**The Alchemist** HarperCollins  
Westminster John Knox Press is pleased to present the seventeen-volume Old Testament for Everyone series. Internationally respected Old Testament scholar John Goldingay addresses Scripture from Genesis to Malachi in such a way that even the most challenging passages are explained simply and concisely. The series is perfect for daily devotions, group study, or personal visits with the Bible. In this volume on Isaiah, Goldingay explores the first of the great prophetic books. Isaiah is a compilation of the prophetic messages of several prophets. Their messages to the people of

Judah and Jerusalem included a call for injustice to be recognized, a message of liberation and hope from the oppressors of the people, and a message of the coming day of judgment. These separate messages are held together by the promise of a new age of redemption and peace that lies beyond the crisis of judgment.

Students today are writing more than ever. Everyone's an Author bridges the gap between the writing students already do--online, at home, in their communities--and the writing they'll do in college and beyond. It builds student confidence by showing that they already know how to

think rhetorically and offers advice for applying those skills as students, professionals, and citizens. Because students are also reading more than ever, the third edition includes new advice for reading critically, engaging respectfully with others, and distinguishing facts from misinformation. Also available in a version with readings.

Ethnography centers on the culture of everyday life. So it is ironic that most scholars who do research on the intimate experiences of ordinary people write their books in a style that those people cannot understand. In recent years, the ethnographic method has spread from its original home in cultural anthropology to fields such as sociology, marketing, media studies, law, criminology, education, cultural studies, history, geography, and political science. Yet, while more and more students and practitioners are learning how to write ethnographies, there is little or no training on how to write ethnographies well. From *Notes to Narrative* picks up where methodological training leaves off. Kristen Ghodsee, an award-winning ethnographer, addresses common issues that arise in ethnographic writing. Ghodsee works through sentence-level details, such as word choice and structure. She also tackles bigger-picture elements, such as how to incorporate theory and ethnographic details, how to effectively deploy dialogue, and how to avoid distracting elements such as long block quotations and in-text citations. She includes excerpts and examples from model ethnographies. The book concludes with a bibliography of other useful writing guides and nearly one hundred examples of eminently readable ethnographic books.

I Like Long Walks Away from Everyone Random House

Are you a genius or a genius maker? We've all had experience with two dramatically different types of leaders. The first type drain intelligence, energy, and capability from the ones around them and always need to be the smartest ones in the room. These are the idea killers, the energy sappers, the diminishers of talent and commitment. On the other side of the spectrum are leaders who use their intelligence to amplify the smarts and capabilities of the people around them. When these leaders walk into a room, lightbulbs go off over people's heads, ideas flow, and problems get solved.

These are the leaders who inspire employees to stretch themselves to deliver results that surpass expectations. These are the Multipliers. And the world needs more of them, especially now, when leaders are expected to do more with less. In this engaging and highly practical book, leadership expert Liz Wiseman and management consultant Greg McKeown explore these two leadership styles, persuasively showing how Multipliers can have a resoundingly positive and profitable effect on organizations—getting more done with fewer resources, developing and attracting talent, and cultivating new ideas and energy to drive organizational change and innovation. In analyzing data from more than 150 leaders, Wiseman and McKeown have identified five disciplines that distinguish Multipliers from Diminishers. These five disciplines are not based on innate talent; indeed, they are skills and practices that everyone can learn to use—even lifelong and recalcitrant Diminishers. Lively, real-world case studies and practical tips and techniques bring to life each of these principles, showing you how to become a Multiplier too, whether you are a new or an experienced manager. Just imagine what you could accomplish if you could harness all the energy and intelligence around you. Multipliers will show you how. *From Notes to Narrative* Penguin Discover the essential thinking tools you've been missing with *The Great Mental Models* series by Shane Parrish, New York Times bestselling author and the mind behind the acclaimed Farnam Street blog and “The Knowledge Project” podcast. This first book in the series is your guide to learning the crucial thinking tools nobody ever taught you. Time and time again, great thinkers such as Charlie Munger and Warren Buffett have credited their success to mental models—representations of how something works that can scale onto other fields. Mastering a small number of mental models enables you to rapidly grasp new information, identify patterns others miss, and avoid the common mistakes that hold people back. *The Great Mental Models: Volume 1, General Thinking Concepts* shows you how making a few tiny changes in the way you think can deliver big results. Drawing on examples from history, business, art, and science, this book details nine of the most versatile, all-purpose mental models you can use right away to improve your decision making and productivity. This book will teach you how to: Avoid blind spots when looking at problems. Find non-obvious solutions. Anticipate and achieve desired outcomes.

