The Principles of Ethics
SAGE Publishing India
Revised for the first time
in over thirty years, this
edition of Emile
Durkheim's masterful
work on the nature and
scope of sociology is

updated with a new
introduction and improved
translation by leading
scholar Steven Lukes that
puts Durkheim's work into
context for the twenty-
first century reader. The
Rules of Sociological
Method represents Emile
Durkheim's manifesto for
sociology. He argues
forcefully for the
objective, scientific, and

methodological
underpinnings of
sociology as a discipline
and establishes guiding
principles for future
research. The substantial
new introduction by
leading Durkheim scholar
Steven Lukes explains
and sets into context
Durkheim's arguments.
Lukes examines the still-
controversial debates

about *The Rules of Sociological Method*'s six chapters and explains their relevance to present-day sociology. The edition also includes Durkheim's subsequent thoughts on method in the form of articles, debates with scholars from other disciplines, and letters. The original translation has been revised and reworked in order to make Durkheim's arguments clearer and easier to read. This is an essential resource for students and scholars hoping to deepen their

understanding of one of the pioneering voices in modern sociology and twentieth-century social thought.

#1 NEW YORK TIMES, WALL STREET JOURNAL, AND BOSTON GLOBE BESTSELLER • One of the most acclaimed books of our time: an unforgettable memoir about a young woman who, kept out of school, leaves her survivalist family and goes on to earn a PhD

from Cambridge University "Extraordinary . . . an act of courage and self-invention."—The New York Times NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY THE NEW YORK TIMES BOOK REVIEW • ONE OF PRESIDENT BARACK OBAMA'S FAVORITE BOOKS OF THE YEAR • BILL GATES'S HOLIDAY READING LIST • FINALIST: National Book Critics Circle's Award In Autobiography and John Leonard Prize For Best First Book • PEN/Jean Stein Book Award • Los

 Born to survivalists in the mountains of Idaho, Tara Westover was seventeen the first time she set foot in a classroom. Her family was so isolated from mainstream society that there was no one to ensure the children received an education, and no one to intervene when one of Tara's older brothers became violent. When another brother got himself into college, Tara decided to try a new kind of life. Her quest for knowledge transformed her, taking her over

oceans and across continents, to Harvard and to Cambridge University. Only then would she wonder if she'd traveled too far, if there was still a way home. "Beautiful and propulsive . . . Despite the singularity of [Westover's] childhood, the questions her book poses are universal: How much of ourselves should we give to those we love? And how much must we betray them to grow up?"—Vogue NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Washington Post • O: The

overview of current research on private security and military companies, comprising essays by leading scholars from around the world. The increasing privatization of security across the globe has been the subject of much debate and controversy, inciting fears of private warfare and even the collapse of the state. This volume provides the first comprehensive overview of the range of issues raised by contemporary security privatization, offering both a survey of

the numerous roles performed by private actors and an analysis of their implications and effects. Ranging from the mundane to the spectacular, from secretive intelligence gathering and neighbourhood surveillance to piracy control and warfare, this Handbook shows how private actors are involved in both domestic and international security provision and governance. It places this involvement in historical perspective, and demonstrates how

the impact of security privatization goes well beyond the security field to influence diverse social, economic and political relationships and institutions. Finally, this volume analyses the evolving regulation of the global private security sector. Seeking to overcome the disciplinary boundaries that have plagued the study of private security, the Handbook promotes an interdisciplinary approach and contains contributions from a range of disciplines, including

international relations, politics, criminology, law, sociology, geography and anthropology. This book will be of much interest to students of private security companies, global governance, military studies, security studies and IR in general. A Memoir Penguin Introduction to Sociology 2e adheres to the scope and sequence of a typical, one-semester introductory sociology course. It offers comprehensive coverage of core concepts, foundational scholars, and emerging theories, which

are supported by a wealth of engaging learning materials. The textbook presents detailed section reviews with rich questions, discussions that help students apply their knowledge, and features that draw learners into the discipline in meaningful ways. The second edition retains the book's conceptual organization, aligning to most courses, and has been significantly updated to reflect the latest research and provide examples most relevant to today's students. In

order to help instructors transition to the revised version, the 2e changes are described within the preface. The images in this textbook are grayscale. Authors include: Heather Griffiths, Nathan Keirns, Eric Strayer, Susan Cody-Rydzewski, Gail Scaramuzzo, Tommy Sadler, Sally Vyain, Jeff Bry, Faye Jones *Introduction to Sociology* 2e Routledge In this book it explores science and technology, makes connections between these epistemic,

cultural, and political trends, and develops profound insights into the nature of our postmodernity.

