rising sea levels have put London underwater, spawned a religion? What if one man decided to question life according to Dave? And what if Dave had indeed made a mistake? Shuttling between the recent past and a far-off future where England is terribly altered, The Book of Dave is a strange and troubling mirror held up to our times: disturbing, satirizing and vilifying who and what we think we are. At once a meditation upon the nature of received religion, a love story, a caustic satire of contemporary urban life and a historical detective story set in the far future - this compulsive novel will be enjoyed by readers everywhere, including fans of Martin Amis and Anthony Burgess's *A Clockwork Orange*. 'Vivid, visceral and breathtakingly ambitious, this is Self's best yet' GQ 'Mindboggling ... darkly hilarious ... A fascinating book' Evening Standard Will Self is the author of nine novels including *Cock and Bull*; *My Idea of Fun*; *Great Apes*; *How the Dead Live*; *Dorian, an Imitation*; *The Book of Dave*; *The Butt*; *Walking to Hollywood* and *Umbrella*, which was shortlisted for the Man Booker Prize. He has written five collections of shorter fiction and three novellas: *The Quantity Theory of Insanity*; *Grey Area*; *License to Hug*; *The*

Sweet Smell of Psychosis; *Design Faults in the Volvo 760 Turbo*; *Tough, Tough Toys for Tough, Tough Boys*; *Dr. Mukti and Other Tales of Woe and Liver: A Fictional Organ with a Surface Anatomy of Four Lobes*. Self has also compiled a number of nonfiction works, including *The Undivided Self: Selected Stories*; *Junk Mail*; *Perfidious Man*; *Sore Sites*; *Feeding Frenzy*; *Psychogeography*; *Psycho Too* and *The Unbearable Lightness of Being a Prawn Cracker*.
