This volume provides both students and licensed professionals in speech-language pathology much-needed multidisciplinary bases to implement clinical services with Spanish speakers. Researchers and practitioners from Speech-Language Pathology, Neurolinguistics, Neuropsychology, Education, and Clinical Psychology provide theoretical and empirical grounds to develop evidence-based clinical procedures for monolingual Spanish and bilingual Spanish-English children and adults with communication disorders.

The aim of the present book is to give an overview of (and an insight into) translation, as well as an introduction to some of the major linguistic theories used to explain the task of translating, and to the main problems involved in English-Spanish translation. Contents focus briefly on the concept of translation, the main approaches applied to the theory and practice of translation, how linguistic paradigms have contributed to translation studies, the role of the translator and translation competence, the main theoretical problems

and controversial issues (translatability vs. untranslatability, fidelity vs. fluency, equivalence vs. adequacy, etc.), translation strategies and techniques, practical problems in English-Spanish translation, translation and new technologies, and the evaluation of translation. Each chapter includes three theoretical sections dealing with the abovementioned issues, as well as a fourth section with suggestions for further readings, and a final fifth section with translation tasks and questions.

Learning the English Preposition System

Multilingual Matters

This series is designed to provide a detailed account of one of the major problems in the

teaching of a second language—the interference caused by structural differences between the native language of the learner and the foreign language he is studying. The similarities and differences between English and the language being taught are described in two volumes, one on the sound systems and one on the grammatical systems, for some of the foreign languages most in demand in the United States today.

Systemic Functional Grammar of Spanish

Peter Lang

This book is a course in contrastive linguistics and translation which introduces the basics of linguistic analysis as applied to translation. Translation is presented as a

problem-solving activity and linguistic analysis is proposed as a useful methodological tool to identify a wide range of translation problems. The course adopts a method which starts with the translation of words and goes up, step by step, through the different levels of linguistic structure to the level of pragmatic context. Myriad examples and a wide variety of exercises enable readers to acquire and practise some of the most common strategies translators use to solve the problems encountered at the different levels of linguistic analysis. The book aims at providing students with the theoretical and methodological tools needed to reinforce

their linguistic and textual competence in the languages involved and make adequate progress along the translation process. As theoretical tools, students are given an overview of basic translation concepts and linguistic tools central to contrastive linguistics and textual analysis. As methodological tools, students are presented with a working method that, at the beginning, will allow them to grasp the principles and strategies that govern general translation, and which they could later extrapolate to specialised translation.

La publicación de este volumen representa un caso relativamente insólito. Un pequeño grupo de jóvenes

investigadores de menos de treinta años convence a un grupo mucho más numeroso de la misma edad para celebrar en Salamanca la First Conference of Young Researchers on Anglophone Studies. El resultado es deslumbrante. No solo demuestran una gran capacidad organizativa, sino que los resultados individuales de las aportaciones científicas son sobresalientes. Este volumen, *Current Trends in Anglophone Studies*, recoge una selección revisada de las propuestas presentadas en el Encuentro y gira en torno a una estructuración tripartita clásica: estudios culturales, lingüísticos y literarios. En ella caben todos aquellos que se

mueven en el campo de los estudios anglófonos. Cada uno de estos campos podría haber sido suficiente para celebrar un congreso, pero parece razonable que en este tipo de encuentros tengan cabida todos. De ese modo, este volumen se convierte en un ejemplo de aproximación interdisciplinar a los estudios anglófonos. Desde un punto de vista cuantitativo, los estudios culturales ocupan sin duda un espacio menor. Sin embargo, sobresale la variedad de temas tratados, así como la internacionalización de los autores, dentro de este apartado. Estudiantes españoles e italianos acometen estudios relacionados con la música, la

pintura, el cine, la traducción, la marginalidad social o el impacto de las nuevas tecnologías en la producción artística. Si no pareciera demasiado atrevido, podría decirse que estos jóvenes estudiosos irían más allá de lo que un día ya lejano pudieron imaginar Richard Hoggard o Raymond Williams. Los estudios aquí presentados reflejan, sin duda, la evolución que la propia sociedad ha experimentado en estos últimos cincuenta años y exploran la relación entre las prácticas culturales, la vida diaria, y los contextos económicos, políticos e históricos. No es de extrañar que una gran parte de las contribuciones presentadas en este

volumen se centren en el estudio de la lengua, ya que la demanda del inglés se ha incrementado de forma considerable en los últimos años. Sobresalen los análisis puramente filológicos y sobre todo los relacionados con el aprendizaje del inglés como segunda lengua. Por eso, destacan estudios que contemplan rasgos morfológicos, léxicos o sintácticos. Sin embargo, el mayor número de participaciones hace referencia al ya citado aprendizaje del inglés como L2, tanto desde el análisis de materiales, como desde la práctica oral o escrita. Las contribuciones literarias ofrecen una evaluación teórica, formal e interpretativa

