**The Magic Porridge Pot** Springer

This volume constitutes the thoroughly refereed post-conference proceedings of the First and Second International Symposia on Sanskrit Computational Linguistics, held in Rocquencourt, France, in October 2007 and in Providence, RI, USA, in May 2008 respectively. The 11 revised full papers of the first and the 12 revised papers of the second symposium presented with an introduction and a keynote talk were carefully reviewed and selected from the lectures given at both events. The papers address several topics such as the structure of the Paninian grammatical system, computational linguistics, lexicography, lexical databases, formal description of sanskrit grammar, phonology and morphology, machine translation, philology, and OCR.

Twenty-five languages die each year; at this pace, half the world's five thousand languages will disappear within the next century. In this timely book, Claude Hagège seeks to make clear the

magnitude of the cultural loss represented by the crisis of language death. By focusing on the relationship of language to culture and the world of ideas, Hagège shows how languages are themselves crucial repositories of culture; the traditions, proverbs, and knowledge of our ancestors reside in the language we use. His wide-ranging examination covers all continents and language families to uncover not only how languages die, but also how they can be revitalized—for example in the remarkable case of Hebrew. In a striking metaphor, Hagège likens languages to bonfires of social behavior that leave behind sparks even after they die; from these sparks languages can be rekindled and made to live again.

The Rhaeto-Romance languages have been known as such to the linguistic community since the pioneering studies of Ascoli and Gartner over a century ago. There has never been a community of RR speakers based on a common history or polity and the various dialects are mutually unintelligible, but a unity, based on a number of common features, has been advanced. This book is the first general description of the Rhaeto-Romance languages to be written in English. It provides a critical examination of the phonology, morphology, lexicon, and syntax of the modern Rhaeto-Romance dialects within the broader perspective of Romance comparative linguistics.

This book aims to take users from scratch to having a solid base in Italian within six months, and to feel comfortable with the language in as little as three months. In only half an hour a day users will move ahead naturally until they are at ease with all the basic structures needed for communication and become familiar with the basic words and grammar of Italian. The method comprises two phases: the passive phase, in which users simply repeat what they hear and read, and the active phase, in which users begin to create sentences and imagine themselves in a

variety of everyday situations.

Chinese is considered one of the most difficult languages to master. However, using the Chinese system, anyone can begin to understand and read Chinese. It works by transforming Chinese characters into illustrations to make them easy to remember. This book teaches the key characters on which the language is built and how these characters can be combined to form more complex words and phrases. Learning Chinese has never been this simple or more fun!

**LIVRES DU MOIS JUILLET-AOUT 2001** Peter Lang GmbH, Internationaler Verlag Der Wissenschaften Traditional dialects have been encroached upon by the increasing mobility of their speakers and by the onslaught of national languages in education and mass media. Typically, older dialects are “leveling” to become more like national languages. This is regrettable when the last articulate traces of a culture are lost, but it also promotes a complex dynamics of interaction as speakers shift from dialect to standard and to intermediate compromises between the two in their forms of speech. Varieties of speech thus live on in modern communities, where they still function to mark provenance, but increasingly cultural and social provenance as opposed to pure geography. They arise at times from the need to function throughout the different groups in society, but they also may have roots in immigrants’ speech, and just as certainly from the ineluctable dynamics of groups wishing to express their identity to themselves and to the world. The future of dialects is a selection of the papers presented at Methods in Dialectology XV, held in Groningen, the Netherlands, 11-15 August 2014. While the focus is on methodology, the volume also includes specialized studies on varieties of Catalan, Breton, Croatian, (Belgian) Dutch, English (in the US, the UK and in Japan), German (including Swiss German), Italian (including Tyrolean Italian), Japanese, and Spanish as well as on heritage languages in Canada.

This edited volume presents an analysis of the evolution of French language policies and their impact on French regional languages and their communities. It gathers studies on language revitalisation from several territorial minority languages (Breton, Alsatian, Catalan, Occitan, Basque, Corsican, Francoprovençal, Picard, Reunionese) and evaluates the challenges and opportunities that they face in the 21st century. The chapters tackle different aspects of language endangerment and language planning and adopt varied theoretical and methodological approaches. The first section of the book reconsiders the difficulties in establishing linguistic boundaries and classification for some regional languages. The second section examines the important theme of the new generation of speakers with issues of transmission and identity formation and the changes they can bring to traditional communities. The third section highlights new developments in the context of new technologies and the heightened visibility of regional languages. Finally, the last section presents an overview of the contemporary situation of minority language revitalisation in France and synthesises the key trends identified in this volume: from the educational domain to the European Charter for Minority and Regional languages. This book will appeal to students and scholars of the sociology of language, sociolinguistics, language policy, minority languages and language endangerment.

This volume features more than two thousand entries on the history of Islamism and Islamic countries. It provides a balanced account of events and organizations, as well as philosophers, activists, militants, and other prominent figures, and offers a window into a movement that has irrevocably changed both Muslim and Western societies. The Columbia World Dictionary of Islamism includes entries on the roots of Islamism and jihad in Africa, Afghanistan, Chechnya, Egypt, India, Iran, Iraq, Morocco, the Balkans, and the United States, among many other countries and locations. It profiles such key individuals as Louis Farrakhan; Tariq Ramadan; Algeria's Hassan Hattab, the founder of the Muslim Brotherhood; Egypt's Hassan Al-Banna; and the leader of the Afghan Jombesh-i Melli Islami movement, Abdul Rashid Dostum. The dictionary uniquely examines this antimodern incarnation of Islam and its efforts to claim (or reclaim) Muslim society, families, and professional environments. It considers such questions as whether activist Islam is "terrorist" and if it can coexist with Western societies; whether terrorism can be justified by the Quran; and what are the components of an international Islam. Widely celebrated for his scholarship and expertise, Antoine Sfeir remains sensitive to the differences between Islam and Islamism and

approaches the ideology from geopolitical, sociological, and historical perspectives.

Taking a broadly chronological approach, this volume of original essays traces the origins of the concept of 'grammar'. In doing so, it charts the social, moral and cultural factors that have shaped the development of grammar from antiquity, via the Middle Ages, Renaissance and Modern Europe, to current education systems and language learning pedagogy. The chapters examine key turning points in the history of language teaching epistemology, focusing on grammar for 'foreign' language teaching across different European cultural contexts. Bringing together leading scholars of classical and modern languages education, this book offers the first single-source reference on the evolving concept of grammar across cultural and linguistic borders in Western language education. It therefore represents a valuable resource for teachers, teacher-educators and course designers, as well as students and scholars of historical linguistics, and of second and foreign language education.
