*Reality Of Today's Generation Kid* John Wiley & Sons

Pollster-researcher George Barna has published the results of a nationwide survey of teens, giving an accurate picture of where today's youth are, and where they seem to be headed. It's the kind of information leaders need in order to relate and minister to teens.

**absence of clutter** Createspace Independent Pub

As seen in Time, USA TODAY, The Atlantic, The Wall Street Journal, and on CBS This Morning, BBC, PBS, CNN, and NPR, iGen is crucial reading to understand how the children, teens, and young adults born in the mid-1990s and later are vastly different from their Millennial predecessors, and from any other generation. With generational divides wider than ever, parents, educators, and employers have an urgent need to understand today's rising generation of teens and young adults. Born in the mid-1990s up to the mid-2000s, iGen is the first generation to spend their entire adolescence in the age of the smartphone. With social media and texting replacing other activities, iGen spends less time with their friends in person—perhaps contributing to their unprecedented levels of anxiety, depression, and loneliness. But technology is not the only thing that makes iGen distinct from every generation before them; they are also different in how they spend their time, how they behave, and in their attitudes toward religion, sexuality, and politics. They socialize in completely new ways, reject once sacred social taboos, and want different things from their lives and careers. More than previous generations, they are obsessed with safety, focused on tolerance, and have no patience for inequality. With the first members of iGen just graduating from college, we all need to understand them: friends and family need to look out for them; businesses must figure out how to recruit them and sell to them; colleges and universities must know how to educate and guide them. And members of iGen also need to understand themselves as they communicate with their elders and explain their views to their older peers. Because where iGen goes, so goes our nation—and the world.

In its two-thousand-year history, the Catholic Church remains an unchanging yet developing entity. Since the church's infancy, Catholic theologians have referenced the "deposit of faith," which in early years referred to the written or orally revealed doctrines that formed the backbone of church teaching. Through the centuries, the definition came to be understood as the word of God, delivered through Jesus Christ and passed on to his apostles. Still, the deposit included both oral and written traditions and provided moral direction. The Second Vatican Council brought about many changes in the church, and once again, bishops and theologians addressed the deposit of faith. This invaluable concept came to be seen, not as mere dogma, but the expression of faith embodied in the words and deeds of Christ. The deposit is relevant to all elements of Catholic life: prayer, sacraments, and moral living. While the deposit has always addressed divine revelation, the post-Vatican II definition directs the faithful to think holistically. Hubert M. Sanders Jr.'s *Deposit of Faith* is intricate Catholic theology for the lay reader. It encourages Catholics to reach beyond dogma and written instructions to embrace the fullness of the Christian experience in all aspects of life.

September 11th, 2001 was America's wake up call to terrorism. Unfortunately, we hit the snooze alarm. The next wave of terror attacks won't be nation shaking, cataclysmic events. We're ready for that. Instead, they'll be minor, localized nightmares. Mere pinpricks to our country, but catastrophic

to the small towns that find themselves in the crosshairs. Worst of all, there's nothing we can do to stop it from happening - or is there? A gritty novel extrapolated from real world events, this fast-paced, riveting thriller will leave you alarmed, angry, and awestruck at America's unpreparedness for the next wave of terror attacks. Some might refer to it as death by a thousand cuts, but the counterterrorism community calls it *Small Ball*. *Small Ball* is an indictment of our woefully wrongheaded security infrastructure and a testament to the resilience, resourcefulness, and integrity of the average American. You'll wonder why it hasn't happened already. Perhaps it's happening right now...

*Leading Today's Youth Into the Future* Shadow Mountain

Generation Z (Gen Z) is the demographic cohort also known as Post-Millennials, the iGeneration or the Homeland Generation. Referring to individuals born roughly between the mid-1990s and the early 2000s, they are our youngest consumers, students, colleagues, and voters. Understanding them is a key aspect. In the context of the hospitality and tourism, Gen Z-ers represent the future in human resources, and service production and consumption. This book focuses on the aspirations, expectations, preferences and behaviours related to individuals within this demographic. It critically discusses their dynamism in driving the tourism sector and offers insights into the roles that Gen Z will inhabit as visitors, guests, consumers, employees, and entrepreneurs. This book is a valuable resource for managers, scholars and students interested in acquiring concrete knowledge on how Gen Z will shape the marketing and management of tourism-related services.

