A Field Guide for Organisation Development Univ of California Press
 Higher education is a strange beast. Teaching is a critical skill for scientists in academia, yet one that is barely touched upon in their professional training—despite being a substantial part of their career. This book is a practical guide for anyone teaching STEM-related academic

disciplines at the college level, from graduate students teaching lab sections and newly appointed faculty to well-seasoned professors in want of fresh ideas. Terry McGlynn's straightforward, no-nonsense approach avoids off-putting pedagogical jargon and enables instructors to become true ambassadors for science. For years, McGlynn has been addressing the need for practical and accessible advice for college science teachers through his popular blog Small Pond Science. Now he has gathered this advice as an easy read—one that can be ingested and put to use on short deadline. Readers will learn about topics ranging

from creating a syllabus and developing grading rubrics to mastering online teaching and ensuring safety during lab and fieldwork. The book also offers advice on cultivating productive relationships with students, teaching assistants, and colleagues.

 Washington Post columnist Alexandra Petri turns her satirical eye on her own life in this hilarious new memoir... Most twentysomethings spend a lot of time avoiding awkwardness. Not Alexandra Petri. Afraid of rejection? Alexandra Petri has auditioned for America's Next Top Model. Afraid of looking like an idiot?

Alexandra Petri lost Jeopardy! by answering “Who is that dude?” on national TV. Afraid of bad jokes? Alexandra Petri won an international pun championship. Petri has been a debutante, reenacted the Civil War, and fended off suitors at a Star Wars convention while wearing a Jabba the Hutt suit. One time, she let some cult members she met on the street baptize her, just to be polite. She’s a connoisseur of the kind of awkwardness that most people spend whole lifetimes trying to avoid. If John Hodgman and Amy Sedaris had a baby...they would never let Petri babysit it. But Petri is here to tell you: Everything you fear is not so bad. Trust her. She’s tried it. And in the course of her misadventures, she’s learned that there are worse things out there than awkwardness—and that interesting things start to happen when you stop caring what people think.

This Field Guide covers the various components and types of active electro-optical sensors - referred to as lidars in the text - from simple 2D direct-detection lidars to multiple subaperture synthetic aperture lidars. Other topics covered include receivers, apertures, atmospheric effects, and appropriate processing of different lidars. Lasers and modulation are presented in terms of their use in lidars. The lidar range equation in its many variations is discussed along with receiver noise issues that determine how much signal must be received to detect an object. This book is a handy reference to quickly look up any aspect of active electro-optical sensors. It will be useful to students, lidar scientists, or engineers needing an occasional reminder of the correct approaches or equations in certain applications, and systems engineers interested in gaining a perspective on this rapidly growing technology.

We all face tough choices: business executives, community leaders, and family members all struggle with difficult decisions on a daily basis. What we decide reveals what really matters to us; how we decide determines whether we succeed or fail. Developed over twenty years in settings as diverse as hospital bedsides and corporate boardrooms, *A Field Guide to Good Decisions* provides the skills to make decisions that reflect your core values while respecting those of others, including the long-term implications for all participants. Illustrated through many real-life examples that will resonate with readers both professionally and

personally, *A Field Guide to Good Decisions* offers practical tools and techniques for identifying individual and common goals, reaching consensus, and communicating the results effectively. The authors also show readers how to overcome common obstacles to good decision-making (psychological, cultural, and organizational). Ultimately, this book is about making decisions which, while not always a matter of life or death, nevertheless have a powerful effect on our sense of self, our credibility in the eyes of others, and the lives of those touched by the choices we make. Decision making is always personal. Each of us makes important decisions at work, in the community, and at home. When we face tough choices, what we decide reveals what really matters to us; how we decide determines whether we succeed or fail. Business executives, community leaders, and family members all struggle with difficult decisions: a senior management team makes an important choice about whether to pursue an acquisition; a baby-boomer decides whether to place an elderly parent in assisted living; a non-profit administrator considers laying off employees to have money and continue serving the community. For each, the steps toward a good decision are the same: know your values, engage others to understand theirs, and communicate with respect and candor. Simple in concept, not so easy in practice—but making a good decision demands nothing less. Developed over twenty years in settings as diverse as hospital bedsides and corporate boardrooms, *A Field Guide to Good Decisions* provides the skills to make decisions that reflect your core values while respecting those of others, including the long-term implications for all participants. “A stunning debut by a truly gifted writer—an eye-opening read for both