de distintas tendencias desde perspectivas tanto interdisciplinares como interculturales. Cronológicamente los estudios abarcan textos desde el siglo XVIII hasta nuestros días, con un acento especial en los autores más contemporáneos y en el género narrativo. En general estos estudios se fijan en textos concretos y los analizan desde perspectivas culturales, sociológicas o psicológicas. Pero abundan menos las aproximaciones desde la teoría literaria, desde la técnica narrativa o, como tal vez cabría esperar al tratarse de estudiantes tan jóvenes, desde la aplicación de las nuevas tecnologías. Por el contrario, se repiten temas como los traumas heredados de

la Guerra de Vietnam, las cicatrices del 11 de septiembre o los problemas de género. En definitiva, se trata de una selección de artículos claramente prometedora, que transmite la seguridad de que el futuro de la Filología Inglesa está en buenas manos y podrá experimentar una positiva evolución en los próximos años. Por todo ello, hay que felicitar a todos los participantes individuales y, sobre todo, a los organizadores del evento, y editores de este volumen, que han demostrado una enorme capacidad de trabajo y de saber hacer.

The Simple Declarative Clause in Spanish and English John Benjamins Publishing

The objective of the monograph is to contrast the different levels of the two languages involved, English and Spanish, in order to highlight the main divergences found between the two linguistic systems; besides, it also tackles some cultural and pragmatic differences. English and Spanish in Contrast is aimed at adult learners of English or Spanish with some previous knowledge of both languages, but also to teachers and non-native speakers who want to increase their proficiency in any of the two languages. The

book is divided into a theoretical section, where selected issues of the Spanish and English linguistic systems are explained and contrasted; and a practical section, which includes exercises to accompany the explanations and concentrates on practising upon those aspects that are a particular problem to non-native speakers and usually, the source of the most frequent mistakes. Finally a key to the exercises is provided. Therefore, it may be used as a self-study tool as well.

Readings in Spanish-English Contrastive Linguistics English-Spanish Contrastive Analysis Prof. Sanchez Escobar's study reflects careful collection and analysis of linguistic data in the most scientifically accurate details. Although the data itself is most interesting, his conclusions really constitute his major contribution to the academic and pedagogical communities. They explain why Spanish

speakers learning English have such a difficult time learning the English structure for essays: thesis, supporting points, conclusion, and why English speakers learning Spanish seem to write compositions that are blunt, inelegant, and devoid of the verbal virtuosity so prized by Spanish speakers. English and Spanish in Contrast

Shows how a person's first language and

culture influence writing in a second language.

An Explanatory Contrastive Analysis of English and Spanish Phonology

Purpose of the Study:

The purpose of this exploratory study is to find an accepted methodology for teaching second-language

suprasegmentals by investigating the question of whether or not the use of

contrastive analysis is superior to another method that does not use contrastive

analysis. Specifically, the comparison of methods is made by teaching and then

evaluating English-speaking students performance in the use of Spanish

suprasegmentals: rhythm, stress,

patterns and terminal juncture. Procedures: A pre/post-test based on perceptual analysis was designed and administered to two groups of subjects, all second-year Spanish students at the university level. Between the pre- and post-tests, the students received four twenty-minute periods of instruction in the use of Spanish suprasegmentals. Both groups were taught similarly but one group was taught with a contrastive analysis approach while the other was not. Tapes of student performance were evaluated by a perceptual analysis on the part of the instructor-researcher. Results of the pre/post-tests in the two groups were analyzed for significant differences

in performance by means of analysis of covariance. The F-value decision as to significance was made at the .05 level. Findings of the Study: No significant differences in suprasegmental performance were found between the two groups. Implication: These findings, as revealed by the test designed for this study, suggest that the use of a contrastive analysis methodology in suprasegmental teaching was not superior to a methodology that did not use contrastive analysis. Recommendations: Further research could be done in the areas of the value of contrastive analysis between English and an Indo-European

language other than Spanish, of the value of such analysis compared to another methodology and the reasons for the variations between the scores of rhythm and terminal juncture. The study could be replicated in classes where the instructor was the principal teacher. This would allow less condensed instruction in a more natural setting, more application to the context of the lessons and less emphasis on perfect attendance. Consideration should be given to the possibility of more than one test evaluator.

A Tripolar Contrastive Analysis of the Sound Systems of English, Catalan and Spanish for the Purpose of Teaching English to Bilingual Speakers of

Catalan and Spanish

This book offers a systemic-functional account of Spanish, and analyses how Spanish grammatical forms compare and contrast with those of English. The authors analyse Spanish according to the three main 'metafunctions': ideational, interpersonal, and textual. The result is a comprehensive examination of Spanish grammar from the clause upwards.

Presupposing little or no knowledge of Spanish, this book will be of interest to researchers in Spanish language, systemic functional linguistics or contrastive linguistics.