**Becoming Zara** Simon and Schuster

Sexting. Cyberbullying. Narcissism. Social media has become the dominant force in young people's lives, and each day seems to bring another shocking tale of private pictures getting into the wrong hands, or a lament that young people feel compelled to share their each and every thought with the entire world. Have smartphones and social media created a generation of self-obsessed egomaniacs? Absolutely not, Donna Freitas argues in this provocative book. And, she says, these alarmist fears are drawing attention away from the real issues that young adults are facing. Drawing on a large-scale survey and interviews with students on thirteen college campuses, Freitas finds that what young people are overwhelmingly concerned with--what they really want to talk about--is happiness. They face enormous pressure to look perfect online--not just happy, but blissful, ecstatic, and fabulously successful. Unable to achieve this impossible standard, they are anxious about letting the less-than-perfect parts of themselves become public. Far from wanting to share everything, they are brutally selective when it comes to curating their personal profiles, and worry obsessively that they might unwittingly post something that could come back to haunt them later in life. Through candid conversations with young people from diverse backgrounds, Freitas reveals how even the most well-adjusted individuals can be stricken by self-doubt when they compare their experiences with the vast collective utopia that they see online. And sometimes, as on anonymous platforms like Yik Yak, what they see instead is a depressing cesspool of racism and misogyny. Yet young people are also extremely attached to their smartphones and apps, which sometimes bring them great pleasure. It is very much a love-hate relationship. While much of the public's attention has been focused on headline-grabbing stories, the everyday struggles and joys of young people have remained under the radar. Freitas brings their feelings to the fore, in the words of young people themselves. The Happiness Effect is an eye-opening window into their first-hand experiences of social media and its impact on them.

*Small Ball* Third Bridge Press

No one has failed to notice that the current generation of youth is deeply--some would say totally--involved with digital media. Professors Howard Gardner and Katie Davis name today's young people

The App Generation, and in this spellbinding book they explore what it means to be "app-dependent" versus "app-enabled" and how life for this generation differs from life before the digital era. Gardner and Davis are concerned with three vital areas of adolescent life: identity, intimacy, and imagination. Through innovative research, including interviews of young people, focus groups of those who work with them, and a unique comparison of youthful artistic productions before and after the digital revolution, the authors uncover the drawbacks of apps: they may foreclose a sense of identity, encourage superficial relations with others, and stunt creative imagination. On the other hand, the benefits of apps are equally striking: they can promote a strong sense of identity, allow deep relationships, and stimulate creativity. The challenge is to venture beyond the ways that apps are designed to be used, Gardner and Davis conclude, and they suggest how the power of apps can be a springboard to greater creativity and higher aspirations.

Remember the good old days of coaching young athletes? Coaches gave the orders. The players responded with action instead of asking, "Why?" But those are examples of a relationship lost to the ages—specifically to the last millennium. And coaches from that last millennium in every field of sports are learning the hard way that in this millennium they now face a new kind of player personality, one defined simply as a product of the Millennial generation which began reaching adulthood about the year 2000. With their cell phones and their Twitters, their helicopter parents and their Internet-bred knowledge of almost everything they could possibly want to know, the Millennials have been driving old-school coaches so crazy they have either quit, surrendered or exploded in frustration. With *The Millennial Method*, however, veteran college baseball coach Jason Schreiber and award-winning journalist Gary Taylor offer a more effective way to tap the athletic potential of the Millennial Generation and improve team performance by sharing techniques used with players on Schreiber's teams at Alvin Community College near Houston, Texas. *The Millennial Method* begins with an overview of the generational divide facing managers in all walks of life—from corporate offices to the ballparks—in a bid to understand those differences. Then the authors focus specifically on Schreiber's nationally ranked 2014 baseball team for a closer look at tools used to bridge the generation gap at Alvin. *The Millennial Method* explains one sure-fire tool that allows coaches to be certain all of their athletes fully understand the concepts taught the day before, while taking zero time away from practice. The method discussed in the book greatly enhances an athlete's sense of urgency to improve his or her skills.

Killian knows all about vampires and aliens. They're not real. But when a handsome swimmer climbs into her storm-tossed boat an hour from her summer destination, the worlds of fantasy and reality suddenly collide... Cuttle Island has no mall, no social scene, and no action. But it does have a mysterious stone tower, ageless islanders, and a secret as astonishing as a mermaid's tale... Before the summer is through, Killian will find the truth of her family's past...and the role she is destined to play in a centuries-old curse.

