Wong's Nursing Care of Infants and Children - Text and Virtual Clinical Excursions Online Package Elsevier Health Sciences
 For courses in Pediatric Nursing. A comprehensive survey of family-centered pediatric nursing care Child Health Nursing: Partnering with Children & Families promotes excellence in nursing care for infants, children, and adolescents--in hospitals and in the community. It focuses on the importance of partnering with families to adapt care plans for children based on their age, health status, and

social and cultural influences. The text considers the impact of contemporary care environments on nursing practice, both in health promotion and in the care of children with acute or chronic health conditions. By offering industry best practices and practical applications, the book encourages students to apply evidence-based findings and clinical reasoning to planning superior care. The updated 3rd edition explains how modern nursing practice is affected by reforms to healthcare and its delivery—such as electronic health records, new approaches to chronic and acute condition management, and a focus on prevention. To support safe, effective, and innovative care, this edition draws on the latest recommendations of NANDA International diagnoses, Nursing Intervention Classifications (NIC), Nursing Outcomes Classifications (NOC), and Healthy People 2020. Also available with MyLab Nursing MyLab(tm) Nursing is an online self-study and class preparation program designed to engage students and improve results. Its personalized learning path helps students think like nurses as they move beyond memorization to true understanding through application. Learn more. Child Health Nursing Mosby

The leading text in pediatric nursing, Wong's Nursing Care of Infants and Children takes a unique, easy-to-understand developmental approach to describe the care of children at each age and stage of development. Childhood diseases and disorders are organized by age groups and body systems, and described through the nursing process framework. This edition includes updates on topics such as the new CPR guidelines, immunizations, and pain assessment and management. Written by pediatric experts, Dr. Marilyn Hockenberry and David Wilson, each with nearly 30 years of hands-on experience, this bestseller provides an evidence-based, clinical perspective that shows how the quality of nursing care can impact quality patient outcomes. A developmental approach addresses the differences at each stage of the child's growth and enables you to individualize care at the appropriate level for each child. UNIQUE! Quality Patient Outcomes are discussed for major childhood diseases and disorders, showing how nursing care directly impacts patient outcomes. Nursing Care Plans provide models for planning patient care, with rationales explaining why specific nursing interventions have been chosen, and include nursing diagnoses, patient/family goals, nursing interventions/rationales, expected outcomes, and NIC and NOC guidelines. A focus on family-centered care emphasizes the role and influence of the family in health and illness with a separate chapter and Family-Centered Care boxes. Critical thinking exercises use case studies to help you test and develop your own analytical skills. Nursing Care Guidelines provide clear, step-by-step, detailed instructions on performing specific skills or procedures. Nursing Tips include helpful hints and practical, clinical information, and Nursing Alerts provide critical information that must be considered in providing care. An emphasis on wellness includes principles of health promotion and injury prevention for each age group. Drug Alerts highlight important drug-related information for safe, appropriate care. Pathophysiology Reviews explain complicated disease processes with illustrated summary boxes. Complementary & Alternative Therapy boxes include timely information on alternative medicine as a part of complete, comprehensive care. Atraumatic Care boxes contain techniques for care that minimize pain, discomfort, or stress, and provide guidance for performing procedures in a caring manner. Emergency Treatment boxes serve as a quick reference in critical situations. NEW! NCLEX® exam-style review questions allow you to test your understanding of text content and practice answering application-based NCLEX questions. NEW! Translating Evidence into Practice and Applying Evidence to Practice boxes help you apply research to support, guide, and improve the outcomes of nursing care. UPDATED content includes the new CPR guidelines, pain assessment and management, immunizations, asthma, and updated interventions. NEW! Community and Home Health Considerations boxes focus on wellness information and illness-related topics.

Study Guide for Wong's Nursing Care of Infants and Children - E-Book Elsevier Health Sciences

The most trusted authority in pediatric nursing, Wong's Nursing Care of Infants and Children provides unmatched, comprehensive coverage of pediatric growth, development, and conditions. Its unique 'age and stage' approach covers child development and health promotion as well as specific health problems organized by age groups and body systems. Leading pediatric experts Dr. Marilyn Hockenberry and David Wilson provide an evidence-based, clinical perspective based on nearly 30 years of hands-on experience. Easy to read and extensively illustrated, this edition focuses on patient-centered outcomes and includes updates on topics such as the late preterm infant, immunizations, the H1N1 virus, and childhood obesity. A clear, straightforward writing style makes content easy to understand. Unique Evidence-Based Practice boxes help you apply both research and critical thought processes to support and guide the outcomes of nursing care. Unique Atraumatic Care boxes contain techniques for care that minimize pain, discomfort, or stress. Unique Critical Thinking exercises help you test and develop your own analytical skills. A unique focus on family content emphasizes the role and influence of the family in health and illness with a separate chapter, discussions throughout the text, and family-centered care boxes. Nursing Care Guidelines provide clear, step-by-step, detailed instructions on performing specific skills or procedures. Unique Emergency Treatment boxes serve as a quick reference for critical situations. Unique Cultural Awareness boxes highlight ways in which variations in beliefs and practices affect nursing care for children. A developmental approach identifies each stage of a child's growth. Health promotion chapters emphasize principles of wellness and injury prevention for each age group. Student-friendly features include chapter outlines, learning objectives, key points, references, and related topics and electronic resources to help you study and review important content. A community focus helps you care for children outside the clinical setting. Nursing Care Plans include models for planning patient care, with nursing diagnoses, patient/family goals, nursing interventions/rationales, expected outcomes, and NIC and NOC guidelines. Nursing Tips include helpful hints and practical, clinical information, and Nursing Alerts provide critical information that must be considered in providing care.

