AUBREE HEATH

EDN Jeffrey Frank Jones
This is the Wartime story of Leo Elwood Phillips (1920-2013), one of 11 brothers and sisters that grew up during the Great Depression on a small farm near the Village Of Palestine in Darke County, Ohio. Raised by his mother Bessie after the death of his father

Matthew in 1932 from pneumonia, he worked the family farm until graduating from Palestine High School in 1938. He subsequently moved to 19 South Sixth Street in the small Ohio city of Miamisburg to live with his sister Beulah and work as a paper cutter. On 14 May 1942, Leo enlisted as a Private in the Army Air Corps at Patterson Field in Fairfield (Fairborn), Ohio, " ... For The Duration Of

The War Or Other Emergency, Plus Six Months, Subject To The Discretion Of The President Or Otherwise According To The Law ..." On 6 June 1942, Leo started classroom training with 12 students at the Bertram School Of Gases, Independent Engineering Company of O'Fallon, Illinois. It is here he became an oxygen and acetylene plant operator - learning to pass air

through a series of units that compressed it, removed carbon dioxide, moisture, oil content, and separated liquid air into nitrogen and oxygen. Then, moving liquid oxygen or nitrogen into expansion chambers and finally, compressing oxygen into high pressure cylinders for military aviation use. He completed formal classroom instruction in O'Fallon on the 10th of July and then performed on-the-job training in the Company's factory until the 17th of September,

1942. From the 2nd to the 16th of November Leo traveled on the troopship SS Monterey from Staten Island, New York to Casablanca, French Morocco, as part of Operation Torch. Shortly after arrival his unit started generating oxygen and filling oxygen cylinders for use on Army Air Forces aircraft such as the B-17 Flying Fortress, B- 24 Liberator and P-38 Lightning. On 30 November 1942, Leo and a number of men he trained with at O'Fallon were transferred from

Headquarters and Headquarters Detachment to the 41st Service Group, within the XII Air Force Service Command - a part of Twelfth (XII) Air Force. On 12 February 1943, Leo and his unit were transferred from Detachment XII Air Force Service Command (AFSC) to the 37th Air Depot Group (ADG). On 24 August they were again transferred, this time from Air Force General Depot #3 to Depot #5 within the 37th ADG, XII AFSC. On 26 September 1943, they were transferred (without

travel) from the 37th ADG to Headquarters and Headquarters Squadron, 17th Air Depot Group, as part of their anticipated move to recently liberated southern Italy. By August of 1943, newly promoted Sergeant Phillips was generating and filling aviation oxygen in Tunisia and by December was doing the same in southern Italy. All but four of the next 22 months Leo was stationed in and around Bari and Foggia. By mid-1944, all oxygen plant operators in the Mediterranean Theatre of

Operations were now attached to the 15th Air Force Service Command (AFSC) Oxygen Detachment, or one of the many Service Groups part of the 15th Air Force. Leo and his men were part of the Oxygen Detachment. From January through October of 1944, the 15th AFSC Oxygen Detachment and Service Groups stationed in Italy collectively filled 225,119 (standard 220 cubic foot) cylinders. The Oxygen Detachment alone was responsible for filling 109,804 – almost half of

the total number of cylinders in the Theatre. On 19 November 1944, Leo was promoted to his highest rank, Staff Sergeant (Temporary), while attached to the 18th Air Depot Group. From December 1944 to March 1945, Phillips was sent stateside to Patterson Field near Dayton, Ohio. During this time Leo reported on the status of oxygen generation and use in the Mediterranean Theatre of Operations. While at the Field he also learned how to operate a moisture collector for

testing oxygen. He had furloughs during this period from 22 to 29 December 1944 and 22 January to 5 February 1945. For much of this time Leo stayed on Oxford Avenue in Dayton, thus, was able to spend much of his free time with his mother, brothers and sisters now living nearby. Leaving for home permanently on 26 September 1945, Phillips traveled from Naples to New York on the refitted former Italian cruise liner Vulcania. This diesel-powered ship, on its

maiden voyage as an allied troopship, was manned by Italian officers and crew. The ship carried 4,057 Americans, including 3,200 Army officers and enlisted men, 557 members of the WAC and 300 nurses. After arriving at Staten Island on 4 October, every soldier was transported to Camp Kilmer in New Brunswick, New Jersey - the largest processing center for troops heading overseas and returning home from World War II. Next, Leo left for Camp Atterbury, Indiana. After

further processing to complete the transition from soldier to civilian, Staff Sergeant Phillips received an Honorable Discharge from the 41st Depot Replacement Squadron located at the Separation Center, on 10 October 1945. Soon after coming back home to Miamisburg Leo married Audrey Constance (Case) Phillips and had two children. Audrey was the sister of one of Leo's closest friends during the War - Ronald A. Case. Leo worked for Burdett Oxygen Company and

retired from the Dayton-headquartered bicycle manufacturer Huffly Corporation after 17 years of faithful service. Leo passed on 4 September 2013, after living a rich life which also included tenure as President of the Moose Lodge in Miamisburg, member of St. George's Episcopal Church, Centerville and the love of family, friends, golf, and traveling.

