Daily Life in a Medieval Monastery

Routledge

A year in the life of a peasant woman in medieval England is vividly evoked in this extraordinary portrait of Marion, a carpenter's wife, and her extended family. Based on years of research, Ann Baer brings to life the reality of a world

that has been lost. Rising before dawn in a tiny village to a day of gruelling hard work, Marion and her husband face the daily struggle for survival. Starvation is never far away and travel to the next village is virtually unheard of. Existing without soap, paper or glass and with only the most basic of tools, sickness, fire and natural disaster ever threaten to engulf the small, tightly knit community. At the mercy of the weather and the Lord of the Manor, each equally unpredictable and inescapable, Marion's life is burdensome but also displays an admirable dignity and fortitude in the face of adversity. The little village is at one with the natural world around it and each member has a role to play and a place in the hierarchy. Simple people, living unrecorded lives in remote villages

not on the way to anywhere are brought back into focus in *Medieval Woman*. Ann Baer defines and celebrates the woman at the heart of the community. This is a unique approach to history, compressing decades of in-depth research on the Middle Ages into one single, immersive, compelling narrative.

The Middle Ages Bloomsbury Publishing Examines the life and work of the people who lived and worked between the reign of Charlemagne and the coming of the Renaissance.

Death in Medieval Europe Harper Collins Monasteries are among the most intriguing and enduring symbols of Britain's medieval heritage. Simultaneously places of prayer and spirituality, power and charity, learning and invention, they survive today as

haunting ruins, great houses and as some of our most important cathedrals and churches. This book examines the growth of monasticism and the different orders of monks; the architecture and administration of monasteries; the daily life of monks and nuns; the art of monasteries and their libraries; their role in caring for the poor and sick; their power and wealth; their decline and suppression; and their ruin and rescue. With beautiful photographs, it illustrates some of Britain's finest surviving monastic buildings such as the cloisters of Gloucester Cathedral and the awe-inspiring ruins of Rievaulx Abbey in North Yorkshire.

For centuries, scholars have wondered

what daily life was like for the common people of Japan, especially for long bygone eras such as the ancient age (700–1150). Using the discipline of historical demography, William Wayne Farris shows that for most of this era, Japan's overall population hardly grew at all, hovering around six million for almost five hundred years. The reasons for the stable population were complex. Most importantly, Japan was caught up in an East Asian pandemic that killed both aristocrat and commoner in countless numbers every generation. These epidemics of smallpox, measles, mumps, and dysentery decimated the adult population, resulting in wide-ranging social and economic turmoil. Famine recurred about once every three years, leaving large proportions of the

populace malnourished or dead. Ecological degradation of central Japan led to an increased incidence of drought and soil erosion. And war led soldiers to murder innocent bystanders in droves. Under these harsh conditions, agriculture suffered from high rates of field abandonment and poor technological development. Both farming and industry shifted increasingly to labor-saving technologies. With workers at a premium, wages rose. Traders shifted from the use of money to barter. Cities disappeared. The family was an amorphous entity, with women holding high status in a labor-short economy. Broken families and an appallingly high rate of infant mortality were also part of kinship patterns. The average family lived in a cold, drafty dwelling

susceptible to fire, wore clothing made of scratchy hemp, consumed meals just barely adequate in the best of times, and suffered from a lack of sanitary conditions that increased the likelihood of disease outbreak. While life was harsh for almost all people from 700 to 1150, these experiences represented investments in human capital that would bear fruit during the medieval epoch (1150-1600).

Clerical Households in Late Medieval Italy Edinburgh University Press

Canon law touched nearly every aspect of medieval society, including many issues we now think of as purely secular. It regulated marriages, oaths, usury, sorcery, heresy, university life, penance, just war, court procedure, and Christian relations with religious minorities. Canon

law also regulated the clergy and the Church, one of the most important institutions in the Middle Ages. This Cambridge History offers a comprehensive survey of canon law, both chronologically and thematically. Written by an international team of scholars, it explores, in non-technical language, how it operated in the daily life of people and in the great political events of the time. The volume demonstrates that medieval canon law holds a unique position in the legal history of Europe. Indeed, the influence of medieval canon law, which was at the forefront of introducing and defining concepts such as 'equity,' 'rationality,' 'office,' and 'positive law,' has been enormous, long-lasting, and remarkably diverse.

