Delhi University M.Com Entrance Question Paper - 2020

Springer

The rapid rise of knowledge-based economies has revolutionized the perceptions and practices of globalized business. Recent developments in engineering, electronics, and biotechnology have expanded the very definition of entrepreneurship in today's international market, weaving discussions of enhanced connectivity and communication, environmental sustainability, and government policy changes into a complex, multidimensional conversation. The Handbook of Research of Entrepreneurship in the Contemporary Knowledge-Based Global Economy provides a comprehensive survey of the most recent developments in the field of entrepreneurship, highlighting their effects on information technology, business networking, knowledge production, distribution, and organization. This timely publication features extensive coverage of the fast-developing entrepreneurial field, illuminating recent technological, social, and strategic innovations in language that is accessible for a worldwide audience of business educators, researchers, and students. This authoritative text showcases research-based articles on entrepreneurship for knowledge economies; academic entrepreneurship; women and entrepreneurship; entrepreneurship education; organizational learning ability; innovations in industry, agriculture, and management; and the evolution of a new, all-inclusive corporate culture.

Oswaal ISC Question Bank Class 11 Business Studies Book Chapterwise & Topicwise (For 2022 Exam) Springer

Using evidence from the microfinance sector, which is considered a leading sector of social entrepreneurship, this book attempts to push the boundaries of research in this field. While recent studies consider that commercial enterprises, not-for-profits and social enterprises are formed by entrepreneurs with different personal identities, they do not explain why these personalities may change before they convert their social enterprises, and change further at the stage of transitioning into commercial enterprises. Presenting a theory of development and evolution for social enterprises which examines the dynamics associated with change, impact and growth and an in-depth critical view of motivation, funding and profit, this book examines how that impacts the social mission and enterprise structure in the wake of hybrid and for-profit models and corporate philanthropy. The author highlights the 'cracks' in social entrepreneurship and asks how they are being filled, institutionally.

Entrepreneurship and Business Management SBPD Publications
 Entrepreneurship Trajectories: Entrepreneurial Opportunities, Business Models, and Firm Performance explores several entrepreneurship trajectories recognized by economists and entrepreneurs. It is not possible to talk about growth paths addressed by entrepreneurial ventures without recalling the business model and the type of entrepreneurial opportunity at their foundations. Diego Matricano assumes that the growth paths addressed by entrepreneurial ventures depend on both effective business models and promising opportunities. This pragmatic guide illuminates the entrepreneurial trajectories linking opportunities, business models, and growth paths, offering complete and nuanced views through its extensive use of case studies. Defines both theoretically and empirically the entrepreneurship trajectories that entrepreneurs can address Provides cases and data about ongoing startups from official websites such as Global Entrepreneurship Monitor, US Census Bureau, and Eurostat Describes a comprehensive view of entrepreneurship trajectories that link entrepreneurial opportunities, business models, and growth paths
Concepts and Cases Oswaal Books and Learning Private Limited
 This book examines an important economic development in East Asia during the first decade of the 21st century. Whereas regional arrangements were, with the sole significant exception of ASEAN, conspicuously absent before 2000, they have proliferated since 2000 in both the monetary and trade areas. The book places this political development in the changing nature of the national economies, especially their increasing integration into regional and global value chains with the fragmentation of production processes. This is a freshly written, coherent analysis of the topic, drawing upon (updated) material from a series of articles that the author has published on the subject over the years. Although the book is based on theoretical and, especially, empirical analysis of regionalism, it is written in a non-technical style accessible to a wide range of readers. The book is likely to be adopted as supplementary reading for university courses on Asian economies, whether be it in area studies or economics/political economy disciplines.

In Search of Business Models in Social Entrepreneurship IGI Global

PGT Commerce Previous Year Question Paper with Answer Innovative Institute

This innovative book takes seriously the ordinary activities of entrepreneurship and maps out new pathways for scholars to understand the nature, properties, and implications of studying practices for entrepreneurship studies. Entrepreneurship is neither an art nor a science, but a bundle of practices, as Peter Drucker once observed. Curiously however, academic research on entrepreneurship mostly abstracts away from practical activity. In contrast, *Entrepreneurship As Practice* takes ordinary activities of entrepreneurship seriously by mapping out new pathways for scholars to consider the everyday practices through which entrepreneurship occurs. Each chapter draws on contemporary theories of practice to illuminate the nature, properties, and implications of studying the practices of entrepreneurship. The chapters in this book were originally published as a special issue of the journal *Entrepreneurship & Regional Development*.

M.Com Entrance Question Paper - 2020 for Delhi University Oswaal Books and Learning Private Limited

Entrepreneurship is a phenomenon of tremendous societal importance. It is also an elusive phenomenon, and researching entrepreneurship is therefore fun, fascinating—and frustrating at times. In *Researching Entrepreneurship*, one of the most highly recognized entrepreneurship scholars shares in a personal and readable way his rich experience and ideas on how entrepreneurship can or should be researched. After a comprehensive treatment of entrepreneurship as societal phenomenon and scholarly domain, the core chapters of the book discuss design, sampling, operationalization and analysis issues on several levels of analysis: individual, venture, firm, industry, region and nation. The author provides numerous examples of problems and solutions from real research projects, as well as experienced-based suggestions for further improvements in future work. The book is targeted primarily at doctoral students and other (relative) newcomers to the field of entrepreneurship research. However, taking a fresh, reflective perspective and looking beyond research conventions, it should provide potential for inspiration and food for thought also for experienced entrepreneurship researchers. Moreover, while the examples are taken from entrepreneurship research, the book provides a unique "experienced empirical researcher" (rather than "textbook method expert") treatment of issues that are of equal relevance across the social sciences. This goes for topics such as the role of theory; qualitative vs. quantitative research; validity checking; statistical inference, and replication. Per Davidsson is Professor in Entrepreneurship at Brisbane Graduate School of Management, QUT, Australia, and Jönköping International Business School, Sweden. He is also Chair of the Research Committee of the Entrepreneurship Division of the (American) Academy of Management.

Entrepreneurship Trajectories Innovative Institute

This book makes original contributions to the literature on clusters, human capital, and regional development by focusing on the link between entrepreneurship and economic growth, aiming for a better understanding of the dynamics of growth determined by the entrepreneur's action in the regional space. The focus is therefore on critical reflection and rethinking the articulation between three levels of analysis of economic systems, namely entrepreneurship, human capital and regional development, which have not so far been perfectly articulated in the literature of reference on endogenous growth. Although there has been significant research so far into the success and failure of clusters, the implications of these multiple research efforts fail to provide political decision-makers and company managers with critical information about which mechanisms lie behind cluster success and also about how clusters survive and prosper. The innovative approaches presented in this book on entrepreneurship, human capital mobility and regional development have considerable potential to create new and original implications for decision-makers and managers. In terms of value added, this book contributes to the literature by seeking answers to the following questions: (i) Is the growth and success of clusters over time due

to concentration and transmission of business competences through spin-offs located in a given regional space? (ii) Does increased density of job options outside the workplace contribute to increased mobility of human capital between firms located within clusters, and so improve coordination in the local labor market? (iii) Do spin-offs benefit from hiring workers from successful incumbents, inasmuch as those workers are expected to perform better than other workers from different origins? Integrating theoretical frameworks, empirical research, and regional case studies (from Portugal, Spain, Norway and Turkey), the editors and contributors demonstrate that the regional dynamics of industry growth are strongly influenced by the mobility of employees towards new firms.
