 CHOICE Outstanding Academic Title 2017 This book examines the 1871 unification of Germany through the prism of one of its 'forgotten states', the Kingdom of Württemberg. It moves beyond the traditional argument for the importance of the great powers of Austria and Prussia in controlling German destiny at this time. Bodie A. Ashton champions the significance of Württemberg and as a result all 38 German states in the unification process, noting that each had their own institutions and traditions that proved vital to the eventual shape of German unity. The Kingdom of Württemberg and the Making of Germany, 1815-1871 demonstrates that the state's government was dynamic and in full control of its own policy-making throughout most of the 19th century, with Ashton showing a keen appreciation for the state's domestic development during the period. The book traces Württemberg's strong involvement in the national question, and how successive governments and monarchs in the state's capital of Stuttgart manoeuvred the country so as to gain the greatest advantage. It successfully argues that the shape of German unification was not inevitable, and was in fact driven largely by the desires of the Mittelstaaten, rather than the great powers; the eventual Reichsgründung of January 1871 was merely the final step in a long series of negotiations, diplomatic manoeuvres and subterfuge, with Württemberg playing a vital, regional role. Making use of a wealth of primary sources, including telegrams, newspaper articles, diary entries, letters and government documents, this is a vitally important study for all scholars and students of 19th-century Germany.

Dongri to Dubai is the first ever attempt to chronicle the history of the Mumbai mafia. It is the story of notorious gangsters like Haji Mastan, Karim Lala, Varadarajan Mudaliar, Chhota Rajan, Abu Salem, but above all, it is the story of a young man who went astray despite having a father in the police force. Dawood Ibrahim was initiated into crime as a pawn in the hands of the Mumbai police and went on to wipe out the competition and eventually became the Mumbai police's own nemesis. The narrative encompasses several milestones in the history of crime in India, from the rise of the Pathans, formation of the Dawood gang, the first ever supari, mafia's nefarious role in Bollywood, Dawood's move to Karachi, and Pakistan's subsequent alleged role in sheltering one of the most wanted persons in the world. This story is primarily about how a boy from Dongri became a don in Dubai, and captures his bravado, cunningness, focus, ambition, and lust for power in a gripping narrative. The meticulously researched book provides an in-depth and comprehensive account of the mafia's games of supremacy and internecine warfare.

Acronym agglomeration is an affliction of the age, and there are acronym addicts who, in their weakness, find it impossible to resist them. More than once in recent months my peers have cautioned me about my apparent readiness to use not only acronyms, but abbreviations, foreign isms, codes, and other

cryptic symbols rather than common, ordinary American words. Many among us, though, either have not received or have chosen to ignore such advice. As a consequence, what we write and speak is full of mystery and confusion. It is then for the reader and listener and for the writer and speaker that Reta C. Moser has compiled this guide. Its effective application to the art of communication is urged. Such use should help avoid many of the misunderstandings involving terminology which occur daily. Although such misunderstandings are certainly crucial in humanistic and social situations, they are often of immediate import and the trigger to disaster in scientific, technical, and political situations. Some 15,000 acronyms and 25,000 definitions are provided (a 50- and 47 -percent increase over the 1964 edition!), with due credit to Miss Moser's diligence in making the compilation and with the acknowledgment that the acronymical phenomenon is very much with us. This edition, like the first, is certain to be of value to writers, librarians, editors, and others who must identify and deal with acronyms.

Motilal Banarsidass, Delhi motilalbanarsidass.com, info@mbd.co.in The Matamata is a Vastusastra, i.e. a treatise on dwelling, and as such, it deals with all the facets of gods' and men's dwellings, from the choice of the site to the iconography of the temple walls. It contains numerous and precise descriptions of villages and towns as well as of temples, houses, mansions and palaces. It gives indications for the selection of proper orientation, correct dimensions, and appropriate materials. It intends to be a manual for the architect and a guidebook for the layman. Well thought of by traditional architects (sthapati-s) of South India, the treatise is of great interest at a time when technical traditions, in all fields, are being scrutinized for their possible modern application. The present bilingual edition prepared by Dr Bruno Dagens contains critically edited Sanskrit text which is an improvement over the earlier edition by the same scholar and published as No.40 of Publications de L'Institut Francais d'Indologie, Pondicherry. The English translation, also published earlier, has now been revised with copious notes. The usefulness of the edition has been further enhanced by adding an analytical table of contents and a comprehensive glossary. In the series of Kalamulasastra early texts on music, namely, Matralaksanam, Dattilam and Brhaddest, have been published. The medieval texts on music, especially, the Sribastamuktavali (No.3 in the series) and the Nartananirnaya (No.17 in the series), bring us up to the 15th and 16th centuries. In the case of architecture, despite the IGNC's endeavour to publish portions of the Brhatsamhita, the Agni Purana and the Visnudharmottara-Purana, first, this has not been possible. Instead, our scholars were able to complete work first on a late but important text, namely, Silparatnakosa. We hope that the sections on architecture in the Brhatsamhita, the Agni Purana and the Visnudharmottara-Purana which predate the medieval texts, will be published soon, along with revised and re-edited texts of Manasollasa and Aparajitaprccha. The Mayamatam is the fourteenth and fifteenth volume in the Kalamulasastra series of the Indira Gandhi National Centre for the Arts (IGNCA). **MILSBILLS** Springer Science & Business Media The Food Safety Handbook: A Practical Guide for Building a Robust Food Safety Management System, contains detailed information on food safety systems and what large and small food industry companies can do to establish, maintain, and enhance food safety in their operations.
