All fruitful doing must begin with being. For many Christians, it's easy to be swept up into the fast pace of modern life, desiring to do much for God. But we struggle to slow down and be with God. According to pastor, Enneagram teacher, and author AJ Sherrill, being with God is what empowers doing for God. Sherrill shares his own journey from "busy" Christianity to the ancient paths of contemplative practices. He equips readers to integrate rhythms of stillness, silence, and solitude, offering step-by-step guidance and examples of finding solitude both personally and on retreats. Sherrill warns that making these changes appears absurd in a society where time is money, productivity is central, and hurry is a way of life. He guides readers gently through the beginning and often confusing stages of contemplative practice. Citing timely insights from the world of neurology and mental health, he shows that solitude is crucial not only for Christian growth but also for holistic flourishing. Foreword by Rich Villodas. Readers will emerge, centered in Christ, well on their way to this goal: slow down, pay attention, be still, and be loved.

Filling a gap in the sound recordings of traditional Anglo-American folk music this volume covers both vocal and instrumental material from the 1920s to the 1990s. The listings have also been limited to performers native to the tradition rather than "revival" performers. The album selection is grouped into field recordings and commercial (pre-1942) recordings, with subdivisions into individual recordings or anthologies. The discography not only reflects its author's in-depth knowledge of Anglo-American folk music's historical development but charts a valuable step forward in the evaluation, as well as select listing, of available sound recordings.

Within a world of incessant noise and chaos, Quiet is an invitation to seek God in stillness, silence and contemplation. Each chapter concludes with a contemplative practice for the reader. It is a helpful read for both individuals and small groups. Chronicling the author's personal journey, AJ Sherrill reveals how contemplative prayer practices compliment other forms of prayer prevalent in the Church such as intercessory, prophetic, and abiding prayer. If you find yourself longing for greater awareness, intimacy and peace with God, this resource aims to open more possibilities through prayer than many previously believe are available. It is a particular helpful guide for those who find themselves in urban and suburban contexts, where the decibel level of life has never been louder. Not only is this book relevant today, but also captures the thoughts and practices of many saints of times past. Quiet has been endorsed by Father Richard Rohr (Author and Franciscan Monk), Jon Tyson (Author and Lead Pastor of Trinity Grace Church in Manhattan) and Skye Jethani (Author and Editor at Christianity Today).

All previous Biblical Hebrew lexicons have provided a modern western definition and perspective to Hebrew roots and words. This prevents the reader of the Bible from seeing the ancient authors' original intent of the passages. This is the first Biblical Hebrew lexicon that defines each Hebrew word within its original Ancient Hebrew cultural meaning. One of the major differences between the Modern Western mind and the Ancient Hebrew's is that their mind related all words and their meanings to a concrete concept. For instance, the Hebrew word "chai" is normally translated as "life", a western abstract meaning, but the original Hebrew concrete meaning of this word is the "stomach". In the Ancient Hebrew mind, a full stomach is a sign of a full "life". The Hebrew language is a root system oriented language and the lexicon is divided into sections reflecting this root system. Each word of the Hebrew Bible is grouped within its roots and is defined according to its original ancient cultural meaning. Also included in each word entry are its alternative spellings, King James translations of the word and Strong's number. Indexes are included to assist with finding a word within the lexicon according to its spelling, definition, King James translation or Strong's number.

The rousing story of the last gasp of human agency and how today's best and brightest minds are endeavoring to put an end to it. It used to be that to diagnose an illness, interpret legal documents, analyze foreign policy, or write a newspaper article you needed a human being with specific skills—and maybe an advanced degree or two. These days, high-level tasks are increasingly being handled by algorithms that can do precise work not only with speed but also with nuance. These "bots" started with human programming and logic, but now their reach extends beyond what their

creators ever expected. In this fascinating, frightening book, Christopher Steiner tells the story of how algorithms took over—and shows why the "bot revolution" is about to spill into every aspect of our lives, often silently, without our knowledge. The May 2010 "Flash Crash" exposed Wall Street's reliance on trading bots to the tune of a 998-point market drop and \$1 trillion in vanished market value. But that was just the beginning. In Automate This, we meet bots that are driving cars, penning haiku, and writing music mistaken for Bach's. They listen in on our customer service calls and figure out what Iran would do in the event of a nuclear standoff. There are algorithms that can pick out the most cohesive crew of astronauts for a space mission or identify the next Jeremy Lin. Some can even ingest statistics from baseball games and spit out pitch-perfect sports journalism indistinguishable from that produced by humans. The interaction of man and machine can make our lives easier. But what will the world look like when algorithms control our hospitals, our roads, our culture, and our national security? What happens to businesses when we automate judgment and eliminate human instinct? And what role will be left for doctors, lawyers, writers, truck drivers, and many others? Who knows—maybe there's a bot learning to do your job this minute.
