*Public Examinations Examined* Emerging Issues and Prospects in African E-Government

Emerging Issues and Prospects in African E-Government IGI Global

*Educational Performance of the Poor* Multilingual Matters

This collection derives from a conference held in Pretoria, South Africa, and discusses issues of indigenous knowledge systems (IKS) and the arts. It presents ideas about how to promote a deeper understanding of IKS within the arts, the development of IKS-arts research methodologies, and the protection and promotion of IKS in the arts. Knowledge, embedded in song, dance, folklore, design, architecture, theatre, and attire, and the visual arts can promote innovation and entrepreneurship, and it can improve communication. IKS, however, exists in a post-millennium, modernizing Africa. It is then the concept of post-Africanism that would induce one to think along the lines of a globalized, cosmopolitan and essentially modernized Africa. The book captures leading trends and ideas that could help to protect, promote, develop and affirm indigenous knowledge and systems, whilst also making room for ideas that do not necessarily oppose IKS, but encourage the modernization (not Westernization) of Africa.

*The African Book Publishing Record* University of Nairobi Press

The Handbook of Employee Selection summarizes the state of science and practice in the field of employee selection.

*Betrayal in the City* Leckie Primary Success

Research Paper from the year 2011 in the subject Pedagogy - School Pedagogics, , course: Education, language: English, abstract: ABSTRACT This study sought to establish the impact of school feeding programme on pupil's retention in primary schools in Garissa District, Kenya. The study gathered both quantitative and qualitative data about impact of the lunch programme in schools. The data was collected from the four divisions in the district from a sample of 200 pupils and 10 head teachers. The study used descriptive survey. It also used four research questions to answer the objectives. The first research question sought to get information on impact of lunch programme. The second one established enrolment rates while the third research question established retention rates and the fourth one helped to gather data on completion rate and the last one on the role of education stake holders on enrolment retention, completion of pupils in Primary Schools. The data analysis was done by use of statistical package for social sciences (SPSS) programme. The results were generated and presented in form of percentages, frequencies and means.

**Agro-industrial Labour in Kenya** Learning Express Llc

Education policy of developing nations is often viewed as a choice between equal access for all students and quality of schools. This work proposes that such a dichotomy may be artificial. The research shows that improving the quality of education could lead to efficiency gains, sometimes large enough to offset the costs of such innovations. Using data collected over seven years in rural

northeast Brazil, this quantitative assessment of educational performance and school promotion in primary schools uniquely addresses important policy concerns facing developing countries.

*The River and the Source* Springer Nature

The book is designed to cover the recent researches carried-out by the scholars from across the world. It covers aspects related to Foraminifera, in biostratigraphy and paleoecology, isotopic studies, applicability as bio-indicators in pollution studies, taxonomy of Indo-Pacific assemblages, studies of history of ocean bottom oxygenation and experimental studies; Radiolaria from Antarctic Ocean; Microbalites including Diatoms in studying threats and conservation issues in salt lakes of Western Australia; Ostracoda from freshwater, marginal marine ecosystems from Andaman and Nicobar islands; Coralline-algae from late Eocene rocks of Meghalaya; Zygnematalean algae from across the Permian-Triassic boundary; and Microstructures of egg-shells of vertebrates showing paleobiologic links across the continents. It will serve the postgraduate students choosing Geology as well as researchers in the field of Micropaleontology.

*The Pillars of Society, and Other Plays* World Bank Publications

Research Paper (undergraduate) from the year 2014 in the subject Pedagogy - School System, Educational and School Politics, language: English, abstract: Parental attitude towards education is consistently found to be positively associated with a student's academic performance. However, there has been little investigation about mechanisms that explain this association. The objective of the study was to establish the relationship between parental attitude towards education and academic performance of day secondary students. The specific research objectives were: to establish the relationship between parents' attitude towards educational involvement and academic performance of day secondary school students; to examine the relationship between parents' attitude towards absenteeism and academic performance of day secondary school students; to establish the relationship between parents' attitude towards provision of basic educational needs and academic performance of day secondary students in Uasin Gishu. The theoretical framework of this study was derived from functionalist and learning theories. The Data for this study was collected from primary and secondary sources. The research instruments were questionnaires for students and parents, interview schedules for parents and teachers and parent-child relationship scale for students. The study population comprised of 1804 students, 80 parents representatives and 51 teachers. A correlation research design was adopted based on a sample drawn from five secondary schools in the study area. Purposive sampling was used to select a sample 18 teachers and 36 parents while stratified random sampling was used in the selection of 180 students. Spearman Brown Prophecy coefficient formula was used to test the internal consistency of questionnaires and interview schedules after piloting had been done. Parent-child relationship scale reliability was established by use of Cronbach's alpha coefficients. The reliability coefficients of 0.

