 Color theory encompasses a multitude of definitions, concepts and design applications - enough to fill several encyclopedias. However, there are three basic categories of color theory that are logical and useful : The color wheel, color harmony, and the context of how colors are used. Color theories create a logical structure for color. Basic Color Theory - Color Matters  
 Colour design provides a comprehensive review of the issues surrounding the use of colour, from the fundamental principles of what colour is to its important applications across a vast range of industries. Part one covers the main principles and theories of colour, focusing on the human visual system and the psychology of colour perception. Colour Design | ScienceDirect

 In Color for Designers: Exploration, Theory, & Application, Richard Mehl will give you a foundational understanding of color theory principles and demonstrate how to apply them. Richard has studied alongside design legends Paul Rand, Bradbury Thompson and Herbert Matter; in this class he'll share insights gleaned from 12 years of teaching and ...  
 Color Theory for Designers: Exploration and Application  
 Karen Haller is one of the UK's leading experts on using colour in interior design. She has spent over 20 years studying and working with colour psychology. Karen brings her extensive expertise to an insightful and practical guide to the subject, in a new industry book, 'Colour Design: Theories and Applications'. In Chapter 20, 'Colour In Interiors', Karen offers a step-by-step guide ...  
 Colour Design: Theories and Applications | SBID  
 to colour, whether on an ontogenetic or evolutionary timescale, is deeply embedded in human nature. Key words: colour preference, colour perception, evolution, behaviour. 5.1 Introduction  
 At this point in a book devoted to theories and applications of colour perception and design, it may seem belated to ask: 'what is the use of colour?'  
 Understanding colour perception and preference  
 Nearly all persons who have contributed to color science, recently as well as formerly, were attracted to the study of color by color in art. Use of objective or scientific methods did not result from any cold, detached attitude, but from the inherent difficulties of the problems concerning color and its use, by which they were intrigued.
