A history of the Korean War with soldier's-eye views from both sides, by the Pulitzer Prize-winning author of *The Rising Sun and Infamy*. Pulitzer Prize-winning author John Toland reports on the Korean War in a revolutionary way in this thoroughly researched and riveting book. Toland pored over military archives and was the first person to gain access to previously undisclosed Chinese records, which

allowed him to investigate Chairman Mao's direct involvement in the conflict. Toland supplements his captivating history with in-depth interviews with more than two hundred American soldiers, as well as North Korean, South Korean, and Chinese combatants, plus dozens of poignant photographs, bringing those who fought to vivid life and honoring the memory of those lost. *In Mortal Combat* is comprehensive in its discussion of events deemed controversial, such as American brutality against Korean civilians and allegations of American use of biological warfare. Toland tells the dramatic account of the Korean War from start to finish, from the appalling experience of its POWs to Mao's prediction of MacArthur's Inchon invasion. Toland's account of the "forgotten war" is a must-read for any history aficionado.

But behind the sparkle of the diamond lies a murkier story, in which rebel armies in Angola, Sierra Leone and the Congo turned to diamonds to finance their wars. Completely unregulated, so-called blood diamonds became the perfect tool for money laundering, tax evasion, drug-running and

weapons-trafficking. Diamonds brings together for the first time all aspects of the diamond industry. In it, Ian Smillie, former UN Security Council investigator and leading figure in the blood diamonds campaign, offers a comprehensive analysis of the history and structure of today's diamond trade, the struggle for effective regulation and the challenges ahead. There is, he argues, greater diversification and competition than ever before, but thanks to the success of the Kimberley Process, this coveted and prestigious gem now represents a fragile but renewed opportunity for development in some of the world's poorest nations. This part of the diamond story has rarely been told.

Kuf Publishing, Incorporated XML is rapidly becoming the standard platform for delivering e-Business information and integrating e-Business systems. XML developers desperately need mature software development processes and tools for developing effective applications. David Carlson fills the gap, showing exactly how to leverage the worldwide UML standard for modeling complex systems in advanced XML development. In *Modeling XML Applications with UML*, he presents the first comprehensive framework for modeling communications in any B2B software system. Carlson presents in-depth coverage of UML-based analysis, design, and modeling of XML content within e-Business environments. The book includes detailed coverage of using UML to support the creation of new XML-based B2B vocabularies and industry portals that reflect the requirements of several key stakeholder communities, including consumers, business analysts, web application specialists, system integration specialists, and content developers.

Carlson presents several B2B use cases, and then decomposes them into scenarios illustrated with class diagrams, sequence diagrams, and activity diagrams showing how XML fits into an overall e-Business solution. Each chapter concludes with "steps for success" that distill UML's general principles into specific recommendations for action.

New York Times bestselling author Patti Callahan Henry delivers a novel that explores the power of lasting love through the connected stories of two women from opposite sides of the sea. Twenty-seven-year-old Kara Larson is bogged down in the stress of planning her elaborate wedding to a professional golfer. Still, to fulfill the requirements of the Palmetto Pointe Junior Society, she makes time in her busy schedule to visit an elderly woman at a nursing home facility. Soon she finds herself mesmerized by the singsong Irish lilt of ninety-six-year-old Maeve

Mahoney as Maeve recounts the rambling story of her first love back in Ireland. Or, Kara begins to wonder, is she really retelling an ancient tale of myth and legend? Waiting for the story to unfold in bits and pieces, and trying to discern the underlying truth, Kara is drawn in—and driven to remember her own first love: childhood neighbor Jack Sullivan. Gradually she realizes that before she embarks on her new life, she must find out how her own story—with Jack—will end. “About all the things that make us worthy as human beings—integrity, honesty, and living the life you are meant to live....A triumph!”—Dorothea Benton Frank “A passionate, unforgettable novel of self-discovery, regret, and the illuminating power of love.”—Mary Alice Monroe

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it

pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war.

When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.
