A complete investigation of the development and suppression of antigravity and field propulsion technologies • Reveals advanced aerospace technologies capable of controlling gravity that could revolutionize air travel and energy production • Reviews numerous field propulsion devices that have thrust-to-power ratios thousands of times greater than a jet engine • Shows how

NASA participates in a cover-up to block adoption of advanced technologies under military development In Secrets of Antigravity Propulsion, physicist Paul LaViolette reveals the secret history of antigravity experimentation--from Nikola Tesla and T. Townsend Brown to the B-2 Advanced Technology Bomber. He discloses the existence of advanced gravity-control technologies, under secret military development for decades, that could revolutionize air travel and energy production. Included among the secret projects he reveals is the research of Project Skyvault to develop an aerospace propulsion system using intense beams of microwave energy similar to that used by the strange crafts seen flying over Area 51. Using subquantum kinetics--the science behind

antigravity technology--LaViolette reviews numerous field-propulsion devices and technologies that have thrust-to-power ratios thousands of times greater than that of a jet engine and whose effects are not explained by conventional physics and relativity theory. He then presents controversial evidence about the NASA cover-up in adopting these advanced technologies. He also details ongoing Russian research to duplicate John Searl's self-propelled levitating disc and shows how the results of the Podkletnov gravity beam experiment could be harnessed to produce an interstellar spacecraft.

The biggest mystery of our era finally gets the balanced and unbiased investigation it deserves. 'ANTIGRAVITY PROPULSION: Human or Alien Technologies?' is a far-reaching exploration into the UFO phenomenon that covers all possible scenarios and discounts nothing. Written by novelists, filmmakers and independent researchers James Morcan & Lance Morcan, with a foreword by advanced interstellar propulsion systems expert Grant Hayman and an afterword by leading scientist and space industry veteran Dr. Takaaki Musha, one of the great enigmas of all time is examined with equal doses of open-mindedness and skepticism. This book includes never-before-mentioned accounts of popular UFO topics like Area 51, Roswell and alien abduction claims, as well as tackling less reported subjects such as Nazi and Japanese antigravity experiments and even rarer theories involving quantum physics and lost civilizations of the ancients. What do all the sightings of UFO's around the world reveal? Who is covering up the existence of these strange craft in our skies? And are the technologies manmade or extraterrestrial in origin?

Forget what you think you already know and prepare to be surprised. For those searching for the truth about these exotic technologies and wanting to know why they are being concealed from the public, ANTIGRAVITY PROPULSION is a must read.

In *Earth Under Fire*, Paul LaViolette investigates the connection between ancient world catastrophe myths and modern scientific evidence of a galactic destruction cycle, demonstrating how past civilizations accurately recorded the causes of these cataclysmic events, knowledge of which may be crucial for the human race to survive the next catastrophic superwave cycle.

The Alchemy of Creation Butterworth-Heinemann

NEWLY REVISED EDITION! HERE NOW -- IN THIS EXPANDED WORK -- ARE SOME OF THE MOST BIZARRE EXPERIMENTS CARRIED OUT BY THE WORLD'S GREATEST ELECTRICAL WIZARD UNDER THE MOST HUSH-HUSH OF CIRCUMSTANCES. EXPERIMENTS DEALING WITH. . . TIME TRAVEL, ALTERNATIVE AND FREE ENERGY, AS WELL AS A POSSIBLE NAZI "FLYING SAUCER" CONNECTION.

Nikola Tesla was the genius credited for creating much of modern, electrical technology. Yet, his contributions have been largely forgotten. An examination of Nikola Tesla's lost papers -- some of which were confiscated by the U.S. government after his death -- shows that Tesla was interested in and experimented with many concepts that have been regarded until recently as "wild ideas." It's no surprise that Tesla was loath to speak of these kinds of interests -- after all, even now these areas of study still come under fire by the majority of mainstream scientists who refuse to use their imaginations and intellect and scorn such matters with terms such as "voodoo science" and "unadulterated

