Publications India

This book 'Basic Mechanical Engineering' has been written to provide knowledge and insight into various aspects of Mechanical Engineering. This book is

intended as text book to be used by the students in the technical institutions i.e.

Engineering Colleges and Polytechnics. The book covers Syllabi of various Universities on 'Basic Mechanical Engineering', 'Elements of Mechanical Engineering', 'Mechanical Engineering', 'Introduction to Mechanical Engineering' and

'Fundamentals of Mechanical Engineering' for the students of all the disciplines of Engineering. Adequate attention has been paid to emphasize on basic principles involved in the subject matter. The explanation in the text has been supported with line diagrams, along with numerous solved problems. The readers will

find the book highly useful as a comprehensive text covering basic principles in simple language and easy to grasp formatting. Strategic Management John Wiley & Sons This book traces the post-war development of gas turbine engines for use in passenger cars and commercial vehicles in the UK, Germany, Italy and the USA. It is based on interviews with leading engineering figures of the day as well as reports by journalists. The work also contains photographs of engines and vehicles as

well as diagrams of various gas turbine engines. Business India CRC Press The critical parts of a heavy duty engine are theoretically designed for infinite life without mechanical fatigue failure. Yet the life of an engine is in reality determined by wear of the critical parts. Even if an engine is designed and built to have normal wear life, abnormal wear takes place either due to special working conditions or increased loading. Understanding abnormal

and normal wear enables the engineer to control the external conditions leading to premature wear, or to design the critical parts that have longer wear life and hence lower costs. The literature on wear phenomenon related to engines is scattered in numerous periodicals and books. For the first time, Lakshminarayanan and Nayak bring the tribological aspects of different critical engine components together in one volume, covering key components like the liner,

piston, rings, valve, valve train and bearings, with methods to identify and quantify wear. The first book to combine solutions to critical component wear in one volume Presents real world case studies with suitable mathematical models for earth movers, power generators, and sea going vessels Includes material from researchers at Schaeffer Manufacturing (USA), Tekniker (Spain), Fuchs (Germany), BAM (Germany), Kirloskar Oil Engines Ltd (India) and Tarabusi (Spain) Wear

simulations and calculations included in the appendices Instructor presentations slides with book figures available from the companion site Critical Component Wear in Heavy Duty Engines is aimed at postgraduates in automotive engineering, engine design, tribology, combustion and practitioners involved in engine R&D for applications such as commercial vehicles, cars, stationary engines (for generators, pumps, etc.), boats and ships. This book is also a key reference for

senior undergraduates looking to move onto advanced study in the above topics, consultants and product managers in industry, as well as engineers involved in design of furnaces, gas turbines, and rocket combustion. Proceedings of a Conference Held at the National Bureau of Standards, Gaithersburg, MD, October 23-26, 1979  
Industrial Marketing  
This techno-economic

performance review of selected fishing fleets in Asia presents the findings of six country level studies of fishing fleets in Bangladesh, China, India, Indonesia, Japan and the Republic of Korea. The review includes financial and economic information of 27 major fishing fleet segments, including trawlers, gillnetters, long liners, jiggers, purse seiners, as well as pole and line fishing vessels. An analysis of the costs and earnings data of these important fishing fleet segments in Asia

was carried out using national statistics of 2017 for the Japanese and the Korean fleet segments and 2018-19 survey data for the other countries. Eighty-nine percent of the 27 fishing fleet segments reported positive net cash flows. Seventy percent of the fishing fleets realized net profit margins of more than 10 percent. Eighty-one percent of the fishing fleets reported positive results in terms of their capital productivity, as their returns on fixed tangible assets (ROFTAs) were positive. The review

shows that investments in fishing vessels and fishing operations of these major Asian fishing fleets are generally profitable. Marine capture fishing is a financially viable economic activity in all six major fishing nations included in the review. It generates enough income to cover depreciation costs, interest and loan repayments, and provides sufficient financial resources for reinvestment. Nearly 60 percent of the fishing fleets generated returns on investment (ROIs) of

15 percent and higher, which signals an attractive sector for investments. The total gross value added (GVA) of the 27 fishing fleets to the Asian regional economy was substantial and estimated at around USD 66 billion. The review also reveals a need for adequate management measures, including fleet capacity management plans, to improve the status of fish stock in the region and maintain a healthy and profitable fishing sector.

