A princess fights a faceless enemy in a forest filled with magic in this tale of “high-style fantasy and adventure” from the author of *Dealing with Dragons* (The New York Times). Trouble is brewing in Alkyra. While the kingdom’s noblemen squabble, on their borders an ancient enemy, the Lithmern, raises an army. As the head of the Noble House of Brenn attempts to organize an alliance, the princess Alethia celebrates her twentieth birthday. She is a remarkable woman: quick-witted, beautiful, and handy with a throwing knife. But on the next night, she passes through a dark corridor on her way to the banquet hall, and never emerges from the shadows. The Lithmern have kidnapped the princess. When Alethia regains consciousness, an evil Lithmern with a face made of shadows is carrying her through the forest. These are magic woods, home to fabled creatures whose existence she has always doubted. To find her way home, Alethia will have to learn to trust

in the old tales, whose legends of magic and daring hold the only hope of saving her kingdom.

For Marine Engineers and ETOs Infinity Publishing

A psychological thriller in the tradition of Patricia Highsmith about two couples caught in a web of conflicting passions while deep-sea diving off the beautiful Canary Islands In the late 1990s, Sven Fiedler and his girlfriend, Antje, left Germany for the island of Lanzarote, rejecting what Sven considered a vulgar culture of materialism and judgment. The young couple set up a diving service catering to tourists eager to bask in the warm sunshine and explore the silent, gleaming marine paradise that makes this otherwise barren volcanic island such a remarkable retreat. Sven's approach was simple: take the mechanics of diving seriously, instruct his clients clearly, and stay out of their personal business as best he can. And life on the island goes smoothly until two German tourists--Jola von der Pahlen, a daytime soap star on the verge of cinematic success, and Theo Hast, a stalled novelist--engage Sven for a high-priced, intensive two-week diving experience. Staying in a guest house on Sven and Antje's

property, the two visitors and their hosts quickly become embroiled in a tangle of jealousy and suspicion. Sven is struck by Jola's beauty, her evident wealth, and her apparently volatile relationship with the much older Theo. Theo quickly leaps to the conclusion that Sven and Jola are having an affair, but, oddly, he seems to facilitate it rather than trying to intervene. Antje, looking on, grows increasingly wary of these particular clients. As the point of view shifts from one character to the next, the reader is constantly kept guessing about who knows what, and, more important, who is telling the truth. A brutal game of delusion, temptation, and manipulation plays out, pointing toward a violent end. But a quiet one, down in the underwater world beneath the waves.

This thoroughly revised edition includes updated essays on cultural themes and literary analysis, and its new essays analyze the full scope of the seven-book series as both pop cultural phenomenon and as a set of literary texts. *Critical Perspectives on Harry Potter, Second Edition* draws on a wider range of intellectual traditions to explore the texts, including moral-theological analysis, psychoanalytic perspectives, and philosophy of technology. The Harry Potter novels engage the social, cultural, and psychological preoccupations of our times, and *Critical Perspectives on Harry Potter, Second Edition* examines these worlds of consciousness and culture, ultimately revealing how modern anxieties and fixations are reflected in these powerful texts. This is the ninth in the 300 series of circuit design books, again contains a wide range of circuits, tips and design ideas. The book has been divided into sections, making it easy to find related subjects in a single category. The book not only details DIY electronic circuits for home construction but also inspiring ideas for projects you may want to design from the ground up. Because software in general and microcontroller programming techniques in particular have become key aspects of modern electronics, a number of items in this book deal with these subjects only. Like its predecessors in the 300 series, "308 Circuits" covers the following disciplines and interest fields of modern electronics: test and measurement, radio and television, power supplies and battery chargers, general interest, computers and microprocessors, circuit ideas and audio and hi-fi.
