Based on extensive customer feedback, DISCOVERING COMPUTERS ©2014 has been completely reexamined and revised to reflect the evolving needs of the concepts portion of the Introductory Computing course. This exciting new edition maintains many longstanding hallmarks, but is now highly focused on relevancy to provide students only with what they really need

to know to be successful digital citizens in college and beyond. To better reflect the importance of certain topics in today's digital world, coverage of enterprise computing, ethics, Internet research skills, mobile computing, operating systems (other than Windows), browsers, security, and Web 2.0 has been expanded and integrated. New critical thinking and problem solving exercises are included in every feature throughout the text, engaging students in regular practice of higher-order thinking skills. In addition, students have more opportunity for hands-on practice with the completely revised end-of-chapter activities. With these enhancements and

more, the new DISCOVERING COMPUTERS is an even more engaging teaching and learning tool for your classroom. [Introduction to Information Systems](#) Cengage Learning Think Sex Ed Is All About The "Facts of Life"? Think Again. If you think sex education is still about the birds and the bees, think again. And it's not about science either. In her shocking exposé, *You're Teaching My Child What?*, Dr. Miriam Grossman rips back the curtain on sex education today, exposing a sordid

truth. Today's sex ed programs aren't based on science; they're based on liberal lies and politically correct propaganda that promote the illusion that children (yes, children) can be sexually free without risk. As a psychiatrist and expert on sexual education, Dr. Grossman cites example after example of schools and organizations whitewashing—or omitting altogether—crucial information that doesn't fit in with their "PC" agenda. Instead, sex educators only tell teens the "facts of life" that promote acceptance, sexual exploration, and experimentation. What sex educators call an education, scientists would call a scam: • Sex educators won't

tell girls their bodies are biologically and chemically more susceptible to STDs; they will only say 3 million girls have a sexually transmitted infection • Educators say it's natural for children to "explore" their sexuality from a young age and only they can decide when it's right to have sex—the real truth is neurobiologists say teen brains are not developed to fully reason and weigh consequences, especially in "the heat of the moment" • Teens are told condoms, vaccines and yearly testing provide adequate protection, without being told that studies now show condoms are no match for herpes, HPV and gonorrhea In You're Teaching My Child

What?, Dr. Grossman reveals biological truths that you won't find in today's classrooms. You're Teaching My Child What? is critical reading for parents with teens and instrumental in teaching children the truth about sex.

This book shows students and practitioners how to develop social marketing programs through a simple, six-step process of strategic planning and design. Nedra Kline Weinreich starts by introducing the concept of social marketing and then walks the reader through each of the six steps of the process:

analysis, strategy development, program and communication design, pretesting, implementation, and evaluation and feedback. The Second Edition incorporates developments in marketing practice over the last 10 years and focuses on how to apply the design approach to campaigns to effect behavior change. All organizations can do social marketing, Weinreich insists, if they follow the steps and start to think from a social marketing perspective.