Growth, Structure,

Marketing and Buyer Behaviour Vikas Publishing House

The origin of Ashok Leyland can be traced to the urge for self-reliance, felt by independent India. India's first Prime Minister persuaded Mr. Raghunandan Saran, an industrialist, to enter automotive manufacture. In 1948, Ashok Motors was set up in what was then Madras, for the assembly of Austin Cars. Company's destiny and name changed soon with equity participation by British Leyland and Ashok

Leyland commenced manufacture of commercial vehicles in 1955. Since then, Ashok Leyland has been a major presence in India's commercial vehicle industry with a tradition of technological leadership, achieved through tie-ups with international technology leaders and through vigorous in-house research and Development. Access to international technology enabled the Company to set a tradition to be first with technology, which included full air brakes,

power steering and rear engine busses, Ashok Leyland pioneered all these concepts. Responding to the operating conditions and practices in the country, the company made its vehicles strong, over-engineering them with extra metallic muscles. Ashok Leyland vehicles have built a reputation for reliability.

*Modelling Diesel Combustion* Springer Nature

This book is intended to serve as a comprehensive reference on the design

and development of diesel engines. It talks about combustion and gas exchange processes with important references to emissions and fuel consumption and descriptions of the design of various parts of an engine, its coolants and lubricants, and emission control and optimization techniques. Some of the topics covered are turbocharging and supercharging, noise and vibrational control, emission and combustion control, and the future of heavy duty diesel

engines. This volume will be of interest to researchers and professionals working in this area.

**Dynamic Perspectives on Globalization and Sustainable Business**

**in Asia** Food & Agriculture Org.

This engaging book proposes a new look at the complex world and characteristics of Indian business leadership. The book is based on the author's personal interaction and painstaking research with some of India's leading

businessmen and businesswomen. Presenting a unique perception and vision of business leadership in India, the book explores this complex subject and its dynamics in today's challenging global business environment. In addition to exploring some of the fundamental and contemporary theories and concepts of leadership, it also provides: " an understanding of personality differences using the Myers-Briggs Type Indicator (MBTI) " an

overview of Indian culture and the unique characteristics of Indian business " an in-depth analysis of Indian business leadership " the concept of service leadership " transcripts of interviews with key business leaders in India " lessons for future research and proposed models for leadership

In the increasingly turbulent political climate, there has been growing

interest in economic and international relations with Asia. Understanding the business practices in countries of this region, particularly uncertainties, risks, and opportunities associated with doing business in Asia, will be key for competing in a global economy. Dynamic Perspectives on Globalization and Sustainable Business in Asia provides perspectives on the challenges and opportunities of business growth in Asia with strategic insights on

knowledge production, innovation, and disruptive technologies. Featuring coverage on a broad range of topics such as consumer behavior, financial literacy, and value perception, this book is ideally designed for academicians, researchers, government officials, policymakers, and practitioners seeking current research on the development of networks to support competitive advantage in the global economy and viable enterprises.

*The Indian Concrete*

*Journal Food & Agriculture* Org.

This book covers the complete course, dealing with basic elements of mechanical engineering, gas laws, followed by steam, both at very low and beyond saturation pressures and for a better understanding of the topics covered, the book is replete with 284 classroom tested, worked examples

Issues in Structural and Materials Engineering:

2012 Edition is a ScholarlyEditions™ eBook that delivers timely, authoritative, and comprehensive information about Mechanical Engineering. The editors have built Issues in Structural and Materials Engineering: 2012 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Mechanical Engineering in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable,

authoritative, informed, and relevant. The content of Issues in Structural and Materials Engineering: 2012 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More

information is available at <http://www.ScholarlyEditions.com/>.  
Transport KHANNA PUBLISHING HOUSE  
Leadership is the engine of growth, in any walk of life. Leadership is often portrayed as the singular capability of an individual at the helm of an organisation. Theories and models of leadership that abound miss the point that true leadership is a highly multi-faceted and highly inclusive endeavour. This book Leadership for India Inc.: An Experiential Treatise is

a unique work that is contextually relevant and culturally appropriate. Given that leadership with an Indian perspective is studied and researched less than it ought to be, this book fills a major gap. This book studies leadership from several practical and unique angles, and brings forth insights, models and constructs that are not often the mainstay of published leadership literature. The perspectives that are laid out in the book are fresh and original as well as

offbeat and philosophical. The book presents a rich tapestry of the deep and diversified insights borne out of the author's over four decades of working with leaders and working as a leader, which are discussed in a practical and fulsome manner. The book with its Prologue, forty chapters and Epilogue that cover comprehensively and in depth all aspects of leadership, serves as an experiential treatise for established as well as aspirant leaders for India Inc. It would equally serve

as a reference text book for students and academicians as well as professionals and leaders. The book is dedicated, very appropriately, to the greatest leader of all times, Mahatma Gandhi. *Cases in Business Marketing* McGraw-Hill Education

