BISHOP MAYO

Management Accounting: Decision and Control Workbook South-Western Pub

* Challenging and provocative book * Shows how management accounting techniques can be integrated into the strategic decision making process * Extensive use of practical examples from a variety of contexts. An introduction to business strategy for management accountants, financial accountants or managers with an accounting orientation. The book places management accounting clearly within the context of strategic management of the business. Offers qualified accountants a sound introduction to strategic management, and with practical examples and mini-cases provided throughout, this book is comprehensive yet concise. Keith Ward addresses strategic management accounting as a continuous process of analysis, planning and control. Management accounting is about supplying the right information to the right people at the right time, and this can only be expressed in the context of the business strategy and strategic plan. The implementation of appropriate management accounting systems to complement different strategies is discussed in detail. Applications and examples include multinational organizations, non-profit organizations and varying organizational structures. Finally the author covers methods of using management accounting for strategic advantage.

MANAGEMENT ACCOUNTING: COSTING AAT Professional Diploma in Accounting

The market-leading European text on management accounting and comprehensive authority on all aspects of the subject has been streamlined and substantially redesigned in its 6th edition to make it even more suitable for the needs of today's student. The aim of the new edition is to explain the principles involved in the design and evaluation of management and cost accounting information systems. The emphasis in the book is on management accounting systems that will be used for internal decision-making purposes within an organisation, however, cost accounting systems for external reporting are also comprehensively covered. It has been brought up to date with the latest developments in the subject. Having been made stronger pedagogically with the addition of the answers to the questions and more real-world mini cases, the text brings home the relevance of the subject matter to the real world of business.

This book deals comprehensively with the elements of cost accounting, their application to costing methods, and their significance for management through budgetary control, short term decision-making, and capital budgeting. It is an extensive revision of the author's well-known costing text, and provides the student with a complete introduction to cost accounting. Relevant exercises are included at the end of each chapter, with solutions at the end of the book. These include many from recent examinations of the major professional accountancy bodies. Teachers are thus able to use their own favourite examples in lecture or class, and to refer students to other exercises for further practice. Students who are unable to attend a regular course will be able to check their work against the solutions. A series of multiple choice questions throughout the book provides a further opportunity for the student to check personal progress. Other features of the book include: a complete introduction to cost accounting; new material on capital budgeting and cost accounting for service activities; an explanation of budgetary control including behavioural aspects; and graded questions and MCQs throughout (definitions follow CIMA terminology).