To Live Like a Moor traces the many shifts in Christian perceptions of Islam-associated ways of life which took place across the centuries between early Reconquista efforts of the eleventh century and the final expulsions of Spain's converted yet poorly assimilated Morisco population in the seventeenth. "This book investigates daily life in Anatolia during the fourteenth century, the dawn of the Ottoman era, through the many ways in which humans experience food. This includes meals and the social interactions that they entail, of course, but also the production activities of peasants and gardeners, the

exchanges of food between the common folk, merchants and the state, and the religious landscape that unfolds around food-related beliefs and practices. Using an array of sources ranging from hagiographies to archaeology and from Sufi poetry to endowment deeds, the resulting study presents a broad picture of a society's daily life and worldviews through the multiplicity of its interactions with food, in a style that both scholars and non-specialists will enjoy"--

In the Middle Ages the household was such a fundamental part of the social structure that the post-1350 era has been termed 'the Age of the Household.' Academic studies have generally

focused on the grand, itinerant households of the wealthy aristocracy, illuminating the lifestyles and pastimes of this elite class. Using the household accounts of Alice de Bryene, a widowed gentlewoman, together with bailiffs' and stewards' reports from her home in Suffolk and other estates further afield, this richly detailed study paints a vivid portrait of the lives of ordinary people in the medieval countryside, of festivals and feast days, marriage and monuments, family loyalties and betrayals, life and death, the rhythms of the working day and year, and the changing scene in the wider world beyond the household. From the time of its birth in Mecca in the 7th century C.E., Islam and the Islamic world rapidly expanded outward, extending to Spain and West Africa in the west, and to Central Asia and the Indian Subcontinent in the east. An examination of the daily life in these Islamic regions provides insight into a civilized, powerful, and economically stable culture, where large metropolitan centers such as Damascus, Baghdad, and Cairo thrived in many areas, including intellectual and scientific inquiry. In contrast with medieval Europe, there is little common knowledge in the West of the culture and history of this vibrant world, as different

from our own in terms of the political, religious, and social values it possessed, as it is similar in terms of the underlying human situation that supports such values. This book provides an intimate look into the daily life of the medieval Islamic world, and is thus an invaluable resource for students and general readers alike interested in understanding this world, so different, and yet so connected, to our own.

This is Prof. Godfrey Wettinger's unfinished project; completed posthumously in celebration of Wettinger as the recipient of the

National Book Prize "Lifetime Achievement Award" for 2014. Common themes which bind the articles are the social and economic aspects of Maltese life in late Medieval Malta. Through these articles we get a glimpse of the various socio-economic traits of the Maltese and the Gozitans of the 15th and 16th centuries: a type of historiography which is rare to come by in the field of Medieval studies. The articles are based on research Wettinger has made of secular and religious courts at the Mdina Cathedral Archive. Instead of transcribing the court cases word for word, Wettinger describes them in a lucid and methodological manner and gives his own description and analysis of each case. Wettinger, who was one of Malta's foremost Medieval historians,

was quite aware of the lack of studies on social and economic aspects in Medieval studies and his wish to collect these articles into one book will in a way serve future historians as a new window from which to access and even address this historiographic gap.

Death Scripted and Death Choreographed ABC-CLIO

Everyday life in early thirteenth-century England is revealed in vivid detail in this riveting collection of correspondence of people from all classes, from peasants and shopkeepers to bishops and earls. The documents presented here include letters between masters and servants, husbands and wives, neighbors and enemies, and cover a wide range of topics: politics and war, going to fairs and going to law, attending tournaments

and stocking a game park, borrowing cash and doing favors for friends, investigating adultery and building a windmill. While letters by celebrated people have long been known, the correspondence of ordinary people has not survived and has generally been assumed never to have existed in the first place. Martha Carlin and David Crouch, however, have discovered numerous examples of such correspondence hiding in plain sight. The letters can be found in manuscripts called formularies—the collections of form letters and other model documents that for centuries were used to teach the arts of letter-writing and keeping accounts. The writing-masters and their students who produced these books compiled examples of all the kinds of

