Lippincott  
Williams &  
Wilkins  
This is new  
edition of the  
book  
previously  
called Acute  
Clinical  
Medicine in  
the highly  
popular Kumar

and Clark  
family. Cases  
in Clinical  
Medicine  
covers in  
handbook  
form the  
complete  
range of acute  
medical  
conditions and  
problems that  
junior doctors  
are likely to  
encounter  
during the

first years of  
training. It is  
divided into  
chapters  
reflecting core  
medical  
specialties -  
including  
infectious  
diseases; STD;  
gastroenterolo  
gy; etc. Each  
chapter is  
then  
subdivided  
into case-

based problems, such as (for example) pyrexia of unknown origin (under the Infectious Disease Group), HIV/Aids (under STD) and Vomiting and Weight Loss (under Gastroenterology). Each problem follows a standard pattern or template: it begins with a case history, and is accompanied by short, succinct text divided up by headings such as 'What are the

commonest causes of...'; What factors predispose to...' Where relevant there are also sections on pathology, pathophysiology and prognosis. Important points to note in the acute context are picked out in boxes ('Beware', 'Remember!' and 'Information') as are vital investigations. More than 200 cases Remember! boxes Investigations boxes Information boxes More

than 200 cases. Kumar & Clark's Cases in Clinical Medicine E-Book CRC Press Prepared by residents and attending physicians at Massachusetts General Hospital, this pocket-sized looseleaf is one of the best-selling references for medical students, interns, and residents on the wards and candidates reviewing for internal medicine board exams. In bulleted lists, tables,

and algorithms, Pocket Medicine provides key clinical information about common problems in internal medicine, cardiology, pulmonary medicine, gastroenterology, nephrology, hematology-oncology, infectious diseases, endocrinology, and rheumatology. This Fifth Edition is fully updated and includes a sixteen-page color insert with key and classic abnormal images. If you purchased a copy of Sabatine: Pocket Medicine 5e, ISBN 978-1-4511-8237-8, please make note of the following important correction on page 1-36: Oral anticoagulation (Chest 2012;141:e531S; EHJ 2012;33:2719; Circ 2013;127:1916) All valvular AF as stroke risk very high Nonvalv. AF: stroke risk ~4.5%/y; anticoag ® 68% ↓ stroke; use a risk score to guide Rx: CHADS2: CHF (1 point), HTN (1), Age =75 y (1), DM (1), prior Stroke/TIA (2) CHA2DS2-VASc: adds 65+74 y (1) =75 y (2), vasc dis. [MI, Ao plaque, or PAD (1)]; ? (1) score <sup>3</sup>2 ® anticoag; score 1 ® consider anticoag or ASA (? latter reasonable if risk factor age 65-74 y, vasc dis. or ?); antithrombotic Rx even if rhythm control [SCORE CORRECTED] Rx options: factor Xa or

direct thrombin inhib (non-valv only; no monitoring required) or warfarin (INR 2-3; w/ UFH bridge if high risk of stroke); if Pt refuses anticoag, consider ASA + clopi or, even less effective, ASA alone (NEJM 2009;360:206 6) Please make note of this correction in your copy of Sabatine: Pocket Medicine 5e immediately and contact LWW,,s Customer Service Department at 1.800.638.303

0 or 1.301.223.230 0 so that you may be issued a corrected page 1-36. You may also download a PDF of page 1-36 by clicking [HERE](#). All copies of Pocket Medicine, 5e with the ISBN: 978-1-4511-9378-7 include this correction.