ineffectiveness are often expected of public servants in developing countries. However, some groups within these states are distinctly more effective and public oriented than the rest. Why? Patchwork Leviathan explains how a few spectacularly effective state organizations manage to thrive amid general institutional weakness and succeed against impressive odds. Drawing on the Hobbesian image of the state as Leviathan, Erin Metz McDonnell

argues that many seemingly weak states actually have a wide range of administrative capacities. Such states are in fact patchworks sewn loosely together from scarce resources into the semblance of unity. McDonnell demonstrates that when the human, cognitive, and material resources of bureaucracy are rare, it is critically important how they are distributed. Too often, scarce bureaucratic resources are scattered throughout the state, yielding little effect.

McDonnell reveals how a sufficient concentration of resources clustered within particular pockets of a state can be transformative, enabling distinctively effective organizations to emerge from a sea of ineffectiveness.

Patchwork Leviathan offers a comprehensive analysis of successful statecraft in institutionally challenging environments, drawing on cases from contemporary Ghana and Nigeria, mid-twentieth-century Kenya and Brazil, and China in the early

twentieth century. Based on nearly two years of pioneering fieldwork in West Africa, this incisive book explains how these highly effective pockets differ from the Western bureaucracies on which so much state and organizational theory is based, providing a fresh answer to why well-funded global capacity-building reforms fail—and how they can do better.

Collapse and Regression

Democracy and Brazil:
Collapse and Regression

discusses the de-democratization process underway in contemporary Brazil. The relative political stability that characterized domestic politics in the 2000s ended with the sudden emergence of a series of massive protests in 2013, followed by the controversial impeachment of Dilma Rousseff in 2016 and the election of Jair Bolsonaro in 2018. In this new, more conservative period in Brazilian politics, a series of institutional reforms deepened the distance

between citizens and representatives. Brazil's current political crisis cannot be understood without reference to the continual growth of right-wing and ultra-right discourse, on the one hand, and to the neoliberal ideology that pervades the minds of large parts of the Brazilian elite, on the other. Twenty experts on Brazil across different fields discuss the ongoing political turmoil in the light of distinct problems: geopolitics, gender, religion, media, indigenous populations,

right-wing strategies, and new forms of coup, among others. Updated analyses enriched with historical perspective help to illuminate the intricate issues that will determine the country's fate in years to come. Democracy and Brazil: Collapse and Regression will interest students and scholars of Brazilian Politics and History, Latin America, and the broader field of democracy studies.

This volume is the twelfth in the series 'Land

Reforms in India'. It focuses on the multi-dimensional aspects of the agrarian problem, examining it from the angle of public policy. A distinguishing feature of this collection is its holistic approach towards viewing farm sector distress, instead of looking for isolated causes and solutions. The essays, based on the research and analyses conducted by academics from different parts of the country, examine the reasons for the growing agrarian crisis and

increasing incidences of farmers' suicides in specific regions of the country. They take into account regional discrepancies in agricultural growth and implementation of policies in specific areas. In doing that, they also bring to light the various types of farm sector distress, which, in turn, leads to a better understanding of the whole situation. The compilation also attempts to define a systematic policy line.

Debating Humanity explores sociological and philosophical efforts to delineate key features of humanity that identify us as members of the human species. After challenging the normative contradictions of contemporary posthumanism, this book goes back to the foundational debate on humanism between Jean-Paul Sartre and Martin Heidegger in the 1940s and then re-assesses the implicit and explicit anthropological

arguments put forward by seven leading postwar theorists: self-transcendence (Hannah Arendt), adaptation (Talcott Parsons), responsibility (Hans Jonas), language (Jrgen Habermas), strong evaluations (Charles Taylor), reflexivity (Margaret Archer) and reproduction of life (Luc Boltanski). Genuinely interdisciplinary and boldly argued, Daniel Chernilo has crafted a novel philosophical sociology that defends a universalistic principle of

humanity as vital to any adequate understanding of social life.