Play to your strengths, avoid your weaknesses, ... and more. The Great Mental Models series demystifies once elusive concepts and illuminates rich knowledge that traditional education overlooks. This series is the most comprehensive and accessible guide on using mental models to better understand our world, solve problems, and gain an advantage.

*The Great Mental Models, Volume 1* Knopf Books for Young Readers

The illustrated story of a lonely alien sent to observe Earth, where he meets all sorts of creatures with all sorts of perspectives on life, love, and happiness, while learning to feel a little better about himself—based on the enormously popular Twitter account. Here is the unforgettable story of Jomny, an alien sent to study Earth. Always feeling apart, even among his species, Jomny feels at home for the first time among the earthlings he meets. There is a bear tired of other creatures running in fear, an egg struggling to decide what to hatch into, a turtle hiding itself by learning camouflage, a puppy struggling to express its true feelings, and many more. The characters are unique and inventive—bees think long and hard about what love means, birds try to eat the sun, nothingness questions its own existence, a ghost comes to terms with dying, and an introverted hedgehog slowly lets Jomny see its artistic insecurities. At the same time, Jomny's curious presence allows these characters to open up to him in ways they were never able to before, revealing the power of somebody who is just there to listen. Everyone's a Liebn When Ur a Liebn Too is also the story behind the widely-shared and typo-filled @jonny\_sun twitter account. Since the beginning, Sun intentionally tweeted from an outsider's perspective, creating a truly distinct voice. Now, that outsider has taken shape in the character of Jomny, who observes Earth with the same

intelligent, empathetic, and charmingly naïve voice that won over his fans on social media. New fans will find it organic, and old fans will delight at seeing the clever words that made them fans in the first place. Through this story of a lost, lonely and confused Alien finding friendship, acceptance, and love among the animals and plants of Earth, we will all learn how to be a little more human. And for all the earth-bound creatures here on this planet, we will all learn how sometimes, it takes an outsider to help us see ourselves for who we truly are.

This is the second, revised and expanded edition. The first edition was published under the slightly longer title "How to Take Smart Notes. One Simple Technique to Boost Writing, Learning and Thinking - for Students, Academics and Nonfiction Book Writers". The key to good and efficient writing lies in the intelligent organisation of ideas and notes. This book helps students, academics and other knowledge workers to get more done, write intelligent texts and learn for the long run. The Take Smart Notes principle is based on established psychological insight and draws from a tried and tested note-taking technique: the Zettelkasten. This is the first comprehensive guide and description of this system in English, and not only does it explain how it works, but also why. It suits students and academics in the social sciences and humanities, nonfiction writers and others who are in the business of reading, thinking and writing. Instead of wasting your time searching for your notes, quotes or references, you can focus on what really counts: thinking, understanding and developing new ideas in writing. Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control - from the author of *The Laws of Human Nature*. In the book that *People* magazine proclaimed "beguiling" and "fascinating," Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence ("Law 1: Never Outshine the Master"), others teach the value of confidence ("Law 28: Enter Action with

Boldness"), and many recommend absolute self-preservation ("Law 15: Crush Your Enemy Totally"). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, *The 48 Laws of Power* is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.
