The first graphic novel guide to growing a successful raised bed vegetable garden, from planning, prepping, and planting, to troubleshooting, care, and

harvesting. "A fun read packed with practical advice, it's the perfect resource for new gardeners, guiding you through every step to plant, grow, and harvest a thriving and productive food garden."—Joe Lamp'ol, founder and creator of the Online Gardening Academy Like having your own personal gardening mentor at your side, *The Comic Book Guide to Growing Food* is the story of Mia, an eager young professional who wants to grow her own vegetables but doesn't know where to start, and George, her retired neighbor who loves gardening and walks her through each step of the process. Throughout the book, "cheat sheets"

sum up George's key facts and techniques, providing a handy quick reference for anyone starting their first vegetable garden, including how to find the best location, which vegetables are easiest to grow, how to pick out the healthiest plants at the store, when (and when not) to water, how to protect your plants from pests, and what to do with extra produce if you grow too much. If you are a visual learner, beginning gardener, looking for something new, or have struggled to grow vegetables in the past, you'll find this unique illustrated format ideal because many gardening concepts--from proper planting techniques to building raised beds--are easier to grasp when presented visually, step by step. Easy and entertaining, *The Comic Book Guide to Growing Food*

makes homegrown vegetables fun and achievable.

 In this provocative book, sixteen of Minnesota's best writers provide a range of perspectives on what it is like to live as a person of color in one of the whitest states in the nation. They give readers a splendid gift: the gift of touching another human being's inner reality, behind masks and veils and politeness. They bring us generously into experiences that we must understand if we are to come together in real relationships. Minnesota communities struggle with some of the nation's worst racial disparities. As its authors confront and consider the realities that lie beneath the numbers, this book provides an important tool to those who want to be part of closing those gaps. This volume delves into Ireland's forgotten history bringing to light some of the most colorful characters and intriguing episodes of the country's long history. Ireland is approximately the size of the state of Indiana, yet this small country boasts an extensive, rich, and

fascinating history. Ireland's Forgotten Past is an alternative history that covers 13,000 years in 36 stories that are often left out of history books. Among the characters in these absorbing accounts are a pair of ill-fated prehistoric chieftains, a psychopathic Viking, a gallant Norman knight, a dazzling English traitor, an ingenious tailor, an outstanding war-horse, a brothel queen, an insanely prolific sculptor, and a randy prince. This volume offers a succinct account of the Stone Age and Bronze Age, as well as insights into the Bell-Beakers, the Romans, and the Knights Templar. Historian Turtle Bunbury writes a gently off-beat take on monumental events like the Wars of the Roses, the Tudor Conquest and the Battle of the Boyne, as well as the Home Rule

campaign and the Great War. Ireland's Forgotten Past adds color to the existing histories of the country by focusing on the unique characters and intriguing events. This volume will delight anyone interested in the rich untold history of Ireland.

Most people know that there are 70 million Baby Boomers in America today....but what is less known is that there are approximately 100 million people in America between the ages of 16 and 30. This generation has just entered, or will soon be entering the work force. And they have no idea how to invest, save, or handle their money. Young people today come out of school having had little or no formal education

on the basics of money management. Many have large debts from student loans looming over their heads. And many feel confused and powerless when their pricey educations don't translate into high paying jobs. They feel that their \$30,000-\$40,000 salary is too meager to bother with investing, and they constantly fear that there will be "too much month left at the end of their money." Douglas R. Andrew has shown the parents of this generation a different pathway to financial freedom. Now Doug and his sons, Emron and Aaron - both of whom are in their mid-20s - show the under-30 crowd how they can break from traditional 401k investment plans and instead can find a better way by investing in real estate, budgeting effectively, avoiding unnecessary taxes

and using life insurance to create tax-free income. With the principles outlined in *Millionaire by Thirty*, recent graduates will be earning enough interest on their savings to meet their basic living expenses by the time they're 30. And by the time they're 35, their investments will be earning more money than they are, guaranteeing them a happy, wealthy future.
