This book introduces the fundamental design concept of Eurocode 3 for current steel structures in building construction, and their practical application. Following a discussion of the basis of design, including the principles of reliability management and the limit state approach, the material standards and their use are detailed. The fundamentals of structural analysis and modeling are presented, followed by the design criteria and approaches for various types of structural members. The theoretical basis and checking procedures are closely tied to the Eurocode requirements. The following chapters expand on the principles and applications of elastic and plastic design, each exemplified by the step-by-step design calculation of a braced steel-framed building and an industrial building, respectively. Besides providing the necessary theoretical concepts for a good understanding, this manual intends to be a supporting tool for the use of practicing engineers. In order of this purpose, throughout the book, numerous worked examples are provided, concerning the analysis of steel structures and the design of elements under several types of actions. These examples will facilitate the acceptance of the code and provide for a smooth transition from earlier national codes to the Eurocode.

The Quran is the sacred text of Islam. For Muslims, it is the word of the one God. The Quran was revealed to the last prophet and messenger Muhammad (محمد) from the year 610 until his death in 632 by the angel Gabriel (جبريل). According to the Quran, Allah is the author of all the sacred books of the three monotheistic religions that are Islam, Christianity, and Judaism. He thus revealed the Gospel to the penultimate prophet Jesus and the

Torah to the prophet Moses. We read thus in verse 3 of sura 3: "He brought down on you the Book (the Quran) with the truth, confirming the Books descended before him. And He brought down the Torah and the Gospel". However, Islam considers that with the exception of the Quran, all the holy books have been falsified by man. Verse 75 of Sura 2 goes in this direction: "- Well, do you hope [Muslims] that such people [the Jews] will share your faith with you? while a group of them; after having heard and understood the word of Allah, knowingly falsified it. "This present work is a translation into English of the meaning of the verses of the Quran made by Maulana Wahiduddin Khan.

The new book, SCIENCE OF PROPAGATION (DAWA'H), is about Dawah methodology: Science of Propagation (علم الدعوة) is a new dimension of thought process which has not been mentioned in the Islamic literature. However, Allah (SWT) has introduced the matter of Dawah in a scientific way in the verse 125 of Nahal where the philosophical terms Wisdom, Sermonizing and Argument are connected in a logical fashion. Therefore, in the present book the wisdom triangle, wisdom process triangle, Dawah methodology, structure and decision making process of a Dawah organization, perspectives of sermon, science of argument, and few topics of argument that usually a Daa'ee faces during Islamic Dawah works are explained. To explain the subject matters, 20 (twenty) figures and 5 (five) tables have been introduced.

In the early 1990s Kristiane Backer was one of the very first presenters on MTV (Europe). For some years she lived and breathed the international music scene quickly gaining a cult following amongst viewers and becoming a darling of the European press. As she reached the pinnacle of her success she realised that, despite having all she could have wished for, she was never truly satisfied. Something very important was missing. A fateful meeting with Pakistani cricket hero Imran Khan changed her life. He invited her to his country where she encountered a completely different world to the one she knew, the religion and culture of Islam. A few years later (in 1995), after travelling more widely in the Islamic world and knowing that she had discovered

her spiritual path, she embraced Islam in a London mosque. In this private memoir Kristiane Backer tells the story of her conversion and explains how faith, despite the many challenges she faced as she turned her life upside down, at last gave her inner peace and the meaning she had sought.

Based on a large-scale international study of teachers in Los Angeles, Chicago, Ontario, and New York, this book illustrates the ways increased use of high-stakes standardized testing is fundamentally changing education in the US and Canada with a negative overall impact on the way teachers teach and students learn. Standardized testing makes understanding students' strengths and weaknesses more difficult, and class time spent on testing consumes scarce time and attention needed to support the success of all students—further disadvantaging ELLs, students with exceptionalities, low income, and racially minoritized students.