quackery." It is now known that there have been a number of top-secret programs that were devoted to either investigating or, shockingly enough, actively using technology based on some of Tesla's more unorthodox ideas. Both the United States and Russia have active Particle Beam and RF (radio-frequency) weaponry that has been in operation since the early 1970s -- all as a result of Tesla's early 19th and 20th Century experiments. To say that there are other black budget projects involving Tesla-based research would vastly underestimate the total amount of research and development being conducted right now by many countries worldwide. And these are the projects that we know about. Who knows how many deep, dark, secret projects are being conducted right now with science that could be decades, even hundreds of years, beyond what civilian science knows about today? This work exposes such topics as: Reverse Gravity - Free Energy -- Contact With Hidden Dimensions -- Mysterious Radio Signals From Space -- Earth Changes -- Freak Weather Patterns -- Electric Death Rays -- UFOs -- Particle Beam Weapons and much, much more.

Reports on a New Propulsion Methodology Page Publishing Inc
This riveting work of investigative reporting and history exposes classified government projects to build gravity-defying aircraft-- which have an uncanny resemblance to flying saucers. The atomic bomb was not the only project to occupy government

scientists in the 1940s. Antigravity technology, originally spearheaded by scientists in Nazi Germany, was another high priority, one that still may be in effect today. Now for the first time, a reporter with an unprecedented access to key sources in the intelligence and military communities reveals suppressed evidence that tells the story of a quest for a discovery that could prove as powerful as the A-bomb. The Hunt for Zero Point explores the scientific speculation that a "zero point" of gravity exists in the universe and can be replicated here on Earth. The pressure to be the first nation to harness gravity is immense, as it means having the ability to build military planes of unlimited speed and range, along with the most deadly weaponry the world has ever seen. The ideal shape for a gravity-defying vehicle happens to be a perfect disk, making antigravity tests a possible explanation for the numerous UFO sightings of the past 50 years. Chronicling the origins of antigravity research in the world's most advanced research facility, which was operated by the Third Reich during World War II, The Hunt for Zero Point traces U.S. involvement in the project, beginning with the recruitment of former Nazi scientists after the war. Drawn from interviews with those involved with the research and who visited labs in Europe and the United States, The Hunt for Zero Point journeys to the heart of the twentieth century's most puzzling unexplained phenomena.

Whilst most contemporary books in the aerospace propulsion field are dedicated primarily to gas turbine engines, there is often little or no coverage of other propulsion systems and devices such as propeller and helicopter rotors or detailed attention to rocket engines. By taking a wider viewpoint, Powered Flight - The Engineering of Aerospace Propulsion aims to provide a broader context, allowing observations and comparisons to be made across systems that are overlooked by focusing on a single aspect alone. The physics and history of aerospace propulsion are built on step-by-step, coupled with the development of an appreciation for the mathematics involved in the science and engineering of propulsion. Combining the author's experience as a researcher, an industry professional and a lecturer in graduate and undergraduate aerospace engineering, Powered Flight - The Engineering of Aerospace Propulsion covers its subject matter both theoretically and with an awareness of the practicalities of the industry. To ensure that the content is clear, representative

but also interesting the text is complimented by a range of relevant graphs and photographs including representative engineering, in addition to several propeller performance charts. These items provide excellent reference and support materials for graduate and undergraduate projects and exercises. Students in the field of aerospace engineering will find that Powered Flight - The Engineering of Aerospace Propulsion supports their studies from the introductory stage and throughout more intensive follow-on studies.

A companion volume to 'Electrogravitics Systems: Reports on a New Propulsion Methodology', this book delivers: (1) the scientific validation from three different authorities; (2) the compelling public history of gravity research conducted by the aviation industry before it became 'unacknowledged' and (3) testimonials which eye-witnesses have provided. In total, this anthology attests to the validity of the Biefeld-Brown high voltage force effect. The book's Science Section includes a well-known 'electrokinetic force' and how it works; the proposed ion mobility explanation; and how electricity and gravity may couple. The Historical Section contains seven articles about T T Brown, gravity research, etc. Also included are a Testimonial Section and Patent Section.

