Children Affected by Armed Conflict

Springer

'...effectively fills a long-standing void
and will no doubt be hailed as a much-

needed new addition to the literature... This text very much exemplifies the strength of Ho-Won Jeong as a theorist and one of the more prolific writers in the larger peace and conflict studies field... the final three chapters on 'De-escalation Dynamics' (which includes a brief section on third party intervention), on 'Conciliation Strategies,' and especially the one on 'Ending Conflict,' which provides a range of outcomes beyond the usual focus on third party intervention (read mediation) epitomizes the value of this new text' - Journal of Peace Research '...an awesome tour d'horizon of modern war, violence, and confrontation within and between nations. Illustrating via just about every conflict in every corner of the world, the author invokes an endless array of

insights and interpretations, ranging from the micro to the macro, beautifully written in a seamless sequence of closely linked and discursive essays.' - Professor J. David Singer, University of Michigan 'Ho-Won Jeong has written an illuminating analysis of the dynamics of conflict. He lays out the tools we have to analyze conflict in a literate and comprehensive way. A valuable book for anyone interested in a more comprehensive understanding of conflict, its sources, and its deescalation and termination' - Janice Gross Stein, Belzberg Professor of Conflict Management, Director, Munk Centre for International Studies, University of Toronto 'Jeong has successfully combined behavioral and structural analysis of the dynamics of social

conflict. This volume covers the multiple dimensions - escalation, entrapment, de-escalation, termination, and resolution - both of violent and non-violent confrontation between adversaries, as well as the utility and limitations of external intervention. For students of the social sciences, it should serve as an excellent introduction to the complex realities of social conflict.' - Milton Esman, John S. Knight Professor of International Studies, Emeritus, Cornell University By examining the dynamic forces which shape and re-shape major conflicts, this timely book provides students with the knowledge base needed to successfully study conflict sources, processes and transformations. Broad in focus, it addresses the multiple social, political and psychological

features central to understanding conflict situations and behaviour. A range of both recent and historical examples (including the Arab-Israeli conflict, the 'War on Terrorism', the Cold War, and the civil wars in Sudan, former Yugoslavia and Sri Lanka) are discussed, illustrating the application of concepts and theories essential to the analysis of inter-group, inter-state and intra-state conflict and conflict resolution in a wider context. Understanding Conflict and Conflict Analysis is key reading for students of international relations, peace and conflict studies, conflict resolution, international security and international law.

Explaining Collective Violence in Contemporary Indonesia Springer

This publication provides an overview of

key definitions, components and concepts of political settlements, based on existing literature. It also examines the potential impact of donor activities on political settlements and highlights possible implications for donor engagement and support.

Understanding Civil War: Africa

Routledge

Over the past decade, a new awareness of the relationship between conflicts and development has grown. Developmental factors can act as a trigger for violence, as well as for ending violence and for triggering post-conflict reconstruction. This book explores the complexity of the links between violent conflict (usually civil wars) and development, under-development and uneven development. It emphasizes the connections between

stable developed economies and civil wars in other parts of the world, and examines how structural factors (such as the organization of the global economy) virtually condemn some regions to conflict and under-development. This valuable introductory text explains, reviews and critically evaluates this complex relationship. It focuses on intra-state conflicts and complex political emergencies that combine transnational and internal characteristics. Attention is also given to inter-state conflicts. Chapters emphasize how the relationship between conflict and development traverses many scales (macro, meso and micro) and dimensions (economic, political and cultural). Furthermore it explains how different developmental challenges and

opportunities emerge along the full life-cycle of conflict. Specifically, the role of poverty, state, market, civil society, globalization, humanitarian aid, refuges, gender and health within conflict dynamics are examined. The book also investigates specific developmental issues emerging during conflict management and post conflict reconstruction. Both authors have a background in conducting research in deeply divided societies, and argue that many of the processes connected with war and peace making deliberately write people out of the equation. This book attempts to 'write people in'. By drawing on contemporary theoretical debates and examining current policies and events, the text unpacks the difficult and complex aspects of the relationships

between armed conflict and development and makes them accessible, interesting and policy relevant. It considers how peace making, peace building, and post-war reconstruction are usually more sustainable and successful if politicians, policy makers, entrepreneurs and those working for international NGOs take on board local opinion and capacity. Written in an accessible style, the book considers the main contemporary theories and arguments on conflict, development and the interactions between the two. The text is illuminated throughout with case studies drawn from Africa, the Balkans, Asia and the Middle East.