correspondence that people of means, members of the clergy, and those who handled their affairs might expect to encounter in their business and personal lives. Tucked among the sample letters from popes to bishops and from kings to sheriffs are examples of a much more casual, ephemeral kind of correspondence. These are the low-level letters that evidently were widely exchanged, but were often discarded because they were not considered to be of lasting importance. Two manuscripts, one in the British Library and the other in the Bodleian Library, are especially rich in such documents, and it is from these collections that Carlin and Crouch have drawn the documents in this volume. They are presented here in their first printed edition, both in the original Latin

and in English translation, each document splendidly contextualized in an accompanying essay.

The Writer's Guide to Everyday Life in the Middle Ages Michael O'Mara Books

This volume presents Europe-wide perspectives on urban life in medieval Europe through the study of artefacts and environmental remains. Artefacts and environmental remains are abundant from archaeological excavations across Europe, but until now they have most commonly been used to accompany broader narratives built on historical sources and studies of topography and buildings, rather than being studied as important evidence in their own right. The papers in this volume aim to redress the balance by taking an environmental and artefact-

based approach to life in medieval Europe. The contributions included here address central themes such as urban identities, the nature of towns and their relationship with their hinterlands, provisioning processes, and the role of ritual and religion in everyday life. Case studies from across Europe encourage a comparative approach between town and country, and provide a pan-European perspective to current debates. The volume is divided into four key parts: an exploration of the processes of provisioning; an assessment of the dynamics of urban population; an examination of domestic life; and a discussion of the status quo and future potential of urban environmental archaeology. Together, these sections make a significant

contribution to medieval archaeology and offer new and unique insights into the conditions of everyday life in medieval Europe.

A Medieval City

University of Pennsylvania Press

Between the Celtic tribe of the Iron Age—the Cantiaci—and the twenty-first-century inhabitants of Canterbury, three millennia stand during which the city has enjoyed unparalleled fame, particularly since it became the religious heart of the country in AD 597. While ambling

through the streets of modern Canterbury, one is able to—if careful enough to do so—get the feel of the medieval city. There must be reasons for that enduring impact of the past and it might be because of the overwhelming wealth of people who have left their mark as well as events of momentous importance that took place there.

Canterbury: A Medieval City will take the reader on a trip through time, space and history, as well as literature. It will enable him to apprehend the magnitude of the history of the place and the reasons why Canterbury has become the magnet it is nowadays for people from all over the world, the “mecca for tourists” as it is advertised on some websites. While illustrious figures are dealt with in the articles contained in the

book, such as Saint Augustine, Thomas Becket, and Geoffrey Chaucer—who account for the renown of the place and have indeed helped to shape national identity—it is also possible to catch a glimpse of the less notorious personalities and facts that have also worked to give Canterbury its deeply ingrained identity: people like priors, as well as the many different ways which the city functioned.

The Cambridge History of Medieval Canon Law Life in a Medieval City

A vast array of images and vignettes depicts the everyday hardships and commonplace pleasures of people living in the thirteenth and fourteenth centuries in a dawn-to-dark account of life in the late Middle Ages that captures the era's religious, economic,

institutional, educational, leisure, cultural, and social practices and institutions.

From the Anglo-Saxons to the Tudors A&C Black

This book examines the ordinary, routine, daily behaviour, experiences and beliefs of people in Scotland from the earliest times to 1600. Its purpose is to discover the character of everyday life in Scotland over time and to do so, where possible, within a comparative context. Its focus is on the mundane, but at the same time it takes heed of the people's experience of wars, famine, environmental disaster and other major causes of disturbance, and assesses the effects of longer-term processes of change in religion, politics, and economic and social affairs. In showing

how the extraordinary impinged on the everyday, the book draws on every possible kind of evidence including a diverse range of documentary sources, artefactual, environmental and archaeological material, and the published work of many disciplines. The authors explore the lives of all the people of Scotland and provide unique insights into how the experience of daily life varied across time according to rank, class, gender, age, religion