Equipment Volume 3 - Oxygen Equipment - Miscellaneous Equipment Technical Manual 5-351 Gas Generating *High School and Beyond* University of Toronto Press More than 100,000 entrepreneurs rely on this book for detailed, step-by-step instructions on building successful, scalable, profitable startups. The National Science Foundation pays hundreds of startup teams each year to follow the process outlined in the book, and it's taught at

Stanford, Berkeley, Columbia and more than 100 other leading universities worldwide. Why? The Startup Owner's Manual guides you, step-by-step, as you put the Customer Development process to work. This method was created by renowned Silicon Valley startup expert Steve Blank, co-creator with Eric Ries of the "Lean Startup" movement and tested and refined by him for more than a decade. This 608-page how-to guide includes over 100 charts, graphs, and diagrams,

plus 77 valuable checklists that guide you as you drive your company toward profitability. It will help you:

- Avoid the 9 deadly sins that destroy startups' chances for success
- Use the Customer Development method to bring your business idea to life
- Incorporate the Business Model Canvas as the organizing principle for startup hypotheses
- Identify your customers and determine how to "get, keep and grow" customers profitably
- Compute how you'll drive

your startup to repeatable, scalable profits. The Startup Owner's Manual was originally published by K&S Ranch Publishing Inc. and is now available from Wiley. The cover, design, and content are the same as the prior release and should not be considered a new or updated product. *Catalog of Copyright Entries, Third Series* Copyright Office, Library of Congress
This book introduces human factors engineering (HFE) principles, guidelines, and

design methods for medical device design. It starts with an overview of physical, perceptual, and cognitive abilities and limitations, and their implications for design. This analysis produces a set of human factors principles that can be applied across many design challenges, which are then applied to guidelines for designing input controls, visual displays, auditory displays (alerts, alarms, warnings), and human-computer interaction. Specific challenges and solutions

for various medical device domains, such as robotic surgery, laparoscopic surgery, artificial organs, wearables, continuous glucose monitors and insulin pumps, and reprocessing, are discussed. Human factors research and design methods are provided and integrated into a human factors design lifecycle, and a discussion of regulatory requirements and procedures is provided, including guidance on what human factors activities should be conducted when and

how they should be documented. This hands-on professional reference is an essential introduction and resource for students and practitioners in HFE, biomedical engineering, industrial design, graphic design, user-experience design, quality engineering, product management, and regulatory affairs. Teaches readers to design medical devices that are safer, more effective, and less error prone; Explains the role and responsibilities of

regulatory agencies in medical device design; Introduces analysis and research methods such as UFMEA, task analysis, heuristic evaluation, and usability testing.

McGraw Hill Professional
Over 220,000 entries representing some 56,000 Library of Congress subject headings. Covers all disciplines of science and technology, e.g., engineering, agriculture, and domestic arts. Also contains at least 5000 titles published before 1876. Has many

applications in libraries, information centers, and other organizations concerned with scientific and technological literature. Subject index contains main listing of entries. Each entry gives cataloging as prepared by the Library of Congress. Author/title indexes. The Antique Trader Antiques & Collectibles Price Guide American Radio Relay League (ARRL) Building on the time-tested, reality-based discipline of general semantics, Olek Netzer

provides a guide for clear and critical thinking, a guide for the perplexed that steers individuals in the direction of enhanced rationality and improved evaluation of our experiences, environments, and ourselves. His concern is with both our psychological well being and our societal health, as he addresses interpersonal relations as well as political persuasion and propaganda, drawing on some of the most important thinkers of the

past century Lance Strate, President of the Institute of General Semantics, Professor of Communication and Media Studies at Fordham University.