Gen Y—those individuals born after 1980—are making an indelible mark on our culture. Raised on praise and technology, they are savvier and more confident than any prior generation. Their characteristic values, like social responsibility and authenticity, drive their actions. A majority of the 78 million Gen Yers in the U.S. have entered the workforce, creating a new dynamic. *Millennial Leaders* presents 28 success stories from brilliant Gen Y leaders and those professionals who have studied this social phenomenon—from a 14-year-old political appointee to a finalist on "The Apprentice." Through interviews and insights, this book shows experienced leaders (i.e., Traditionalists, Baby Boomers, and Generation X) how to manage, motivate, and communicate with Gen Y, and how to best utilize their talents. The book also provides Generation Y with over 100 strategies for achieving career and personal success. Learn what turns them on and off, how to retain them as employees, and how to cultivate their natural entrepreneurship for your benefit.

In a culture obsessed with sex, the era of Dad's Playboy is long gone. Today, endless free porn is a click away and full-frontal photos appear on sites as accessible as Twitter, yet many couples struggle with the underlying issues of pornography. Emily Southwood considered herself to be sexually liberal—until her fiancé landed a job filming porn for a network reality TV show and her whole world changed overnight. Once confident in her relationship, she suddenly felt jealous, insecure, and obsessively comparative to the porn stars her fiancé was around everyday. She was forced to confront feelings she didn't even know she had: about the treatment of women in the porn industry, the hush-hush attitude toward women watching pornography, and the unrealistic expectations about sex that are often propagated by porn. *Prude* is a humorous memoir that explores why there is so little communication about porn in relationships. Southwood tells the story of her transformation from feeling sexually liberal-minded to realizing she had issues with porn and the industry her fiancé was a part of. She reveals her bizarre journey to conquer her discomfort around porn—and how she ends up finding herself (and ultimately fixing her relationship for good) along the way.

#### **The Future of the Industry** Simon and Schuster

Computer games, the Internet, and other new communications media are often seen to pose threats and dangers to young people, but they also provide new opportunities for creativity and self-determination. As we start to look beyond the immediate hopes and fears that new technologies often provoke, there is a growing need for in-depth empirical research. *Digital Generations* presents a range of exciting and challenging new work on children, young people, and new digital media. The book is organized around four key themes: Play and Gaming, The Internet, Identities and Communities Online, and Learning and Education. The book brings together researchers from a range of academic disciplines – including media and cultural studies, anthropology, sociology, psychology and education – and will be of interest to a wide readership of researchers, students, practitioners in digital media, and educators.

#### **Why Today's Young Americans Are More Confident, Assertive, Entitled--and More Miserable Than Ever Before** The App Generation How Today's Youth Navigate Identity, Intimacy, and Imagination in a Digital World

This book is DEDICATED TO: The eradication of FEAR in America—as FDR articulated: "nameless, unreasoning, unjustified terror which paralyzes needed efforts to convert retreat into advance." In short, fear is the mother of all cancers on the body politic of America.....i.e., fear is a wall to keep the

Mexicans out, and drives our insidious racism.....and the pernicious fear resulting from McCarthyism still hangs like a black cloud over and cripples America to this day, resulting in our Third World healthcare system, and Job Creation—and is the parent of the pervasive hate in America today.....to illustrate: I didn't write the following. It is a cut and paste from FACEBOOK, or some blog [would like to give credit if knew the author]—but it is so on target regarding how "fear" is driving Conservative policy in America today—i.e., is undermining America and our progress—and relegating America to a Third World country status, rather than a world leader—"Conservatives are such cowards: they are afraid of gay people getting married or serving in the military; they are afraid of bringing terrorists to super max prisons in the US from which no one has ever escaped; they are afraid of the boy scouts letting gay kids in; they are afraid of everyone voting and are constantly suppressing the vote under some bogus voter fraud theory; they are afraid of letting students vote at their universities; they are afraid of women having the right to choose; they even are afraid of women getting contraception [the real issue actually is a women's agency and control over their bodies]; they are afraid of immigration reform leading to citizenship because they are afraid of— name whatever reason; they are afraid of mandating gun purchasers to undergo background checks for crazy people and terrorists; they are afraid of people smoking pot; they are afraid of climate change being real and contradicting their beloved Bible; they are afraid of legitimate campaign reform; they are afraid of Muslims; they are afraid of blacks; they are afraid of atheists; they are afraid of hippies; they are afraid of socialists; they are probably still afraid of monsters under their beds; they are just rank cowards and keep making things up to be afraid of."