A Case-Based Approach with Expert Commentary Elsevier

Corresponding chapter by chapter to the completely reorganized and revised Wong's Nursing Care of Infants and Children, 11th Edition, this study guide helps you apply pediatric nursing concepts to real-world practice. It assesses, reinforces, and strengthens your understanding of pediatric nursing with learning activities, review questions, and case studies with critical thinking questions. Learning Key Terms — consisting of matching and fill-in-the-blank questions — test your ability to define all key terms highlighted in each textbook chapter. An answer key for the review questions and learning activities is included in the back of the study guide. Pages are perforated, so submitting assignments is easy. Reviewing Key Concepts and Content includes questions in various formats to provide you ample opportunity to assess your knowledge and comprehension of information covered in the text. Activities include matching, fill-in-the-blank, true/false, short answer, and multiple choice

to help you identify the core content of the chapter — and test your understanding upon completion of reading the chapter. Thinking Critically case-based activities require you to apply the concepts found in the chapters to solve problems, make decisions concerning care management, and provide responses to patient questions and concerns. Learning Key Terms consists of matching and fill-in-the-blank questions that let you test your ability to define all key terms highlighted in the corresponding textbook chapter. An answer key is included at the end of the Study Guide.

Perforated pages allow you to submit assignments to your instructor. NEW! Updated chapter organization and content matches revised and reorganized text.

Wong's Clinical Manual of Pediatric Nursing - E-Book Elsevier Health Sciences

As the #1 title in the pediatric nursing market for over 40 years, Wong's Essentials of Pediatric Nursing, 11th Edition continues to leverage its trademark developmental approach as it equips readers with the very latest research and guidelines for treating children today. The text utilizes a highly-readable writing style and encourages a whole-body approach — beginning with child development and health promotion to better understand the later chapters on specific health problems. This new eleventh edition also features Next Generation NCLEX®-style case studies and questions, a new chapter covering all systems cancers, additional case studies within the nursing care plans, and updated and expanded evidence-based content throughout to best reflect the latest standards and trends impacting pediatric nursing care today. Developmental approach clearly identifies developmental tasks and influences at each stage of a child's growth. Emphasis on wellness features health promotion chapters for each developmental stage of childhood. Critical thinking case studies with answers are found throughout the text. Quality patient outcomes are highlighted within nursing management discussions for major diseases and disorders. Drug alerts draw attention to potential safety issues, reflecting QSEN safety initiative. Family focus includes a separate family chapter as well as family content and Family-Centered Care boxes integrated throughout the text. Community Focus boxes provide resources and guidance on caring for children outside the clinical setting. Evidence-Based Practice boxes focus attention on the application of research and critical thought processes to support and guide the outcomes of nursing care. Chapter on complementary & alternative therapy cover timely topics to aid in providing complete, comprehensive care. Nursing care plans provide a model for planning patient care and include rationales that provide the "why." Research Focus boxes highlight current studies that impact pediatric nursing today. Cultural content and Cultural Considerations boxes are integrated throughout the text to draw attention to customs and beliefs of different cultures that influence childcare. Atraumatic Care boxes contain techniques for care that minimize pain, discomfort, or stress. Nursing tips offer helpful hints and practical, clinical information of a non-emergency nature. Nursing alerts feature critical information that MUST BE considered in providing care. Emergency Treatment sections provide a quick reference in critical situations. Nursing care guidelines provide clear, step-by-step instructions for performing specific skills or procedures.

Wong's Nursing Care of Infants and Children Elsevier Health Sciences

A comprehensive guide to the assessment, diagnosis, investigation and management of complex clinical scenarios in congenital cardiovascular medicine. Challenging Concepts in Congenital and Acquired Heart Disease in the Young contains a series of challenging concepts in paediatric cardiology covering all subspecialty areas including general paediatric cardiology, intervention, cardiac imaging, electrophysiology, heart failure and cardiomyopathies, cardiac devices, transplant medicine, epidemiology and foetal cardiology. Each case provides an in-depth review of current practice, the application of national and international guidelines and a summary of evidence from the medical literature. Data sets, investigation results and cardiac imaging give the reader a 'real-life' sense of being in the outpatient clinic, emergency room, cardiac intensive care unit, cardiac catheterisation laboratory or cardiac operating theatre. Every description is punctuated by 'Clinical Tips', 'Learning Points' and 'Landmark Trial Summaries' to enhance the learning process alongside an 'Expert Commentary' written by internationally-renowned leaders in the field of paediatric cardiology. This book will appeal to all those involved in the treatment of congenital patients; Paediatric Cardiology Trainees, Paediatricians with an interest in Cardiology, Adult Congenital Heart Disease (ACHD) Trainees, Paediatric Cardiology Consultants, ACHD Consultants, Congenital Paediatric Nurses, Congenital Adult Nurses, Cardiac Physiologists and Echocardiographers.
