Does the identification number 60 indicate a toxic substance or a flammable solid, in the molten state at an elevated temperature? Does the identification number 1035 indicate ethane or butane? What is the difference between natural gas transmission pipelines and natural gas distribution pipelines? If you came upon an overturned truck on the highway that was leaking, would you be able to identify if it was hazardous and know what steps to take? Questions like these and more are answered in the *Emergency Response Guidebook*. Learn how to identify symbols for and vehicles carrying toxic, flammable, explosive, radioactive, or otherwise harmful substances and how to respond once an incident involving those substances has been identified. Always be prepared in situations that are unfamiliar and dangerous and know how to rectify them. Keeping

this guide around at all times will ensure that, if you were to come upon a transportation situation involving hazardous substances or dangerous goods, you will be able to help keep others and yourself out of danger. In times of constant

change, adaptive leadership is critical. This Harvard Business Review collection brings together the seminal ideas on how to adapt and thrive in challenging environments, from leading thinkers on the topic—most notably Ronald A. Heifetz of the Harvard Kennedy School and Cambridge Leadership Associates. The Heifetz Collection includes two classic books: *Leadership on the Line*, by Ron Heifetz and Marty Linsky, and *The Practice of Adaptive Leadership*, by Heifetz, Linsky, and Alexander Grashow. Also included is the popular Harvard Business Review article, “Leadership in a (Permanent) Crisis,” written by all three authors. Available together for the first time, this collection includes full digital editions of each work. Adaptive leadership is a practical framework for dealing with today’s mix of urgency, high stakes, and uncertainty. It has been used by individuals, organizations, businesses, and governments worldwide. In a world of challenging environments, adaptive leadership serves as a guide to distinguishing the essential from the expendable, beginning

the meaningful process of adaption, and changing the status quo. Ronald A. Heifetz is a cofounder of the international leadership and consulting practice Cambridge Leadership Associates (CLA) and the founding director of the Center for Public Leadership at the Harvard Kennedy School. He is renowned worldwide for his innovative work on the practice and teaching of leadership. Marty Linsky is a cofounder of CLA and has taught at the Kennedy School for more than twenty-five years. Alexander Grashow is a Senior Advisor to CLA, having previously held the position of CEO. *Fire Officer's Guide to Disaster Control* Fire Engineering Books The problem was that the Newton Fire/EMS Department had no formalized procedure for completing initial damage assessment activities following community-wide disasters, which produced fragmented and disorganized initial emergency response. The purpose of this research was to develop a damage assessment policy to guide the activities of emergency responders immediately following a community-wide disaster. Industry best

practices were investigated, and other public safety agencies' perceptions of damage assessment activities were explored. Additionally, Newton Fire/EMS members reported their perceptions of the importance and desired outcomes of damage assessment performance. Finally, a model Standard Operating Guideline was constructed in an effort to employ research results to guide the activities of emergency responders arriving at the scene of community-wide disasters. Action research was used to complete this research project. An internal survey of Newton Fire/EMS employees was conducted, as was an external survey of members of the International Association of Fire Chiefs Executive Fire Officer Section in an effort to gather information regarding damage assessments. A model SOG was created, and a comprehensive literature review was conducted. The research revealed that most emergency responders understood the importance of conducting initial damage assessments during community-wide

disasters, and that rapid windshield surveys by first-arriving firefighters were usually the most important method. This research supports the creation of a Damage Assessment SOG for use by members of the Newton Fire/EMS Department.

Jones & Bartlett Publishers
Emergency medical service represents more than 80 per cent of the response activity in emergency response agencies. The whole concept of EMS has undergone drastic changes and improvements over the past three decades. With the ongoing threat of deadly diseases, the methods once practiced to treat trauma victims are not necessarily the best, or safest, procedures. In this day

and age, change is the only constant. This book is designed to improve the quality of your EMS delivery.

Protecting Historic Architecture and Museum Collections from Natural Disasters serves as a useful guide for professionals engaged in the preservation of cultural heritage, whether structures or artifacts. This book discusses how to prevent losses to the cultural heritage of structures and artifacts

through more knowledgeable protection, prevention, and emergency response. Organized into six sections encompassing 26 chapters, this book begins with an overview of the mechanisms for preserving and protecting the heritage. This text then examines the threats of destruction by the natural elements such as decay, air pollution, subsidence, and other forms of attrition. Other chapters consider the social functional and economic values of the buildings and museum objects. This book discusses as well the natural disaster policies within a society. The final chapter deals with the enlistment of the private sector in dealing with catastrophes rising out of fire, earthquake, flood, and other natural disasters. This book is a valuable resource for conservation specialists, archivists, private collectors, dealers, curators, and librarians.