Urban Africa and Violent Conflict Indiana University Press (Ips)

This publication is part of a two volume set which builds upon previous World Bank research into the causes and characteristics of civil war onset, particularly the model developed by Paul Collier and Anke Hoeffler regarding the relationship between violent political conflict and economic development. This volume considers the variables identified in the Collier-Hoeffler model and applies them to a set of case studies from a range of African countries, and then goes on to trace the process of conflict escalation in order to draw conclusions as to why civil war is likely to occur. The publication seeks to advance theoretical and empirical knowledge of civil war, in order to help further the objective of developing appropriate policy interventions. Another volume with case

studies from a range of non-African countries is available separately (ISBN 0821360493).

International Perspectives on Youth Conflict and Development Columbia University Press

Interparental Conflict and Child Development provides an in-depth analysis of the rapidly expanding body of research on the impact of interparental conflict on children. Emphasizing developmental and family systems perspectives, it investigates a range of important issues, including the processes by which exposure to conflict may lead to child maladjustment, the role of gender and ethnicity in understanding the effects of conflict, the influence of conflict on parent-child, sibling, and peer relations, family

violence, and interparental conflict in divorced and step-families.

Understanding Conflict and Violence

Routledge

Urban centres are at the heart of the dynamics of war and peace, of stability and violence: as 'safe havens' for those seeking protection, as concentrations of public administrative and military apparatus, and as symbolic bases of state sovereignty and public authority. Heavy fighting in South Sudan's capital city of Juba, post electoral protests and brutal killings in Bujumbura, Burundi, and violent urban uprisings in Congo's cities of Goma and Kinshasa, all demonstrate that cities represent critical arenas in African conflict and post-conflict dynamics. This comprehensive volume offers a profound analysis of the

complex relationship between the dynamics of violent conflict and urbanisation in Central and Eastern Africa. The authors underline the need to look simultaneously at cities to understand ongoing conflict and violence, and at conflict-dynamics to understand current urbanisation processes in this part of the world. Building on empirical and analytical insights from cities in Uganda, Rwanda, Burundi, DR Congo, South Sudan and Kenya, this collection demonstrates how emerging urbanism in the larger Great-Lakes region and its Eastern neighbours presents a fascinating window to investigate the transformative power of protracted violent conflict. This book was originally published as a special issue of the Journal of Eastern African Studies.

Conflict, Violence and Peace OECD Publishing

Research carried out by the World Bank on the root causes of conflict and civil war finds that a developing country's economic dependence on natural resources or other primary commodities is strongly associated with the risk level for violent conflict. This book brings together a collection of reports and case studies that explore what the international community in particular can do to reduce this risk.; The text explains the links between natural resources and conflict and examines the impact of resource dependence on economic performance, governance, secessionist movements and rebel financing. It then explores avenues for international action - from financial and

resource reporting procedures and policy recommendations to commodity tracking systems and enforcement instruments, including sanctions, certification requirements, aid conditionality, legislative and judicial instruments.

Conflict and Fragility Preventing Violence, War and State Collapse The Future of Conflict Early Warning and Response Routledge

The world is getting more violent, and violence is occurring in surprising places. Over the past 15 years, 3.34 billion people, or almost half of the world's population, have been affected by violence. The number of violent conflicts is decreasing, but conflicts are killing more people: ...

Children and Peace OECD Publishing
This book examines and interprets a

wide range of approaches to the causes of violence and conflict. The causes of violence and conflict are often left untheorized, or they are discussed as an existent problem assumed to be an inevitable part of human interaction. Adopting an accessible approach, this volume presents readers with a clear understanding of the causes of violence and conflict by highlighting their evolutionary roots and illustrating them with in-depth case studies and examples. Tim Jacoby addresses the fragmented nature of the literature on conflict theory by drawing upon a wide range of disciplinary traditions, seeking to reflect the fact that international relations, history, economics, development, politics and sociology all share a long-standing interest in the

study of conflict and violence and that common concerns make interdisciplinary stimulating and productive.

Understanding Conflict & Violence will be of interest to students and scholars across the disciplines of international relations, history, economics, development, politics and sociology.

The Conflict Helix Oxford University Press

Violence in Developing Countries forges an alternative understanding of how violence shapes a globalizing society.

