Historical Dictionary of the Tamils Pearson
Education India

The Tamils have an unbroken history of more than two thousand years. Tamil, the

language they speak, is one of the oldest living languages in the world. The only people comparable to the Tamils in terms of their hoary past and vibrant present would be the Jews with one marked difference. The Tamils have always had their homeland 'Tamilaham' (alternately pronounced and spelt 'Tamizhaham') known today as Tamil Nadu which to them represents their mother and is revered by

them as 'Tamizh Tai' literally 'Tamil Mother'. This is in striking contrast to the Jews who have been through a long and arduous struggle to gain their homeland, a deeply contested site to this day with Hebrewisation of Israel being a key marker of Jewish identity in the region. Tamils, by contrast have a clear numerical majority in the region that now comprises Tamil Nadu and the language unites rather than

divides adherents of different faiths. The second edition of Historical Dictionary of the Tamils contains a chronology, an introduction, and an extensive bibliography. The dictionary section has over 600 cross-referenced entries on important personalities, politics, economy, foreign relations, religion, and culture. This book is an excellent resource for students, researchers, and anyone wanting to know more about the Tamils.

The notion of the "Silk Road" that the German geographer Ferdinand von Richthofen invented in the 19th century has lost attraction to scholars in light of large amounts of new evidence and new approaches. The handbook suggests new

conceptual and methodological tools for researching ancient economic exchange in a global perspective with a strong focus on recent debates on the nature of pre-modern empires. The interdisciplinary team of Chinese, Indian and Graeco-Roman historians, archaeologists and anthropologists that has written this handbook compares different forms of economic development in agrarian and steppe regions in a period of accelerated empire formation during 300 BCE and 300 CE. It investigates inter-imperial zones and networks of exchange which were crucial for ancient Eurasian connections. Volume I provides a comparative history of the most important empires forming in Northern Africa, Europe and Asia between 300 BCE and 300 CE. It surveys a wide range of evidence that can be brought to bear on economic development in these empires, and takes stock of the ways academic traditions have shaped different understandings of economic and imperial development as well as Silk-Road exchange in Russia, China, India and Western Graeco-Roman history.

History of Tamil Nadu CHANGDER OUTLINE

This is the first scholarly treatment of

nineteenth-century Christianity to discuss the subject in a global context. Part I analyses the responses of Catholic and Protestant Christianity to the intellectual and social challenges presented by European modernity. It gives attention to the explosion of new voluntary forms of Christianity and the expanding role of women in religious life. Part II surveys the diverse and complex relationships between the churches and nationalism, resulting in fundamental changes to the connections between church and state. Part III examines the varied fortunes of Christianity as it expanded its historic bases in Asia and Africa, established itself for the first time in Australasia, and responded to the challenges and opportunities of the European colonial era. Each chapter has a full bibliography providing guidance on further reading.

This book provides a comprehensive research on Ancient Indian glass. The contributors include experienced archaeologists of South Asian glass and archaeological chemists with expertise in the chemical analysis of glass, besides,

established ethnohistorians and ethnoarchaeologists. It is comprised of five sections, and each section discusses different aspects of glass study: the origin of glass and its evolution, its scientific study and its care, ancient glass in literature and glass ethnography, glass in South Asia and the diffusion of glass in different parts of the world. The topic covered by the different chapters ranges from the development of faience, to the techniques developed for the manufacture of glass beads, glass bangles or glass mirrors at different times in south Asia, a major glass producing region and the regional distribution of key artefacts both within India and outside the region, in Africa, Europe or Southeast Asia. Some chapters also include extended examples of the archaeometry of ancient glasses. It makes an important contribution to archaeological, anthropological and analytical aspects of glass in South Asia. As such, it represents an invaluable resource for students through academic and industry researchers working in archaeological sciences, ancient knowledge system, pyrotechnology, historical archaeology, social archaeology

and student of anthropology and history with an interest in glass and the archaeology of South Asia.

The Cambridge History of Southeast Asia is a multi-authored treatment of the whole of mainland and island Southeast Asia from Burma to Indonesia. Unlike other histories of the region, it is not divided on a country-by-country basis and is not structured purely chronologically, but rather takes a thematic and regional approach to Southeast Asia's history, aiming to present the current state of historical research on Southeast Asia as well as stimulating further thought and investigation.--Publisher description.

Oswal - Gurukul History & Civics Most Likely Question Bank : ICSE Class 9 Sem II Exam 2022 Walter de Gruyter GmbH & Co KG

Edition: Deluxe edition with color. The history of Tamil Nāḍu from the sixteenth century to the eighteenth is eventful with political developments which had far-reaching consequences. It was a significant period in which non-Tamil rulers ruled the country which ultimately led to

the establishment of foreign rule. The period commences with the appointment of the Telugu-speaking Vijayanagar governors in the Madurai, Thaṅjāvūr and Seṅgi regions. The decline of the Vijayanagar rule led to the rule of the Marāthas in Thaṅjāvūr and the Mughals in the Carnatic. The invasion of the Tamil country by the Mughal general, Zulfikar Khan, made the Tamil States tributaries of the Mughals and established the rule of the Carnatic Nawabs. This period witnessed the efforts of European powers to establish trade centres. The war of succession between the two dynasties of the Carnatic Nawabs and the wars between the competitive trading countries, the English and the French, had their impact on the native powers which thereby became weakened. By providing military and financial aid to native powers, the British gradually took over their territories and expanded the Madras Presidency. Another notable feature is that the success in getting political power in the Tamil country encouraged the British to acquire political power in North India using their base in the Tamil country as a springboard. Native rulers' military

