This project explored the intersection between theater literacy and digital media literacy in order to create a unit for the middle school classroom. The unit plan was designed to teach digital media literacy using a drama curriculum drawn from the Utah State Theater Core (Utah State Board of Education, 2016) in the secondary classroom. There were two parts to this integration. The first was to have students examine online media in order to analyze and evaluate digital media from a performance perspective. The second was to create a performance piece using digital media.

Performance studies was the theatrical technique used to examine digital media. The objectives of this project were to create a unit plan and accompanying lesson plans for teaching digital literacy in a middle school drama class that focused on:

1. The navigation of the intersection between theater literacy and digital media literacy to help students think more critically about their digital media use.
2. Authentic applications of media literacy in real world situations to help students better understand the world they live in and make more educated decisions about their media consumption.
3. The application of theater techniques to interpret digital media

as performance and the expansion of the students' digital media literacy skills. The unit plan was implemented with some success, though there were several problems. The students had mixed reactions to the unit, but overall, enjoyed learning something new and having choice as to the message they were asked to create.

Drama and Education provides a practical, comprehensive guide to drama as a tool for teaching and learning. It is among the first practical drama and performance textbooks that address brain-based, neuroscientific research, making the argument that creativity is necessary

in our lives, that embodied learning is natural and essential, and that contextual learning helps us find our place in society in relationship to other peoples and cultures. As well as a historical and theoretical overview of the field, it provides rationale and techniques for several specific methodologies: linear drama, process-oriented drama, drama for social justice, and performance art. Each approach is supplemented with sample lesson plans, activities, ideas for differentiation, and extensive bibliographies. The topics are discussed from five key angles: • Historical and theoretical foundations • Curricular applications • Practical toolkits for a range of

classrooms and learning environments

- Different strategies for lesson plans •

Extension options for longer workshops. Alongside these core methods, the integration of other innovative forms—from performance art to Theatre of the Oppressed—into drama-based learning is explored, as well as the pragmatic concerns such as assessment, planning, and advocacy for arts learning and arts education partnerships. Drama and Education is the comprehensive textbook for teachers and students on Applied Theatre and Theatre and Education courses.