liberals and conservatives—and it could not come at a better time.”—Adam Grant, New York Times bestselling author of *Option B*, with Sheryl Sandberg *What is the opposite of hate?* As a progressive commentator on Fox News and now CNN, Sally Kohn has made a career out of bridging intractable political differences and learning how to talk respectfully with people whose views she disagrees with passionately. Her viral TED Talk on the need to practice emotional—rather than political—correctness sparked a new way of considering how often we amplify our differences and diminish our connections. But these days even famously “nice” Kohn finds herself wanting to breathe fire at her enemies. It was time, she decided, to look into the epidemic of hate all around us and learn how we can stop it. In *The Opposite of Hate*, Kohn talks to leading scientists and researchers and investigates the evolutionary and cultural roots of hate and how incivility can be a gateway to much worse. She travels to Rwanda, the Middle East, and across the United States, introducing us to former terrorists and white supremacists, and even some of her own Twitter trolls, drawing surprising lessons from dramatic and inspiring stories of those who left hate behind. As Kohn confronts her own shameful moments, whether it was back when she bullied a classmate or today when she harbors deep partisan resentment, she discovers, “The opposite of hate is the beautiful and powerful reality of how we are all fundamentally linked and equal as human beings. The opposite of hate is connection.” Sally Kohn’s engaging, fascinating, and often funny book will open your eyes and your heart.

"If you are looking for a step-by-step guide on what personalized learning is and how to implement it, while being inspired and gaining ideas to implement immediately, this is definitely the book to read!" Diana Petschauer, Assistive Technology Professional, CEO AT for Education & Access4Employment, Wolfeboro Falls, NH "Barbara and Kathleen present well-tested strategies for personalization within a coherent framework. This highly practical book forms a reliable foundation for empowering a community striving to make schools work for all learners." John H. Clarke, Professor Emeritus, University of Vermont

Learning That Matters Ashgate Publishing, Ltd.

From the award-winning birder and author of *Birds of Prey*, an authoritative, information-packed guide to distinguishing North American birds. In this book, bursting with more information than any field guide could hold, the well-known author and birder Pete Dunne introduces readers to the "Cape May School of Birding." It's an approach to identification that gives equal or more weight to a bird's structure and shape and the observer's overall impression (often called GISS, for General Impression of Size and Shape) than to specific field marks. After determining the most likely possibilities by considering such factors as habitat and season, the birder uses characteristics such as size, shape, color, behavior, flight pattern, and vocalizations to identify a bird. The book provides an arsenal of additional hints and helpful clues to guide a birder when, even after a review of a field guide, the identification still hangs in the balance. This supplement to field guides shares the knowledge and skills that expert birders bring to identification challenges. Birding should be an enjoyable pursuit for beginners and experts alike,

and Pete Dunne combines a unique playfulness with the work of identification. Readers will delight in his nicknames for birds, from the Grinning Loon and Clearly the Bathtub Duck to Bronx Petrel and Chicken Garnished with a Slice of Mango and a Dollop of Raspberry Sherbet. *A Field Guide to Lucid Dreaming* Red Wheel/Weiser
A 2022 SPE Outstanding Book Honorable Mention Our society urgently needs education that motivates, challenges, engages, and affirms all students. No matter their previous successes or failures, every student has enormous learning potential and important contributions to make now and in the future. Such meaningful learning experiences don't just happen, they need to be intentionally designed. This book supports those who will undertake this vitally important work. Learning that Matters: A Field Guide to Course Design for Transformative Education is a pragmatic resource for designing courses that engage college students as active citizens. This "work" book provides research-informed approaches for creating learning experiences and developing innovative, intellectually-engaging courses. Whether a novice or a veteran, by engaging with the text, collaborating with colleagues, and reflecting on the important work of a teacher, any motivated educator can become a transformative educator. Every college course has the potential to transform students' lives. Through implementation of critical concepts such as connected and authentic assessments; dilemmas, issues, and questions; portable thinking skills and engaging strategies; and a purposeful focus on inclusivity and equity, readers begin the process of change needed for preparing students who will be able to address the monumental challenges facing our society. From the ill-fated dot-com bubble to unprecedented merger and acquisition activity to scandal, greed, and, ultimately, recession -- we've learned that widespread and difficult change is no longer the exception. By outlining the process organizations have used to achieve transformational goals and by identifying

