The purpose of this book is to present recent studies in the field of multilingualism and L3, bringing together contributions from an international group of specialists from Austria, Canada, Germany, Portugal, Spain, Switzerland, Turkey, and United States. The main focuses of the articles are three: language acquisition, language learning and teaching. A collection of theoretical and empirical articles from scholars of multilingualism and language acquisition makes the book a significant resource as the papers present a wide perspective from main theories to current issues, reflecting new trends in the field. The authors focus on the heterogeneity and complexity that characterize third language acquisition, multilingual learning and teaching. As the issues addressed in this book intersect, it represents an asset and therefore the texts will be of great relevance for the scientific community. Part I presents different topics of L3 acquisition, such as syntax, phonology, working memory and selective attention, and lexicon. Part II comprises texts that show how the research on language acquisition informs pedagogical issues. For instance, the role of the knowledge of previous languages in the teaching of

L3, the attitudes of multilingual teachers to plurilingual approaches, and the benefits of crosslinguistic pedagogy versus classroom monolingual bias. In sequence, Part III consists of texts on individual learning strategies, such as motivation and attitudes, crosslinguistic awareness, and students' perceptions about teachers' "plurilingual nonnativism". All these chapters include several different languages in contact in an acquisition/learning context: Basque, English, French, German, Italian, Latin, Portuguese, Russian, Spanish, and Turkish.

 Examining local content law and policy
 in the oil and gas industry, this book
 uses Nigeria as a primary case study,
 comparing its approach to countries
 such as Brazil and Norway which have
 also adopted local content laws in
 relation to their gas and oil industries. In

considering various aspects of local
 content law and policy as they apply to
 the oil and gas industry, the book
 examines the factors behind the
 formulation of local content policies by
 petroleum producing states, and the
 various strategies they have employed
 to implement them. It analyses
 arguments against local content
 requirements from the perspective of
 international trade and investment law,
 and from liberal market economic
 theorists, who argue against its overall
 usefulness. The book highlights salient
 aspects of the oil and gas industry such
 as regulation, national oil companies,
 treatment of minorities, and policy
 formulation and implementation.

National Security, Personal Privacy and the Law Disha Publications

There have been significant changes in public attitudes towards surveillance in the last few years as a consequence of the Snowden disclosures and the Cambridge Analytica scandal. This book re-evaluates competing arguments between national security and personal privacy. The increased assimilation between the investigatory powers of the intelligence services and the police and revelations of unauthorised surveillance have resulted in increased demands for transparency in information gathering and for greater control of personal data. Recent legal reforms have attempted to limit the risks to freedom of association and expression associated with electronic surveillance. This book looks at the background to recent reforms and explains how courts and the legislature are attempting to effect a balance between security and personal liberty within a social contract. It asks what drives public concern when other aspects seem to be less contentious. In view of our apparent willingness to post on social media and engage in online commerce, it considers if we are truly consenting to a loss of privacy and how this reconciles with concerns about state surveillance.

This book analyzes the rhetoric of Donald Trump to argue that Trump embraces conflicting populist and Republican values, and as a result has relied on populist and polarizing rhetoric, along with fabricated crises, to reconcile these combating ideals and uphold his image of an “anti-status quo politician.” Rhetoric and Governance Under Trump Disha Publications

Sociological perspectives can be used to analyse societal and structural influences on human behaviour at individual, group and community levels. The authors link sociological concepts, debates and theories relating to key areas such as poverty, social exclusion, education, social class and social justice to develop your students’ understanding of how sociological perspectives will impact upon their social work placements and practice. This book begins by taking students step-by-step through the ins and outs of why sociology is important to social work. It explains the relevance of sociology to everyday social work practice, introducing students to the core sociological perspectives that they’ll need to get to grips with during their course, including functionalism, Marxism, symbolic interactionism and postmodernism. The book then moves

on to explore various social issues in detail (i.e. poverty, social class, social exclusion, education, moral panics), with extended case studies, activities and links to skills in practice illustrating the many opportunities and challenges that each aspect brings to everyday practice. There are also important chapters on family, community and the role of sociology in social work training.

Making extensive use of archival materials by Sylvia Plath, John Berryman, and Anne Sexton, Amanda Golden reframes the relationship between modernism and midcentury poetry. While Golden situates her book among other materialist histories of modernism, she moves beyond the examination of published works to address poets' annotations in their personal copies of modernist texts. A consideration of the dynamics of literary influence, *Annotating Modernism* analyzes the teaching strategies of midcentury poets and the ways they read modernists like T. S. Eliot, James Joyce, Ezra Pound, Virginia Woolf, and W. B. Yeats. Situated within a larger rethinking of modernism, Golden's study illustrates the role of midcentury poets in shaping modernist discourse.