"'Bobby BlueJacket' illuminates a neglected history of American crime, identity, and politics in the 20th century. This is the extraordinary true story of a man who went from career thief and convicted killer to celebrated prison journalist-ultimately becoming a respected Eastern Shawnee activist and orator. 'Bobby

BlueJacket' draws upon 5 years of interviews with the subject, long-buried law enforcement and trial records, prison archives, news accounts, and interviews with others such as photographer Larry Clark and veteran reporters of Tulsa's crime beat. More than just an underworld tale-'Bobby BlueJacket' is an in-depth exploration of one man's experience in a brutal post-war world."--

A Study of History Anchor
A notable contribution to our understanding of ourselves. This book explores the realm of human behavior in social situations and the way that we appear to others. Dr. Goffman uses the metaphor of theatrical performance as a framework. Each person

in everyday social intercourse presents himself and his activity to others, attempts to guide and control the impressions they form of him, and employs certain techniques in order to sustain his performance, just as an actor presents a character to an audience. The discussions of these social techniques offered here are based upon detailed research and observation of social customs in many regions. *Sociology* De Gruyter Oldenbourg
Our usual representations

of the opposition between the "civilized" and the "primitive" derive from willfully ignoring the relationship of distance our social science sets up between the observer and the observed. In fact, the author argues, the relationship between the anthropologist and his object of study is a particular instance of the relationship between knowing and doing, interpreting and using, symbolic mastery and practical mastery—or between logical logic, armed with all the

accumulated instruments of objectification, and the universally pre-logical logic of practice. In this, his fullest statement of a theory of practice, Bourdieu both sets out what might be involved in incorporating one's own standpoint into an investigation and develops his understanding of the powers inherent in the second member of many oppositional pairs—that is, he explicates how the practical concerns of daily life condition the transmission and

functioning of social or cultural forms. The first part of the book, "Critique of Theoretical Reason," covers more general questions, such as the objectivization of the generic relationship between social scientific observers and their objects of study, the need to overcome the gulf between subjectivism and objectivism, the interplay between structure and practice (a phenomenon Bourdieu describes via his concept of the habitus), the place of the body, the manipulation of time,

varieties of symbolic capital, and modes of domination. The second part of the book, "Practical Logics," develops detailed case studies based on Bourdieu's ethnographic fieldwork in Algeria. These examples touch on kinship patterns, the social construction of domestic space, social categories of perception and classification, and ritualized actions and exchanges. This book develops in full detail the theoretical positions sketched in Bourdieu's

Outline of a Theory of Practice. It will be especially useful to readers seeking to grasp the subtle concepts central to Bourdieu's theory, to theorists interested in his points of departure from structuralism (especially from Lévi-Strauss), and to critics eager to understand what role his theory gives to human agency. It also reveals Bourdieu to be an anthropological theorist of considerable originality and power.

The aim is to publish studies that change focus back and forth from the intimacy and complexity of relationships in specific places and their connections to distant places and long-term processes of change

thereby looking beyond locality and region.

 the attitudes and beliefs
 of parents who choose not
 to immunize their children
 The measles outbreak at

Disneyland in December
 2014 spread to a half-
 dozen U.S. states and
 sickened 147 people. It is
 just one recent incident
 that the medical
 community blames on the
 nation's falling
 vaccination rates. Still,
 many parents continue to
 claim that the risks that
 vaccines pose to their
 children are far greater
 than their benefits. Given
 the research and the
 unanimity of opinion
 within the medical
 community, many ask
 how such parents—who
 are most likely to be

white, college educated, and with a family income over \$75,000—could hold such beliefs. For over a decade, Jennifer Reich has been studying the phenomenon of vaccine refusal from the perspectives of parents who distrust vaccines and the corporations that make them, as well as the health care providers and policy makers who see them as essential to ensuring community health. Reich reveals how

parents who opt out of vaccinations see their decision: what they fear, what they hope to control, and what they believe is in their child's best interest. Based on interviews with parents who fully reject vaccines as well as those who believe in "slow vax," or altering the number of and time between vaccinations, the author provides a fascinating account of these parents' points of view. Placing

these stories in dialogue with those of pediatricians who see the devastation that can be caused by vaccine-preventable diseases and the policy makers who aim to create healthy communities, *Calling the Shots* offers a unique opportunity to understand the points of disagreement on what is best for children, communities, and public health, and the ways in which we can bridge these differences.
