In Patching Development, Rajesh Veeraraghavan reports on a relatively positive case study of developing in India, shedding new light on the challenges and benefits of using information and technology to effectively reach marginalized citizens. The book argues that holding the state accountable for achieving the goals of a program requires a continuous series of responses that react to local implementation and information, a process of patching development. This involves altering power equations through attention to small, incremental changes in institutions and technology, documents and other processes. While each patch may have only limited local significance, the cumulative impact can potentially transform state-society relations.

Krishna district which derives its name from the famous river Krishna, is one of the nine districts of Coastal Andhra Pradesh and harbours a rich and varied flora. A total of 805 species of angiosperms

and Pteridophytes belonging to 479 genera and 128 families have been enumerated. Introduction, past and present work on the flora of the district, general vegetation types, floristic analysis and artificial key to families are provided in the first part. The second part includes systematic enumeration.

This volume traces archaeological research undertaken in Andhra Pradesh going back to the nineteenth century when the cultures of the region were explored and documented. In the 1950s, scholars conducted culture-historic research across the physiographical regions of Andhra Pradesh, following trends in India and Old World. 1970s saw a shift from the historic approach to the development of models for the contextual study of sites, and the explanation of the archaeological record in terms of the adaptive behaviour of past societies.

**Ethnicity & Regionalism in Indian State** Routledge

This book is a ground-breaking intervention on Dalit politics in India. Challenging received ideas, it uses a comparative framework to understand Dalit mobilisations for political power, social equality and justice. The monograph traces the emergence of Dalit consciousness and its different strands

in north and south India — from colonial to contemporary times — and interrogates key notions and events. These include: the debate regarding core themes such as the Hindu-Muslim cleavage in the north and caste in the south; the extent to which Dalits and other backward castes (OBC) base their anti-Brahminism on similar ideologies; and why Dalits in Uttar Pradesh (north India) succeeded in gaining power while they did not do so in the region of erstwhile Andhra Pradesh (south India), where Dalit consciousness is more evolved. Drawing on archival material, fieldwork and case studies, this volume puts forward an insightful and incisive analysis. It will be of great interest to researchers and scholars of Dalit studies and social exclusion, Indian politics and sociology.

The Independent Evaluation Group (IEG) of the World Bank has undertaken impact evaluations of the Bank's support to irrigation in Andhra Pradesh, India (under AP Irrigation II and III), and of the U.K. Department for International Development supported Rural Livelihoods Project (RLP). This is one of a series of IEG impact evaluations (see appendix H). IEG's program of impact evaluation is in part carried out under a Department for International Development-IEG partnership agreement; hence the focus on RLP. However, survey villages are also covered by the Bank supported DPIIP project, so that the findings are also relevant to this project.

This is the first book devoted to the Bene Ephraim—a group of former untouchables in Andhra Pradesh who have claimed Jewish identity for themselves.

**Poverty Amid Plenty in the New India** Routledge

This book looks at movements of communities which formed the lower and middle rungs of society in medieval and early colonial India. It presents migration, mobility and memories from a specifically Indian perspective, breaking away from previous Eurocentric studies. The essays in the volume focus on labour, peasant and craft migrations, and in fleshing out the causes and trajectories taken by these communities, they speak to each other by addressing similar issues as well as documenting varying responses to analogous situations. A fascinating history of migrations of people from below, the volume adopts a trans-disciplinary approach and uses inscriptions, official records, and literary texts along with community narratives and folk tradition. This will be of great interest to scholars and students of migration and diaspora studies, medieval and modern South Asian history, social anthropology and subaltern studies.

**With Special Reference to Andhra Pradesh** Taylor & Francis

Growth miracles typically have been studied at the country level. In *The Making of Miracles in Indian States*, internationally-renowned economists Arvind Panagariya and M. Govinda Rao bring together a team of six leading scholars to break from that tradition and study three growth miracles in India at the level of the state: Andhra Pradesh, Bihar, and Gujarat. These are three large and diverse states in India: Gujarat has the third-highest per-capita income among the largest eighteen states, Bihar is the poorest, and Andhra Pradesh falls in the middle. Despite vast differences among the states, all three have grown at rates exceeding 8% for an entire decade in the twenty-first century. Each section of this three-part book offers a historical perspective on the state's development and the specific factors that improved its economic fortunes. The three case studies are backed by extensive quantitative documentation. They demonstrate the critical role that leadership, translated into improved policies and implementation, plays in stimulating growth and development. *The Making of Miracles in Indian States* is essential reading for students and scholars alike, as well as policy makers, NGO workers, and employees of international institutions. The society of traditional India is frequently characterized as static and dominated by caste. This study challenges older interpretations, arguing that medieval India was actually a time of dynamic change and fluid social identities. Using records of religious endowments from Andhra Pradesh, author Cynthia Talbot reconstructs a regional society of the precolonial past as it existed in practice.

This empirically rich volume presents a holistic picture of the electoral process in Indian states and the return of the BJP to power. Drawing on the 2019 elections, it presents ground-level data to understand various aspects of elections: the nature of campaigning, caste, class and identity politics, electoral issues, poll strategies of different parties in the fray, electoral issues, electoral verdicts, the contestants, the leadership factor, the formation of government, among other empirical details. The essays underline the determinants of electoral behaviour by looking into the correlation between the background variables of voters and their voting choices. The essays also compare and contrast the 2019 election verdicts from the earlier elections held in the state under study. A long view of Indian state politics, this book will be essential reference for scholars and researchers of politics, especially political processes, and South Asian studies.

[A Comparative Study on Andhra Pradesh and Bihar after Liberalization](#) Oxford University Press

Once seen by Jawaharlal Nehru as a microcosm of Indian culture - and in the 2000s by both US President Bill Clinton and Bill Gates of Microsoft as a focal point of India's booming IT industry - the southern city of Hyderabad is now a symbol of India's worst crony capitalism. This is the capital of Andhra Pradesh that will elect a new state assembly at the same time as the general election. John Elliott tells a story of dynastic political ambitions, personal greed, and the lauding of companies that grew fat on fraudulent land and other deals with a new form of corruption, especially during the past ten years of Congress rule. He traces the history from the time of the British and uncovers

the origins of a new entrepreneurial community as significant as old business clans such as the Marwaris.

A stereotype image of Nara Chandrababu Naidu has been formed in the last 40 years. His story is remarkable at every level. But often questions, which is the important story? The one where he evolves into one of the extraordinary leaders in Indian politics over four decades? Or that of an ordinary man from a farming family who worked his way to the top by keeping his family and political party together? That which reflects his political acumen, intellect, and hardwork? Or the one that unveils the person who introduced Andhra Pradesh to India? This book attempts to show how Naidu has been a quintessential survivor in Indian politics. This book analyses how Naidu's ability to combine politics and governance has touched every aspect of Indian domestic and foreign policy, from the struggle for social, technological, economic and administrative reforms to creating world-class institutions. It establishes the fact that Naidu, today, is a symbol and an embodiment of many Indias - modern, progressive, rural and cultural.