**250 Cases in Clinical Medicine E-Book** CRC Press  
It is vitally important for medical students and junior doctors to grasp an understanding of 'real-life

medicine'. This innovative book of cases shows how a particular presentation may progress, and the different complications that may arise and emerge over time, which may be missed by the 'snapshot in time' approach taken by many problem-based volumes. The content reflects the average length of stay for a patient in hospital, in which their situation can

change in a multitude of ways, and the management of chronic conditions may also need to be adapted as complications arise. Demonstrates the real bedside experiences that medical students can expect, in whichever simple or complex way that they may present. Cases selected from a range of sub-specialties for comprehensive coverage across the curriculum. Illustrates the

complicated, progressive problems that will be seen while practicing as a doctor with detailed diagrams and diagnostic imagery to aid understanding. Shows, with timepoints, how differential diagnoses may change as more information becomes available and new symptoms arise. Describes a typical initial hospital stay, and subsequent presentations to the general

practitioner and hospital readmission. The Authors Andrew Solomon, BM BCH MA(Hons) DM FRCP, is a Consultant Physician, East and North Hertfordshire NHS Trust, Stevenage, UK. Julia Anstey, BSc (Hons) MBBS, is a Foundation Doctor, Somerset NHS Foundation Trust, Taunton, UK. Liora Wittner, MBBS BSc, is a Resident in Internal Medicine, Shamir Medical

Centre, Be'er Ya'akov, Israel. With contributions from Priti Dutta, MBBS BSc FRCR, Consultant Radiologist, Royal Free London NHS Foundation Trust, London, UK.

*Cases in Clinical Medicine*

Elsevier

This concise yet comprehensive pocketbook makes basic lipid metabolism and the main principles of lipid-lowering treatment comprehensible to the reader without

over-simplification.

Short Cases in Clinical Exams of Internal Medicine

Elsevier Health Sciences

A new, fully updated edition of Baliga's very popular collection of short cases arranged by clinical area, emphasising the key diagnostic features of clinical conditions as commonly presented in the short-case part of the Final MB and MRCP examinations. Also included

are likely instructions or commands expected from the examiner for each condition, and the key points which the candidate must tell the examiner. A must-have for the final-year undergraduate and trainee doctor. From customer reviews of the previous edition: 'This book is the most useful guide that money can buy for the final exams in the current MBChB undergraduate course. It covers

important areas of clinical medicine in a question based format and highlights classical scenarios. The questions raised are classical of examiners in the long and short case examinations. This is a must buy for any undergraduate medical student!!!  
 'The book is a must during the period that the young doctor or student is on the wards. It allows one to focus on the important physical

findings and the relevant clinical pearls associated with the different medical conditions met... It discusses important physical findings and their diagnostic importance. I have found it useful in preparing for attending ward rounds and also for sharpening my clinical skills. The discussion section is well organised such that undergraduates as well as postgraduates

can benefit and the material is up to date with good references for further reading.'  
 'Excellent preparation for finals as well the MRCP ...MUST HAVE before MRCP PACES.'  
 Features Ideal for use in the ward. Each of the 250 cases presents a disease or topic which is covered consistently to address: ● salient features ● history ● examination ● diagnosis ● questions covering

investigations and differentiation  
 ● advanced-level questions ● management.  
 New to this edition: Over 350 new images  
 Enhanced advanced-level questions  
 Many more tables

 Oxford University Press  
 Internal medicine is the medical specialty dedicated to the diagnosis and medical treatment of adults. A

physician who specialises in internal medicine is referred to as an internist. Subspecialties of internal medicine include allergy and immunology, cardiology, endocrinology, haematology, infectious diseases, gastroenterology, nephrology, oncology, pulmonology, and rheumatology (MedicineNet.com). Presented as case studies, this book discusses 29 disorders that physicians

may encounter in daily practice. Each case is described in a step by step format, by history, physical examination, diagnosis techniques and treatment options. Key learning points are summarised at the end of each case. The book covers both common and more unusual cases with an emphasis on common clinical symptoms, presented in question format. Tables,

flowcharts and photographs enhance the understanding of key concepts. Key points 29 case studies presenting common and unusual disorders seen in daily practice Each case described in step by step format Emphasis on common clinical symptoms presented in question format Tables, flowcharts and photographs enhance learning