*Education for Development* Springer

This book provides teachers with scaffolding to develop reflective practice, moving towards an evolving philosophy of education.

*Values And Vision In Primary Education* Routledge

Brighter Child(R) Learning Activities helps children in grade 1 learn and reinforce skills - by solving problems, playing games, and completing fun brainteasers. Offering 80 pages of full-color activities, easy-to-follow directions, and complete answer key, children will have fun learning basic skills necessary for school success! Features activities that teach: \*Numbers to 25 \*Skip counting \*Beginning letter sounds \*Colors & shapes \*Word classification \*Long & short vowels \*Rhyming words \*Time The popular Brighter Child(R) Workbook series offers a full complement of instruction, activities, and information in 51 subject-specific workbooks. Encompassing preschool to grade 6, this series covers key subjects including basic skills, English & grammar, math, phonics, reading, science, and Spanish. This series is helping prepare children by giving them a solid foundation in key skills necessary for success in the classroom!

*Where to Begin* Scientific Publishers

This open access book is a comparative analysis of recent large scale education reforms that broadened curriculum goals to better prepare students for the 21st century. The book examines what governments actually do when they broaden curriculum goals, with attention to the details of implementation. To this end, the book examines system level reforms in six countries at various levels of development. The study includes system level reforms in jurisdictions where students achieve high levels in international assessments of basic literacies, such as Singapore and Ontario, Canada, as well as in nations where students achieve much lower levels, such as Kenya, Mexico, Punjab-Pakistan and Zimbabwe. The chapters examine system-level reforms that focus on strengthening the capacity to teach the basics, as in Ontario and Pakistan, as well as reforms that aim at building the capacity to teach a much broader set of competencies and skills, such as Kenya, Mexico, Singapore and Zimbabwe. The volume includes systems at very different levels of spending per student and reforms at various points in the cycle of policy implementation, some just starting, some struggling to survive a governmental transition, and others that have been in place for an extended period of time. From the comparative study of these reforms, we aim to provide an understanding of how to build the capacity of education systems to teach 21st century skills at scale in diverse settings.

*Influence of Parental Attitude Towards Education on Academic Performance of Day Secondary School Students in Uasin Gishu County, Kenya* Open Book Publishers

In 1995, this novel won both the Jomo Kenyatta Literature Prize, and the Commonwealth Writers Prize Best First Book in the Africa Region. Now reprinted, it remains in great demand. An epic story spanning cultures, it tells the lives of three generations of women. It traces the story of Akoko in her rich traditional Luo setting, through to the children who live and die in the 20th century.

*Lessons from Rural Northeast Brazil* Carson-Dellosa Publishing

This book analyzes the policy issues facing educational planners, administrators and policy makers in developing countries in choosing between alternative strategies of educational investment. It draws on the World Bank's twenty years of experience in education sector analysis and research to discuss both theoretical and practical problems of analyzing investment choices. The topics covered include: the contribution of education to economic and human development, criteria for investment, cost-benefit analysis, demand for educated manpower finance, internal efficiency and quality, equity considerations and the links between investment in education and investment in other sectors. No

comparable work exists which deals solely with the problems of analyzing education investment in developing countries. While written for those involved in policy formulation and planning, it does not assume a high degree of technical knowledge of economics

*Handbook of Employee Selection* World Bank Publications

Illustrated and engaging, these workbooks make learning fun! Each book contains: - Over 100 pages of topic-based practice - Questions split into three levels of increasing difficulty - Progress tests so children can revisit topics and consolidate learning - Progress charts to record results and identify areas for improvement - Clear answers booklet and notes pages Matched to the requirements of the Scottish Curriculum for Excellence, these are ideal to help close the attainment gap!

*Born Hero* East African Publishers

Research Paper (postgraduate) from the year 2020 in the subject Health - Health Sciences - Health Psychology, Masinde Muliro University of Science and Technology, course: psychology mental health, language: English, abstract: The purpose of the study was to establish risk factors and prevalence of suicidal behaviour among Kenyan youth due to worrying trend frequently reported suicide cases amongst young people in Kenya. The occurrence of reported suicide cases amongst young people in Kenya is alarming and yet many cases go unreported in most cultures in Kenya due social stigma associated with suicide. It is worth noting that suicide in Kenya has become more rampant among the youth than adults and that the majority of reported suicide cases happen amongst youth in high schools, colleges and universities.