Conflict, Violent Extremism and Development Springer

This open access book brings together discourse on children and peace from the 15th International Symposium on the Contributions of Psychology to Peace, covering issues pertinent to children and

peace and approaches to making their world safer, fairer and more sustainable. The book is divided into nine sections that examine traditional themes (social construction and deconstruction of diversity, intergenerational transitions and memories of war, and multiculturalism), as well as contemporary issues such as Europe's "migration crisis", radicalization and violent extremism, and violence in families, schools and communities. Chapters contextualize each issue within specific social ecological frameworks in order to reflect on the multiplicity of influences that affect different outcomes and to discuss how the findings can be applied in different contexts. The volume also provides solutions and hope through its focus on youth empowerment and

peacebuilding programs for children and families. This forward-thinking volume offers a multitude of views, approaches, and strategies for research and activism drawn from peace psychology scholars and United Nations researchers and practitioners. This book's multi-layered emphasis on context, structural determinants of peace and conflict, and use of research for action towards social cohesion for children and youth has not been brought together in other peace psychology literature to the same extent. *Children and Peace: From Research to Action* will be a useful resource for peace psychology academics and students, as well as social and developmental psychology academics and students, peace and development practitioners and activists,

policy makers who need to make decisions about the matters covered in the book, child rights advocates and members of multilateral organizations such as the UN.

Peace and Conflict 2016 Routledge
The Syrian refugee crisis has galvanized attention to one of the world's foremost challenges: forced displacement. The total number of refugees and internally displaced persons, now at over 65 million, continues to grow as violent conflict spikes. This report, *Forcibly Displaced: Toward a Development Approach Supporting Refugees, the Internally Displaced, and Their Hosts*, produced in close partnership with the United Nations High Commissioner for Refugees (UNHCR), attempts to sort fact from fiction to better understand the

scope of the challenge and encourage new thinking from a socioeconomic perspective. The report depicts the reality of forced displacement as a developing world crisis with implications for sustainable growth: 95 percent of the displaced live in developing countries and over half are in displacement for more than four years. To help the displaced, the report suggests ways to rebuild their lives with dignity through development support, focusing on their vulnerabilities such as loss of assets and lack of legal rights and opportunities. It also examines how to help host communities that need to manage the sudden arrival of large numbers of displaced people and that are under pressure to expand services, create jobs, and address long-standing development

issues. Critical to this response is collective action. As work on a new Global Compact on Responsibility Sharing for Refugees progresses, the report underscores the importance of humanitarian and development communities working together in complementary ways to support countries throughout the crisis from strengthening resilience and preparedness at the onset to creating lasting solutions.

When Violence Works Springer
Societal turbulence, state collapse, religious and ethnic conflict, poverty, hunger, and social exclusion all underlie children's involvement in armed conflict. Drawing from empirical studies in eleven conflict-ridden countries, including Pakistan, Sri Lanka, Thailand, Colombia,

Uganda, Palestine, Somalia, Liberia, Sierra Leone, Sudan, and South Sudan, *Children Affected by Armed Conflict* crosses cultures and contexts to capture a range of perspectives on the realities of armed conflict and its aftermath for children. *Children Affected by Armed Conflict* upends traditional views by emphasizing the experience of girls as well as boys, the unique social and contextual backgrounds of war-affected children, and the resilience and agency such children often display. Including children who are victims of, participants in, and witnesses to armed conflict in their analyses, the contributors to this volume highlight innovative methodologies that directly involve war-affected children in the research process. This validates the perspectives

of children and ensures more effective outcomes in postwar reintegration and recovery. Deficits-based models do not account for the realities many war-affected children face. The alternative approaches presented in this edited collection—which acknowledge the realities of both trauma and resilience—aim to generate more effective policies and intervention strategies in the face of a growing global public health crisis.

Forcibly Displaced Springer

The volume aims to shift the foundation of youth conflict study from the more typical focus on maturation, behavior, and personality to a characterization of youth as participants in society. It also expands the analysis of youth development to include societal

problems such as political instability, unequal access to material resources, racism, and social injustice. Offering new insights about the interdependent spheres of conflict involving young people, this groundbreaking, international compilation describes processes of a violent world rather than of violent youth.