**Interesting Cases in**

**Clinical Medicine**  
CRC Press  
Written by authors who are hospitalists and clinician-educators, Cases in Hospital Medicine uses practical case studies and current medical evidence to guide you expertly through the types of cases seen most often by practicing hospital-based clinicians. This engaging handbook covers the wide range of both broad and specific

knowledge required in the hospital environment, while focusing on highly relevant questions and today's best practices. You'll find real-world guidance on essential topics, including commentary on research studies and clinical guidelines. \ *Clinical Cases* Jaypee Brothers, Medical Publishers Pvt. Limited Oxford Cases in Medicine and Surgery, second edition, teaches

students a logical step-by-step diagnostic approach to common patient presentations. This approach mirrors that used by successful clinicians on the wards, challenging students with questions at each stage of a case (history-taking, examination, investigation, management). In tackling these questions, students understand how to critically analyse

information and learn to integrate their existing knowledge to a real-life scenario from start to finish. Each chapter focuses on a common presenting symptom (e.g. chest pain). By starting with a symptom, mirroring real life settings, students learn to draw on their knowledge of different physiological systems - for example, cardiology, respiratory, gastroenterology - at the same time. All

the major presenting symptoms in general medicine and surgery are covered, together with a broad range of pathologies. This book is an essential resource for all medicine students, and provides a modern, well-rounded introduction to life on the wards. Ideal for those starting out in clinical medicine and an ideal refresher for those revising for OSCEs and finals. *100 Cases in Clinical*

**Case Studies in Internal Medicine**  
 Jaypee Brothers Medical Publishers  
 Real-life primary care case studies\*

from more than 50 primary care providers, including physician assistants, nurse practitioners, and physicians! 101 Primary Care Case Studies offers real-life patient scenarios and critical thinking exercises to help you work through a patient's chief complaint. Through narrative case studies, you will determine how best to diagnose, treat, and manage your

patient based on the history of present illness, review of systems, relevant history, and physical examination findings. This workbook will ask probing questions to help you determine differential and most likely diagnoses, diagnostic tests to order, and appropriate patient management strategies using relevant and timely references to support your decisions. The organization

of each case study simulates the patient care journey from chief complaint to outcome. Serving as a virtual clinical preceptor, this workbook can be used independently or in a classroom setting. It is accompanied by a robust online student supplement that provides answers to all questions, real outcomes of the cases, and valuable personal insights from the authors on how the patient was

successfully managed. Not only will this workbook help you work through patient cases clinically, it will also share important, but often overlooked, bedside manner skills needed to successfully communicate with and care for your patients. Covering conditions across all organ systems and across the lifespan, this workbook is organized by chief complaint, providing an authentic

perspective on what to expect in the patient care environment. It even includes information on pathophysiology and how to use ICD-10 and CPT (E/M) codes in your documentation. The book uniquely weaves together both the science and art of medicine by including personal insights into quality and compassionate care. Key Features  
Provides real-life patient cases from an interprofessio

nal author team of physician assistants, nurse practitioners, and physicians  
Uses a templated case study design and critical thinking exercises to help you methodically work through various patient scenarios  
Teaches clinical and bedside manner skills imperative for delivering quality patient care  
Covers patients across the lifespan,

including pediatric, adolescent, adult, and geriatric populations Offers additional insight on patient education, medical and legal concerns, and interprofessional collaboration Includes a robust online student supplement with valuable insights from the authors on how they successfully managed the cases Provides instructors with a table of contents that is filterable by

chief complaint, diagnosis, patient population, and organ system \*Details changed to protect patient information. **A Step-by-Step Approach** Elsevier Health Sciences Presents trainees with detailed clinical cases for numerous diseases and disorders covering various body systems including respiratory, gastroenterology, neurology

and haematology. Questions and answers are provided at the end of each case. 100 Cases in Emergency Medicine and Critical Care Bailliere Tindall Limited Offering step-by-step guidance on how to properly document patient care, this updated Second Edition presents 90 of the most common clinical problems encountered on the wards and clinics in an easy-to-

read, two-page layout using the familiar "SOAP" note format. Emphasizing the patient's clinical problem, not the diagnosis, this pocket-sized quick reference teaches both clinical reasoning and documentation skills and is ideal for use by medical students, Pas, and NPs during the Family Medicine rotation.

