Mandalas represent the sacred circle. They emerge from the center of the Universe to extend fractally to infinity. House of the "bindu" or central point from which everything is born. In addition, they contain the four cardinal points and the secret of symmetry and perfection. Since ancient times the activity of painting mandalas has been carried out as a relaxation technique. Different oriental schools have developed this technique, since coloring mandalas has multiple benefits. Some of the benefits of coloring mandalas are: Relieve stress and anxiety, develop focus and concentration, provide serenity, and facilitate balance and peace of mind.

A San Francisco Chronicle and Kirkus Best Book of the Year A gorgeously unique, fully illustrated exploration into the phenomenology of reading—how we visualize images from reading works of literature, from one of our very best book jacket designers, himself a passionate reader. What do we see when we read? Did Tolstoy really describe Anna Karenina? Did Melville ever really tell us what, exactly, Ishmael looked like? The collection of fragmented images on a page—a graceful ear there, a stray curl, a hat positioned just so—and other clues and signifiers

helps us to create an image of a character. But in fact our sense that we know a character intimately has little to do with our ability to concretely picture our beloved—or reviled—literary figures. In this remarkable work of nonfiction, Knopf's Associate Art Director Peter Mendelsund combines his profession, as an award-winning designer; his first career, as a classically trained pianist; and his first love, literature—he considers himself first and foremost as a reader—into what is sure to be one of the most provocative and unusual investigations into how we understand the act of reading.