weakness and tendency to allow foreign powers to interfere in native politics and Muhammad Ali's total reliance on the English to control his subordinates and meet his financial needs necessitated by his extravagant lifestyle were contributory factors which helped the English, who came as traders, become rulers of the country. In this period, resenting the interference and oppression of the British, the poligars rose against them. The Poligar Rebellion under Pūli Thēvar and Kaṭṭabommaṇ and the South Indian Rebellion under Marudu Pāṇḍyaṇ are notable events of this period. The political development in the Tamil country in this period had serious repercussions on the political future of India since they provided the British with experience and resources for the expansion of their rule in the rest of India. The year 1801 A.D. in which the Madras Presidency, the biggest in the British India, attained its total expansion is politically significant in the history of Tamil Nāḍu and India. The rule of foreigners had its impact on the social life of the people and the economy of the country. The advent of Christian missionaries along with trading companies influenced the social

life. The exploitation of native resources by the foreign rulers and the constant wars among them shattered the economy. In the midst of such turmoil, the Nāyaks and the Marāthas contributed to the developments of arts and culture. This book is a study of not only political events, but also the contemporary social, economic and religious conditions. The Nāyak architecture, which is the last phase of the Dravidian architecture, along with the contributions of the Marathas of Thaṅjāvūr, is highlighted. Besides its use to students and those who prepare for competitive examinations, it is an interesting study to those who are interested in the history of Tamil Nāḍu. For the proper understanding of the details presented, maps and pictures are added at appropriate places.

India's history and culture is ancient and dynamic, spanning back to the beginning of human civilization. Beginning with a mysterious culture along the Indus River and in farming communities in the southern lands of India, the history of India is punctuated by constant integration with migrating peoples and with the diverse cultures that surround the country. Placed in the center of Asia, history in India is a crossroads of cultures from China to Europe, as well as the most significant Asian connection with the cultures of Africa. The Historical Dictionary of Ancient

India provides information ranging from the earliest Paleolithic cultures in the Indian subcontinent to 1000 CE. The ancient history of this country is related in this book through a chronology, an introductory essay, a bibliography, and hundreds of cross-referenced dictionary entries on rulers, bureaucrats, ancient societies, religion, gods, and philosophical ideas.

The economic history of early India is a rich and diverse area of study, covering agricultural developments, trade, markets, occupation and professional groups, urbanization and the institutions that govern the economy. Recent research has expanded our understanding of the processes of transformation of the economy in different temporal contexts within the Indian sub-continent. They have particularly led us to explore connected histories given the trans-continental

trading networks and movements of people from very early times. This volume seeks to draw attention to this vast and unexplored terrain in the economic history of early India, by bringing together essays on a new and rich historiography. Essays in the volume cover neglected regions, economic processes and structures. Scholars have looked at questions of settlements, crops that were cultivated and market orientation. Essays cover material culture and provide insights into how early Indians lived, what kinds of activities they were engaged in, and how they organised their production activities within and outside domestic spaces. Further the volume bring new insights on hierarchy of settlement types, nature of exchange, and the significance of a nodal site in exchange networks. Maritime history as well as the understanding of trade in its varied forms and manifestations are covered in several essays.

Siddhas were mystics of ancient India. They believed that human race was created to excel in knowledge and help human societies form an advanced

civilization on the Earth. They knew that they needed to live longer and even become immortals to achieve this goal. In Indian context Siddhas were considered as doctors but in Western context, such people were called Philosophers. Nevertheless, a deeper understanding of Siddhas' poetic scripts reveals their different faces such as scientific thinkers, social reformers, priest kings, pioneers of advanced cultures, etc. Siddhas speak about spirit, soul and body in their scripts. They also compare cosmos, nature and earth in their science. The unique attainment of Siddhas could be their mastery over physical and cosmic sciences. Siddhas believed that physical science is comparable with cosmic science. Thus, through their physical and cosmic observations, they succeeded in inventing ambrosia of Gods and many became Gods themselves.

A History of Ancient and Early Medieval India Routledge

History of Agriculture in India (up to c.1200 AD), Part 1, reconstructs the evolution of agriculture in India up to c.1200AD. It is a synthesis and summation of existing knowledge on the history of

agriculture in ancient India on the combined bases of archaeological and literary sources against the backdrop of Asian history in general. Besides summing up the existing knowledge, it opens new vistas for further research on many debated issues in the history of agriculture in ancient India. The volume addresses the vexed and controversial questions on the origin, antiquity and sources of Indian agricultural history. Based on researches from sites of Vindhya, Ganga Region, plant remains, agricultural tools, pots, dental pathology, and settlement remains, it is an informed and highly researched work on the origin and antiquity of cultivation in India. For a historical study of agriculture, Pali, Sangam. Sanskrit and the Graeco-Roman literatures have been utilized. Art and literary sources have also been used to reconstruct history.

This compilation of original research articles highlight the important cross-regional, cross-chronological, and comparative approaches to political and economic landscapes in ancient South Asia and its neighbors. Focusing on the Indus Valley period and Iron Age India, this volume incorporates new research in

South Asia within the broader universe of archaeological scholarship. Contributions focus on four major themes: reinterpreting material culture; identifying domains and regional boundaries; articulating complexity; and modeling interregional interaction. These studies develop theoretical models that may be applicable researchers studying cultural complexity elsewhere in the world.