 The increasing cost and

scarcity of durable boatbuilding timbers have affected the construction of fishing craft around the world. The developed world has by and large witnessed the transfer from traditional wooden boatbuilding methods to either less conventional wood construction techniques (e.g., plywood or wood laminates) or non-wood materials such as fibre reinforced plastic (FRP), steel, aluminium and ferrocement. These techniques generally favour less labour intensive methods of

construction. In the developing world where timber is still the predominant boatbuilding material, the scarcity and high cost of good quality timber have not meant that less wooden boats are being built, but rather that building quality has deteriorated through the use of poor quality timber. At the same time, however, attempts have been made to diversify construction methods with varying degrees of success. This publication is intended to benefit those who are considering

ferrocement construction; it is assumed that those who use the book are already conversant in small fishing vessel construction.

Rahul and his friend Mona grow up in a turbulent time: development comes to the town they are in, and that means they must be displaced. Amidst a lot of politics and protests, fear-mongering and strict policies, they shift in pursuit of greener pastures. A time comes when Mona's father

makes a choice to take on a high-level job that pays him well, but Rahul's father refuses the offer. Eventually, the two lives take different paths, one with affluence and one with poverty. Rahul finds himself falling for Mona, who has a busy and new life at college – which leads her to ignore him. His mother falls ill, in the mean time, and he is the only one to take care of her after his father's passing. With a heavy heart, Rahul, who has made tremendous sacrifices for Mona, is

forced to accept a difficult fate.

The Handbook of

Postharvest Technology

presents methods in the manufacture and supply of grains, fruits,

vegetables, and spices. It details the physiology,

structure, composition, and characteristics of

grains and crops. The text covers postharvest

technology through processing, handling,

drying and milling to storage, packaging, and

distribution. Additionally, it examines cooling and preservation techniques used to maintain the quality and the decrease spoilage and withering of agricultural products.

#### Agricultural Machinery Industry in India Springer Nature

This book comprises select papers presented at the International Conference on Mechanical Engineering Design (ICMechD) 2019. The volume focuses on the recent trends in design research and their applications across the

mechanical and biomedical domain. The book covers topics like tribology design, mechanism and machine design, wear and surface engineering, vibration and noise engineering, biomechanics and biomedical engineering, industrial thermodynamics, and thermal engineering. Case studies citing practical challenges and their solutions using appropriate techniques and modern engineering tools are also discussed. Given its contents, this

book will prove useful to students, researchers as well as practitioners. The Economic Weekly Springer Nature Proceedings of the FISITA 2012 World Automotive Congress are selected from nearly 2,000 papers submitted to the 34th FISITA World Automotive Congress, which is held by Society of Automotive Engineers of China (SAE-China ) and the International Federation of Automotive Engineering Societies (FISITA). This proceedings focus on solutions for

sustainable mobility in all areas of passenger car, truck and bus transportation. Volume 2: Advanced Internal Combustion Engines (II) focuses on: •Flow and Combustion Diagnosis •Engine Design and Simulation •Heat Transfer and Waste Heat Reutilization •Emission Standard and International Regulations Above all researchers, professional engineers and graduates in fields of automotive engineering, mechanical engineering and electronic

engineering will benefit from this book. SAE-China is a national academic organization composed of enterprises and professionals who focus on research, design and education in the fields of automotive and related industries. FISITA is the umbrella organization for the national automotive societies in 37 countries around the world. It was founded in Paris in 1948 with the purpose of bringing engineers from around the world together in a spirit of cooperation to share ideas and

advance the technological development of the automobile.

Notion Press

The fourteenth edition of Strategic Management continues to emphasize on planning for domestic and global competition that is integral to strategic decision-making. This revised edition is specially designed to accommodate the needs of strategic management students worldwide. The

unique pedagogy reflects strategic analysis and innovation at different organizational levels. Real business situations from around the world, in both large and small entrepreneurial companies, are evident in the form of 25 globally engaged cases, 57 Global Strategy in Action (NEW), 35 Strategy in Action (NEW) modules. Salient Features: - Globalization as a central theme - Focus on business ethics and

corporate social responsibility - Special sections covering regulations in India such as Consumer Protection Act, Environment Protection Act, etc. - Innovation and entrepreneurship frameworks to guide strategic decisions that accelerate Industrial Marketing Excel Books India Ind com Journal LAP Lambert Academic Publishing