Conflict and Development OECD
Publishing

Several regions of the world are characterized by persistent internal conflict and deeply rooted structures of violence. This work explores why domestic and international efforts to re-establish order, human security, democratic processes, and a developing economy are proving difficult to achieve. Violence in Developing Countries

Routledge

Violent conflict and its aftermath are pressing problems, particularly for international development initiatives. However, the results of development in conflict contexts have generally been disappointing and their preventative potential thus questionable. Available Open Access, *Lives Amid Violence* argues that this is because practitioners adhere to a mental model that emphasises linearity, certainty, and causality, assuming that violence is best addressed through work plans that deliver state-building, stabilisation and services. Based on ten years of multi-method research from, in, and on conflict-affected countries, this book challenges this approach. Drawing on a significant collaborative body of

scholarship, this work puts forward original and generalizable conclusions about how lives amid violence persist, offering an invitation to abandon restricting mental models and to embrace creative ways of thinking and working. These include paying attention to the long-term effects of conflict on individual behaviour and decision-making, the social realities of economic life, the role service delivery plays in negotiations between citizens and states, and to creating meaningful relationships. Transformation also requires reflection and therefore the book concludes with constructive suggestions on how to practice these insights to better support those whose lives are shaped by violence. More details are available at

www.transformingdevelopment.org The eBook editions of this book are available open access under a CC BY-NC-ND 3.0 licence on bloomsburycollections.com. *Conflict and Fragility Armed Violence Reduction Enabling Development* African Books Collective

Tadjoeddin uniquely explores four types of violent conflicts pertinent to contemporary Indonesia (secessionist, ethnic, routine-everyday and electoral violence), and seeks to discover what socio-economic development can do to overcome conflict and make the country's transition to democracy safe for its constituencies.

[DAC Guidelines and Reference Series Supporting Statebuilding in Situations of Conflict and Fragility Policy Guidance](#)
World Bank Publications

This volume critically interrogates, from different angles and dimensions, the resilience of conflict and violence into 21st century Africa. The demise of European colonial administration in Africa in the 1960s wielded fervent hope for enduring peace for the people of Africa. Regrettably, conflict alongside violence in all its dimensions physical, religious, political, psychological and structural remain unabated and occupy central stage in contemporary Africa. The resilience of conflict and violence on the continental scene invokes unsettling memories of the past while negatively influencing the present and future of crafting inclusive citizenship and statehood. The book provides fresh insightful ethnographic and intellectual material for rethinking violence and

conflict, and for fostering long-lasting peace and political justice on the continent and beyond. With its penetrating focus on conflict and associated trajectories of violence in Africa, the book is an inestimable asset for conflict management practitioners, political scientists, historians, civil society activists and leaders in economics and politics as well as all those interested in the affairs of Africa.

Violence Explained World Bank Publications

During the 1990s the drive of liberal peace efforts in the form of humanitarian intervention transformed the ways in which traditional development assistance operated in war and post-war situations. From Somalia and Rwanda to Bosnia and Sri Lanka, conflict, security

and development became more intertwined as more integrated programmes and interventions were advocated by the international community. Conflict and Development, whilst serving as an in-depth introduction to key themes and context, questions the extent to which international aid has over-reached in seeking to engage more centrally in addressing the causes and consequences of violent conflict. Using this framework, the author traces the evolution of the conflict and development agenda and explores the politics of aid and policymaking in relation to international conflict. By taking a combined approach of theory, policy and practice this vital new book explores and comprehensively explains

the impact of conflict on development and vice-versa through the series of concise thematic chapters.

Natural Resources and Violent Conflict Routledge

This edited volume examines the implications for international development actors of new kinds of terrorism taking place in civil conflicts. The threat from terrorism and violent extremism has never been greater – at least in the global South where the vast majority of violent extremist attacks take place. Some of the most violent extremist groups are also parties to civil conflicts in regions such as the Middle East and the Horn of Africa. But are

these groups – especially the violent Islamists which constitute the greatest current threat – qualitatively different from other conflict actors? If they are, what are the implications for development practitioners working in war zones and fragile or poverty-afflicted countries? This study aims to answer these questions through a combination of theoretical enquiry and the investigation of three case studies – Kenya, Nigeria, and Iraq/Syria. It aims to illuminate the differences between violent Islamists and other types of conflict actor, to identify the challenges these groups pose to development practice, and to propose a way forward for meeting these challenges.
