Click and Collect from your local Waterstones or get FREE UK delivery on orders over \u00a325. Modular CBT for Children and Adolescents with Depression ... This study evaluated a modular CBT program for childhood anxiety disorders in two elementary schools. Forty children (5-12 years old) with anxiety disorders, referred by teachers and school staff, were randomly assigned to modular CBT or a 3-month waitlist. Clinicians worked with individual families as well as teachers and school staff. Effectiveness of modular CBT for child anxiety in ... There are a number of modular treatments for internalizing disorders. The first clearly identified modular therapy for children—Modular CBT—was developed to address anxiety disorders in children. This treatment is based on CBT work with adults [25, 26] and with children [27, 28]. It includes a minimum of four core modules (self-monitoring, psychoeducation about anxiety, exposure, and maintenance), along with optional cognitive modules and content for addressing disruptive behaviors ...