#### Yale University Press

Praise for *Generation on a Tightrope* "Over the last four decades, Arthur Levine has become the premier analyst of continuities and changes in the American college student population. In this impressive and comprehensive volume, Levine and coauthor Diane R. Dean provide an authoritative and richly textured picture of the much-discussed current generation." —Howard Gardner, Hobbs Professor of Cognition and Education, Harvard Graduate School of Education "Arthur Levine and Diane R. Dean take the long view of today's generation of college students. This is a brilliant examination of what has shaped our young people, what they are doing with the tools they have, and where they are headed. It is a diagnosis of what ails them, a celebration of their strengths, and a compelling and generous prescription for their future—and ours." —Henry Louis Gates, Jr., Alphonse Fletcher University Professor, Harvard University "Through this captivating portrait of the aspirations, values, and unique needs of today's college students, Levine and Dean's clearly written and engaging book ought to generate a national discussion of how higher education can be restructured in order to respond to and prepare the next generation of college-educated adults—not only for effective functioning in the workplace, but also to live lives as whole human beings who can help to lead our society to a healthier place." —Alexander W. Astin and Helen S. Astin, Distinguished Professors of Higher Education emeriti, UCLA; authors, *Cultivating the Spirit: How Higher Education Can Enhance Students' Inner Lives* "I can't say enough about how important this work is. This book is right on the mark for what needs to be known and understood about today's college students by those who are responsible for educating the future leaders and citizens of the world." —Gwen Dungy, executive director, emeritus, NASPA, Student Affairs Administrators in Higher Education "Generation on a Tightrope: A Portrait of Today's College Student is a must-read for college presidents, administrators, and professors as well as parents, employers, and government leaders—who all have a stake in student success. Understanding who today's college students are is essential as we collaboratively develop and deliver the education that will prepare this generation to build our future." —Nancy L. Zimpher, chancellor, State University of New York

Conrad is a huge and fluffy dog with brown fur. Harry is a tiny, hairless lizard with rubbery skin. They are best friends. On a cloudy day like today, Conrad and Harry like to lie down on the ground to watch the clouds. So turn the page and find out what happens.

#### **Handbook of Youth Economy** Writers of the Round Table

How young people think about the moral and ethical dilemmas they encounter when they share and use online content and participate in online communities. Fresh from a party, a teen posts a photo on Facebook of a friend drinking a beer. A college student repurposes an article from Wikipedia for a paper. A group of players in a multiplayer online game routinely cheat new players by selling them worthless virtual accessories for high prices. In *Disconnected*, Carrie James examines how young people and the adults in their lives think about these sorts of online dilemmas, describing ethical blind spots and disconnects. Drawing on extensive interviews with young people between the ages of 10 and 25, James describes the nature of their thinking about privacy, property, and participation online. She identifies three ways that young people approach online activities. A teen might practice self-focused thinking, concerned mostly about consequences for herself; moral thinking, concerned about the consequences for people he knows; or ethical thinking, concerned about unknown individuals and larger communities. James finds, among other things, that youth are often blind to moral or ethical concerns about privacy; that attitudes toward property range from "what's theirs is theirs" to "free for all"; that hostile speech can be met with a belief that online content is "just a joke"; and that adults who are consulted about such dilemmas often emphasize personal safety issues over online ethics and citizenship. Considering ways to address the digital ethics gap, James offers a vision of conscientious connectivity, which involves ethical thinking skills but, perhaps more important, is marked by sensitivity to the dilemmas posed by online life, a motivation to wrestle with them, and a sense of moral agency that supports socially positive online actions.

Have you often wondered, "What's wrong with this younger generation?" Or, "Why are these younger workers so lazy?" How about this one, "How do I get these Millennials to work harder?" If you still think that you can change the Millennials to make them fit into your business model, you, my friend, are wrong. We have to think on a bigger scale, and answer the question "How can we use this generation's strengths to make our business better?" In this minibook instead of trying to find ways to get this generation to stop acting the way they do, we figure out ways to inspire them to work harder no matter how they act. The tips and tricks in this book not only work for Millennials but can be used to inspire others in your employ as well. Put these ideas and beliefs into practice quickly and thoroughly, and watch your business grow not just fiscally but in emotional bonds as well. Your staff won't just respect you, they will follow you! The best way to read the book is with your current business trends and office staff in mind.