"The U.S. Government has a new ground based "Star Wars" weapon which is being tested in the remote bush country of Alaska. This new system manipulates the environment which can: Disrupt human mental processes. Jam all global communications systems. Change weather patterns over large areas. Interfere

with wildlife migration patterns. Negatively affect your health. Unnaturally impact the Earth's upper atmosphere. The U.S. military calls its zapper HAARP (High-frequency Active Auroral Research Project). But this skybuster is not about the Northern Lights. This device will turn on lights never intended to be artificially manipulated. Their first target is the electrojet - a river of electricity that flows thousands of miles through the sky and down into the polar icecap. The electrojet will become a vibrating artificial antenna for sending electromagnetic radiation raining down on the earth. The U.S. military can then "X-ray" the earth and talk to submarines. But there's much more they can do with HAARP. This book reveals surprises from secret meetings"--Back cover.

The Ancient Science of Continuous Creation Anchorage, Alaska : Earthpulse Press

In a science fiction thriller set in modern America, a male alcoholic stoner obsessed with faster than light travel must evade and outsmart the near omniscient Project Luddite and It's All Seeing Eye to see his dream come true. Sample Chapter - Debunking the Debunkers I made my way from my bedroom where I had just steamrolled several hits of cannabis off of my bong, getting nice and high, to my home office. I went to Google first, I found an article called How I Control Gravitation by Thomas Townsend Brown. It discusses an experiment of his using two 44lb lead spheres suspended by a wire, positive for one sphere, negative for the other sphere with a glass rod in between the spheres. When 120kV of steady DC electricity was turned on Brown claims the apparatus moved in the direction from negative sphere to positive sphere. Now there are lifter builders out there

who will claim the Biefeld-Brown effect is nothing more than ion wind, electrically charged air, and that air flow is what lifts the craft into the air. They have even put lifters in a vacuum to show the propulsion effect will not work without air and would therefore be useless in the vacuum of space. Lifters are missing what appears to be a critical component, the dielectric between the positive and negative plates, in this example the glass rod or in the ARV the plastic, G10, or epoxy resin. Otherwise, for there to be movement of the 44lb spheres, Brown's lab would had to have a hurricane blowing through it. That does not seem likely. Occam's Razor says the simplest reason is the most likely one, even if that reason defies the known laws of physics. The experimental data trumps theory. Further research was required though. I found one paper, Twenty First Century Propulsion Concept:

<http://www.otherhand.org/wp-content/uploads/2012/04/Talley-paper-propulsion-concept.pdf>, in the Anomalies section, a series of experiments with pulsed voltages was done. Generally, no motion of the test devices was observed, except in Test No. 69 (the last test) where a very small but detectable motion was seen. The only experiment producing a result was when the 19kV was applied to the positive plate at a pulse rate frequency of 600 Hz with a solid dielectric between the capacitor plates that caused the torsion pendulum to twist ever so slightly, applying a small but consistent pressure. I took another break to smoke some more cannabis from my bowl. I calmly watched the smoke fill the room as I exhaled. Euphoria and certainty that I was onto something filled my mind like the smoke in the room. Another paper, Asymmetrical Capacitors for Propulsion:

<http://www.forbiddentechnology.org/pdfs/AsymmetricalCapacitorsforPropulsion.pdf>, in the Observations section detailed one of the experiments where movement was seen in a vacuum. Only the capacitor with a solid dielectric between the positive and negative capacitor plates moved in a vacuum when the 50kV steady DC was first applied to the positive capacitor plate. A rotation of about 1/8th was seen through the viewing port of the vacuum chamber. A spark accompanied the movement which stopped just after it started. The conductors of the experiment speculated that material had been ejected when the spark occurred and that that was why the capacitor moved. That seems unlikely to me, after all, why weren't there sparks and material ejected when the other capacitors were tested? Furthermore, if they had encased the Brown capacitor with epoxy that would have eliminated the spark and they would have been able to tell if the Brown capacitor would have still moved. The key appears to be high voltage, the higher the better, those last two experiments used 19kV and 50kV, Brown used 120kV steady DC, and the ARV supposedly used between 500kV - 1,000kV DC, pulsed into the capacitors.

Paul LaViolette reveals astonishing parallels between cutting edge scientific thought and early creation myths, and how these myths encode a theory of cosmology in which matter is continually growing from seeds of order that emerge spontaneously from chaos. Exposing the contradictions of the Big Bang theory, LaViolette leads us beyond the restrictive metaphors of modern science and into a new science for the 21st century.
