There is perhaps no political figure in modern history who did more to secure and protect the Indian nation than Sardar Vallabhbhai Patel. But, ironically, seventy years after Patel brought together piece by piece the map of India by fusing the princely states with British India to create a new democratic, independent nation, little is understood or appreciated about Patel's enormous contribution to the making of India. Caricatured in political debate, all the nuances of Patel's difficult life and the daring choices he made are often lost, or worse, used as mere polemic. If Mahatma Gandhi was the spiritual core of India's freedom struggle and Jawaharlal Nehru its romantic idealism, it was Sardar Patel who brought in the vital pragmatism which held together the national movement and the first ideas of independent India. A naturally stoic man, Patel, unlike

Gandhi or Nehru, wrote no personal history. He famously argued that it was better to create history than write it. This is why even his deepest misgivings and quarrels have been easily buried. But every warning that Patel left for India - from the dangers of allowing groups to create private militias to his thoughtful criticism on India's approach to Kashmir, Pakistan and China - are all dangerously relevant today. It is impossible to read about Patel, who died in 1950, and not feel that had he lived on, India might have been a different country. It is also impossible to ignore Patel and understand not only what the idea of India is but also what it could have been, and might be in the future. The Man Who Saved India is a sweeping, magisterial retelling of Sardar Patel's story. With fiercely detailed and pugnacious anecdotes, multiple award-winning, best-selling writer Hindol Sengupta brings alive Patel's determined life of struggle and his furious commitment to keep India safe. This book brings alive all the arguments, quarrels and clashes between some of the most determined people in Indian history and their battle to carve out an independent nation. Through ravages of a failing body broken by decades of abuse in and outside prison, Patel stands out in this book as the man who, even on his death bed, worked to save India. Hindol Sengupta's The Man

Who Saved India is destined to define Patel's legacy for future generations.

Financialisation, or the disproportionate importance of financial considerations in economic decisions, has been a defining feature of the economic history of the last twenty-five years. The wave of deregulation that accompanied the neoliberal agenda in the US, aided by the dominance of US dollar and American economy, has resulted in the globalisation of finance. This book examines the rise of financialisation globally, while charting its drawbacks and prescribing suggestions for a definitive overhaul of the structure. Bringing together various strands of the latest research and evidence generated in recent years, empirical analysis, and views of reputed experts in the field, it presents a counter-point to the canonical ideas of analysing financial market dynamics and financial globalisation. It proposes a revision of the current monetary policy paradigm to correct its excessive focus on equity markets and their 'wealth effect', embrace a more symmetric response to the economic cycle, and a mandate to focus on financial stability as much as price stability.

In the early twentieth century, Adivasi villages typically comprised small wooden huts amid a thickly forested landscape. Today, Adivasi dwellings are larger, more permanent, built of mud and often covered with elaborate murals. Drawing out stories of everyday lives that have largely remained hidden from history, *In Forest, Field and Factory: Adivasi Habitations through Twentieth Century India* uncovers how and why Adivasi dwellings changed, and what it reveals about communities' relationships with their environments. The book focuses on Santals, one of the largest Adivasi communities in eastern India, who are particularly renowned for precision and craftsmanship in domestic architecture and mural art. Why did Santal families shift from using wood to building with mud? How did different Santal villages develop distinctly different mural art traditions? In answering these questions, a new kind of historical narrative emerges—one that is not about buildings alone but also provides insights into Adivasi people's lives and their engagements with social, environmental and historical environments via architecture. This book will be of equal interest to students and scholars of architecture, history, environment studies and anthropology.