**Lipid Disorders**

Elsevier India  
A 32-year-old  
Caucasian

lady was admitted to hospital following a collapse at the gym. Her friends described the patient falling to the floor while exercising on the rowing machine, followed by twitching of her arms and legs and a period of being unrousable. You are the medic on duty... 100  
Cases in Acute Medicine presents 100 acute conditions commonly seen by medical

students and junior doctors in the emergency department, or on the ward, or in the community setting. A succinct summary of the patient's history, examination, and initial investigations, including photographs where relevant, is followed by questions on the diagnosis and management of each case. The answer includes a detailed discussion of each topic, with further

illustration where appropriate, providing an essential revision aid as well as a practical guide for students and junior doctors. Making clinical decisions and choosing the best course of action is one of the most challenging and difficult parts of training to become a doctor. These cases will teach students and junior doctors to recognize important clinical symptoms and signs, and to

develop their diagnostic and management skills.

**Pocket  
Medicine**

Jaypee Brothers, Medical Publishers Pvt. Limited  
A helpful learning manual for undergraduates and PG students preparing for FCPS, MD, MRCP, FRACP or any other equivalent exam in Internal Medicine. A completely new section (Section B) is included. The first section (Section A) contains short clinical cases,

followed by relevant questions, their answers and brief discussions. Section B contains Data Interpretation, ECG, X-ray, coloured photograph of common diseases and few instruments, which are helpful for undergraduate students. An easy book to learn the approach to diagnosis and management of common short cases. Cases have been described in the way a student is

expected to approach a medical situation in examinations as well as in day-to-day practice. Provides short notes on various common diseases, which will help the students to get a comprehensive knowledge without going through extensive textbooks. Have about 700 colored photographs and a few X-rays, CT scans, etc. to help students to develop a good clinical eye. Easy to understand, concise, yet full of necessary information. *250 Cases in Clinical Medicine* Elsevier Health Sciences Davidson's 100 Clinical Cases was awarded First Prize in Medicine in the 2009 British Medical Association Medical Book Awards. This book reflects the real world in which doctors practise medicine. The selection of clinical problems guides the reader, step by step, through the correct path in the maze between the presenting complaint of a patient and the final diagnosis. The text emphasises the value of interpreting available clinical and investigative information in a logical way before considering a definitive diagnosis. The 100 cases are based on the 'presenting problems' of Davidson's Principles and Practice of Medicine. The

book provides an international outlook reflecting the differences in the practice of medicine in the developing world and in low-resource settings, and addresses the epidemiological, economic and other reasons for many of these important differences. The cases are written by a team of senior doctors, from 12 countries, with considerable teaching experience. The book now includes 100

cases all closely linked to the 'presenting problems' sections of the latest 21st Edition of Davidson's Principles and Practice of Medicine. In this expanded new edition there are many new cases including aluminium phosphide poisoning; occupational lung disease; tremor; and drug interactions. *Oxford Cases in Medicine and Surgery* McGraw Hill Professional This text

presents a collection of clinical cases arranged by clinical area, emphasising the key diagnostic features of clinical conditions as commonly presented in clinical examinations in general internal medicine. 200 Short Cases in Clinical Medicine CRC Press Medical curricula change continually to reflect the evolving roles of doctors, changes in treatments

and advances in technology. Medicine moves at pace and it takes a practitioner committed to continuing professional development to keep up. This new edition of 250 Cases in Clinical Medicine has been thoroughly updated to reflect the changing form of the Royal College of Physicians' curriculum. Some chapters from the previous edition have been dropped to allow new, more clinically

relevant topics to be included. Chapters of symptom-based cases have also been added, as well as a section on acute medical problems and their management. Essential reading for MBBS, PLAB, MRCP (UK), MRCPI, MD (New Zealand, Malaysia, Singapore, India, Pakistan, Sri Lanka and Bangladesh), FRACP, FCCP and postgraduate medical examinations in the USA

including USMLE and ABIM. New author team  
Cases alphabetised by system  
Procedures for the core medical curriculum added  
Symptoms-based cases added  
Emergency presentations added  
Self-assessment by system added