*Urban Education* GRIN Verlag

"We report results from a randomized evaluation of a merit scholarship program for adolescent girls in Kenya. Girls who scored well on academic exams had their school fees paid and received a cash grant for school supplies. Girls eligible for the scholarship showed significant gains in academic exam scores (average gain 0.12-0.19 standard deviations) and these gains persisted following the competition. There is also evidence of positive program externalities on learning: boys, who were ineligible for the awards, also showed sizeable average test gains, as did girls with low pretest scores, who were unlikely to win. Both student and teacher school attendance increased in the program schools. We discuss implications both for understanding the nature of educational production functions and for the policy debate surrounding merit scholarships"--National Bureau of Economic Research web site.

**Emerging Issues and Prospects in African E-Government** Oxford University Press, USA

Efforts have been made toward the application of electronic government in the developing world, yet questions of how to best implement governance systems and address concerns from officials and citizens alike remain to be answered. *Emerging Issues and Prospects in African E-Government* explores relevant practices, trends, and potential challenges facing fledgling governments in the digital era. This book focuses on the establishment and maintenance of e-government in various African countries, providing critical insights for government bodies, policymakers, administrators, and public sector researchers working in local, state, and national governments around the world.

*Inheritance* Routledge

BORN HERO SINCE 1990, JOURNAL BOOK FOR PEOPLE WERE BORN IN 1990, Gift for people you love or for your self, seize

Suicidal behaviour among Kenyan youth. Risk factors and prevalence in secondary schools Oxford University Press

High-stakes public examinations exert a dominant influence in most education systems. They affect both teacher and student behavior, especially at the middle and upper levels of secondary education. The content of past examinations tends to dictate what is taught and how it is taught and, more important, what is learned and how it is learned. By changing aspects of these examinations, especially their content and format, education systems can have a strong positive impact on teacher behavior and student learning, help raise student achievement levels, and better prepare students for tertiary-level education and for employment. Examination agencies, many of which have followed the same procedures over decades, can learn from the successes and failures of other systems. This book addresses current issues related to the development, administration, scoring, and usage of these high-stakes public examinations, identifying key issues and problems related to examinations in many emerging market economies as well as in advanced economies. The book's primary audience consists of public examination officials on national, regional, and state examination boards, but the book should also be of interest to senior education policy makers concerned with certification and learning achievement standards, to academics and researchers interested in educational assessment, to governmental and education agencies responsible for student selection, and to professionals at development organizations. "This extremely well-written and comprehensive book offers a timely review of the diversity of public examination practices worldwide; of the tensions between examinations and learning; and of the technical expertise involved in the creation of valid, reliable, and fair assessments. It reminds us that as "the diploma disease" takes hold with an ever-greater intensity at every stage of education worldwide, and the commercial business of testing flourishes, those concerned with educational quality and meaningful

learning must be on guard to prevent the assessment tail wagging the educational dog."? Angela W. Little, Professor Emerita, Institute of Education, University College London "This book is very well structured and written and draws on the authors' remarkable global knowledge across countries and histories. It will be a great asset both to administrators responsible for examinations and to academics and other professionals who seek to understand the nature and impact of examinations of different types and in different settings."? Mark Bray, UNESCO Chair Professor of Comparative Education, University of Hong Kong; and former Director, UNESCO International Institute for Educational Planning "I am sure that *Public Examinations Examined*, which thoroughly analyzes the practice of public examinations in different countries and makes profound and well-grounded conclusions, will arouse very great interest and will serve to further improve public examinations."? Victor Bolotov, Distinguished Professor, Higher School of Economics, National Research University, Moscow; member, Russian Academy of Education; and former Deputy Minister of Education, Russian Federation

#### **Electrochemistry I** Springer

Spiral-bound with perforated pages that allow one list of student names to be used across several pages of records. 8-1/2" x 11". Spiral-bound.

*Betrayal in the City*, first published in 1976 and 1977, was Kenya's national entry to the Second World Black and African Festival of Arts and Culture in Lagos, Nigeria. The play is an incisive, thought-provoking examination of the problems of independence and freedom in post-colonial African states, where a sizeable number of people feel that their future is either blank or bleak. In the words of Mosese, one of the characters: "It was better while we waited. Now we have nothing to look forward to. We have killed our past and are busy killing our future."--Page 4 of cover.