where and how even top performers derail during the change process, Kotter provides a practical resource for leaders and managers charged with making change initiatives work.

Adventures in Opting Out Simon and Schuster

It is not a matter of argument among the vast majority of scholars, but of demonstrable fact. White supremacy includes both individual prejudice and, for instance, the long history of the disproportionate incarceration of people of color. It describes a legal system still predisposed towards racial inequality even when judge, counsel, and jurors abjure racism at the individual level. It is collective and individual. It is old and immediate. Some white supremacists turn to violence, but there are also a lot of people who are individually white supremacist-some openly so-and reject violence. This Field Guide proposes that a better understanding of hate groups, white supremacy, and the ways that racism and patriarchy have braided into our laws and systems can help people to tell, and understand, better stories. .

After a career as one of the nation's top environmental lawyers, James Thornton spent several years on retreat, culminating in a meeting with the Dalai Lama, who asked him to teach a path of integration and wholeness. In *A Field Guide to the Soul*, Thornton leads us through a series of contemplative exercises designed to clarify the body, mind, and heart, and make a deep connection with the wisdom encoded in the natural world. His nature writing is joyously lyrical; the book as a whole is immensely practical, drawing on Jungian psychology, and Buddhist, Hindu, and Christian teachings, to give us the tools to work for the benefit of all living beings. At a time when people are desperate to make some sense of their lives, Thornton shows us how to embark on our own hero's journey. Only by taking full responsibility for our thoughts, feelings, and actions can we bring about the revolution in consciousness that is so vital today. In order to discover how to care for the Earth and all its inhabitants, we must first learn how to care for ourselves. Here is a practical manual that shows us the way. *A Field Guide to Climate Anxiety* Harper Collins

How to realize your own leadership potential Based on the bestselling book, *Deep Change*, *The Deep Change Field Guide* takes readers through the introspective journey of personal transformation. The field guide

streamlines, updates, and augments the content of the original book into an interactive self-teaching course that helps readers learn how to become powerful agents of change. Learning tools include reflection questions, film assignments, and action plans that help readers think about the concepts in terms of their own situations, and identify actions to embody the concepts in their lives. The field guide has been carefully designed so that individual learners can gain the same benefits that students have long enjoyed in the author's courses, and the learning tools also lend themselves to both the academic and professional classroom. Complements to Robert Quinn's bestselling book *Deep Change* Includes exercise, reflective questions, and worksheets throughout Provides reader with a "self-help" guide to overcoming the personal and professional obstacles that prevent transformational leadership For anyone who yearns to be an internally driven leader, to motivate the people around them, and develop a satisfying work life, *The Deep Change Field Guide* holds the key.

A Field Guide for the Missional Congregation Simon and Schuster

The Machine sheds light on all the dark corners of the resurgent right, laying out its modus operandi in short, accessible chapters.