License Manual for Radio Operators: a Guide to FCC Examinations LIT Verlag Münster

Live the cruising life without being wealthy! Thousands of ordinary people are living their dreams of sailing the world thanks to *The Cruising Life*, and this completely updated Second Edition aims to

help thousands more find adventure over the horizon. Even if you've never sailed before, this A-to-Z guide can have you cruising to exotic ports within five years. Your adventure begins right at home, practicing to live a sensible life with only the essentials, as described by lifelong sailor Jim Trefethen, who relishes the cruising life in retirement. Along your path to living at sea, Jim prepares you to: Discuss the pros, cons, and realities of the cruising life with your spouse Save

and maintain the best type of cruising fund to meet your goals Strip away your anchors, including useless possessions, credit card debt, and your job Manage, grow, and protect your cruising fund while at sea Develop essential skills for living on the water, and how to earn an income selling those skills Find the boat you need, outfitted with the essential gear and equipment, in your price range Assimilate into the sailing community by developing the traits of a

successful cruiser If you think age, experience, and money can keep you from the cruising life, you haven't read *The Cruising Life*, Second Edition.

Trusted family authority provides a simple and practical guide for parents to help their children develop a healthy perspective regarding their bodies and sexuality.

Radio-electronics CRC Press

* This timely new edition covers technological changes to broadband wireless access, including competing standards to WiMax, mobile entertainment, and new data backup systems. * Shows wireless operators

how to plan a broadband wireless network for the greatest return on investment in the shortest possible time. * Municipal wireless networks are expanding throughout the United States and Europe, where the wired infrastructure is too old to support the volume of Internet traffic and where modern cable is too expensive for most Internet users.

Pure Digital Evoke-1 This booklet contains the operating instructions for the Evoke-1. WiMax Operator's Manual

**** About itself the 8th edition notes: "Primarily intended as an instructional guide for library personnel and researchers who work with reference materials, the Guide surveys the basic and most familiar or typical resources for general reference work, and for work with the disciplines of the humanities, social sciences, and pure and applied sciences." The 7th edition, titled Guide to basic reference materials . . . , is recommended by ARBA, v.16, but is missed

by BCL3 and Sheehy. A solid work marred by the flimsy paper binding--a shockingly bad production decision: a bibliography gets repeated use.

Instruction Manual John Wiley & Sons

The move toward worldwide wireless communications continues at a remarkable pace, and the antenna element of the technology is crucial to its success. With contributions from more than 30

international experts, the Handbook of Antennas in Wireless Communications brings together all of the latest research and results to provide engineering professionals and students with a one-stop reference on the theory, technologies, and applications for indoor, hand-held, mobile, and satellite systems. Beginning with an introduction to wireless communications systems, it offers an in-depth treatment of propagation prediction and fading channels. It then explores

antenna technology with discussion of antenna design methods and the various antennas in current use or development for base stations, hand held devices, satellite communications, and shaping beams. The discussions then move to smart antennas and phased array technology, including details on array theory and beamforming techniques. Space diversity, direction-of-arrival estimation, source tracking, and blind source separation methods are

addressed, as are the implementation of smart antennas and the results of field trials of systems using smart antennas implemented. Finally, the hot media topic of the safety of mobile phones receives due attention, including details of how the human body interacts with the electromagnetic fields of these devices. Its logical development and extensive range of diagrams, figures, and photographs make this handbook easy to follow and provide a clear understanding of design

techniques and the performance of finished products. Its unique, comprehensive coverage written by top experts in their fields promises to make the Handbook of Antennas in Wireless Communications the standard reference for the field.

Indian Journal of Pure & Applied Physics

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future

is going to be better, and science and technology are the driving forces that will help make it better.

The Human Thinking System User's Manual

Pure Digital Evoke-1

Humanizing Healthcare - Human Factors for Medical Device Design

Masters Theses in the Pure and Applied Sciences was first conceived, published, and disseminated by the Center for Information and Numerical Data Analysis and Synthesis (CINDAS) * at Purdue University in 1957,

starting its coverage of theses with the academic year 1955. Beginning with Volume 13, the printing and dissemination phases of the activity were transferred to University Microfilms/Xerox of Ann Arbor, Michigan, with the thought that such an arrangement would be more beneficial to the academic and general scientific and technical community. After five years of this joint undertaking we had concluded that it was in the interest of all concerned if the printing and

distribution of the volumes were handled by an international publishing house to assure improved service and broader dissemination. Hence, starting with Volume 18, Masters Theses in the Pure and Applied Sciences has been disseminated on a worldwide basis by Plenum Publishing Corporation of New York, and in the same year the

coverage was broadened to include Canadian universities. All back issues can also be ordered from Plenum. We have reported in Volume 28 (thesis year 1983) a total of 10,661 theses titles from 26 Canadian and 197 United States universities. We are sure that this broader base for these titles reported will greatly enhance the value of this important annual reference work. While

Volume 28 reports theses submitted in-1983, on occasion, certain universities do report theses submitted in previous years but not reported at the time.
