INCOME TAX LAW & ACCOUNTS (Assessment Year 2020-21) BPP Learning Media

This book offers a critical analysis of core concepts that have influenced contemporary conversations about environment-society relations in academic, political, and civil circles. Considering these conceptualizations are currently shaping responses to environmental crises in fundamental ways, critical reflections on concepts such as the Anthropocene, metabolism, risk, resilience, environmental governance, environmental justice and others, are well-warranted. Contributors to this volume, working across a multitude of areas within environmental social science, scrutinize underlying worldviews and assumptions, asking a common set of key questions: What are the different concepts able to explain? How do they take into account society-environment relations? What social, cultural, or geo-political biases and blinders are inherent? What actions or practices do the concepts inspire? The transdisciplinary engagement and reflexivity regarding concepts of environment-society relations represented in these chapters is needed in all spheres of society—in academia, policy and practice—not the least to confront current tendencies of anti-reflexivity and denialism.

Taxation The word tax is based on the Latin word 'Taxo' which means to estimate. Tax means to impose a financial charge or other levy upon a taxpayer on an individual or legal entity by a state or

the functional equivalent of a state such that failure to pay is punishable by law. It is imposition of compulsory levies on individuals or entities by government. Taxes are levied in almost every country of the world, primarily to raise revenue for government expenditures, although they also serve other purposes as well. In modern economies taxes are the most important source of government revenue. Taxes differ from other sources of revenue in that they are compulsory levies and are unrequited—i.e., they are generally not paid in exchange for some specific thing, such as a particular public service, the sale of public property, or the issuance of public debt. While taxes are presumably collected for the welfare of taxpayers as a whole, the individual taxpayer's liability is independent of any specific benefit received.

This volume explores corporate governance from three perspectives: a traditional economic, a philosophical, and an integrated business ethics perspective. Corporate governance has enjoyed a long tradition in the English-speaking world of management sciences. Following its traditional understanding it is defined as leadership and control of a firm with the aim of securing the long-term survival and viability of that firm. But recent business scandals and financial crises continue to provide ample cause for concern and have all fuelled interest in the ethical aspects. As a result, corporate governance has been criticized by many social groups. Economic sciences have failed to provide a clear definition of the corporate governance concept. Complexity increases if we embed the economic approach of corporate governance in a philosophical context. This book seeks to define the concept by examining its economic, philosophical and business ethics foundations.

A Journey through the Jeevitha Nauka by Haridasan T.M., narrates his experiences in life and brings out the importance of the nature driven and man-made evolution of the generation gap and the consequent cultural variations in human life. These changes are essential for our development, and to make this development sustainable, humanity should be ready at different age levels to make self-generated reforms in their mindsets and lifestyles. The author attempts to reveal how he made his experiments to approach this goal. From non-electrified dwelling in a rural hamlet, his journey to his present day life in a modern apartment in a bustling city met many rough and smooth paths. The various roles in his life, as a child, a dutiful son, a loving husband and father, along with being an affectionate grandparent in the home front, and as a student, teacher, researcher, administrator, social reformer and scientific consultant in the professional front gave him an opportunity to become a humane human being and responsible citizen. His revelations, it is hoped, would generate a sense of a rededication in our youth for shaping a glowing harmonious society.