This Messy Magnificent Life Moody Pub Just as the Wright Brothers combined science and practice to finally realize the dream of flight, Ryan and Robert Quinn combine research and personal experience to demonstrate how to reach a psychological state that elevates us and those around us to greater heights of achievement, integrity, openness, and empathy. It's the psychological equivalent of aerodynamic lift, and it is the fundamental state of leadership. This book draws on recent advances in positive psychology and organizational science to describe four questions that, when asked in any situation, will help us experience the fundamental state of leadership. Engaging personal stories illustrate how the Quinns and others have applied these concepts at work, at home, and in the community. --

Field Guide to Lidar John Wiley & Sons From tea guru Sebastian Beckwith and New York Times bestsellers Caroline Paul and Wendy MacNaughton comes the essential guide to exploring and enjoying the vast world of tea. Tea, the most popular beverage in the world after water, has brought nations to war, defined cultures, bankrupted coffers, and toppled kings. And yet in many ways this

fragrantly comforting and storied brew remains elusive, even to its devotees. As down-to-earth yet stylishly refined as the drink itself, *A Little Tea Book* submerges readers into tea, exploring its varieties, subtleties, and pleasures right down to the process of selecting and brewing the perfect cup. From orange pekoe to pu-erh, tea expert Sebastian Beckwith provides surprising tips, fun facts, and flavorful recipes to launch dabblers and connoisseurs alike on a journey of taste and appreciation. Along with writer and fellow tea-enthusiast Caroline Paul, Beckwith walks us through the cultural and political history of the elixir that has touched every corner of the world. Featuring featuring charming, colorful charts, graphs, and illustrations by bestselling illustrator Wendy MacNaughton and Beckwith's sumptuous photographs, *A Little Tea Book* is a friendly, handsome, and illuminating primer with a dash of sass and sophistication. Cheers!

The Opposite of Hate HarperCollins How librarians can be radical positive change agents in their communities, dedicated to learning and making a difference. This book offers a guide for librarians who see their profession as a chance to make a positive difference in their communities—librarians who recognize that it is no longer enough to stand behind a desk waiting to serve. R. David Lankes, author of *The Atlas of New Librarianship*, reminds librarians of their mission: to improve society by facilitating knowledge creation in their communities. In this book, he provides tools, arguments, resources, and ideas for fulfilling this mission. Librarians will be prepared to become radical positive change agents in their communities, and other readers will learn to understand libraries in a new way. The librarians of Ferguson, Missouri, famously became positive change agents in August 2014 when they opened library doors when schools were closed because of civil unrest after the shooting of an unarmed teen by police. Working with other local organizations, they provided children and their parents a space for learning, lunch, and peace. But other libraries serve other communities—students, faculty, scholars, law firms—in other ways. All libraries are about community, writes Lankes; that is just librarianship. In concise chapters, Lankes addresses the mission of libraries and explains what constitutes a library. He offers practical advice for librarian training; provides teaching notes for each chapter; and answers "Frequently Argued Questions" about the new librarianship. *Lift* Myers Education Press

How to understand a media environment in crisis, and how to make things better by approaching information ecologically. Our media environment is in crisis. Polarization is rampant. Polluted information floods social media. Even our best efforts to help clean up can backfire, sending toxins roaring across the landscape. In *You Are Here*, Whitney Phillips and Ryan Milner offer strategies for navigating increasingly treacherous information flows. Using ecological metaphors, they emphasize how our individual me is entwined within a much larger we, and how everyone fits within an ever-shifting network map. *Building the Bridge As You Walk On It* Houghton Mifflin Harcourt

Deep Change John Wiley & Sons

Whether they recognize it or not, virtually all colleges and universities face three Grand Challenges: Improve the learning outcomes of a higher education: A large majority of college graduates are weak in capabilities that faculty and employers both see as crucial. Extend more equitable access to degrees: Too often, students from underserved groups and poor households either don't enter college or else drop out without a degree. The latter group may be worse off economically than if they'd never attempted college. Make academic programs more affordable (in money and time) for students and other important stakeholder groups: Many potential students believe they lack the money or time needed for academic success. Many faculty believe they don't have time to make their courses and degree programs more effective. Many institutions believe they can't afford to improve outcomes. These challenges are global. But, in a higher education system such as that in the United States, the primary response must be institutional. This book analyzes how, over the years, six pioneering colleges and universities have begun to make visible, cumulative progress on all three fronts.
