The Role of Intergovernmental Fiscal Transfers in Improving Education Outcomes North Point Press

Master's Thesis from the year 2014 in the subject Sociology - Law, Delinquency, Abnormal Behavior, grade: 40.0 credits, University College Cork (School of Applied Social Studies), course: Master of Social Sciences (Social Policy), language: English, abstract: This research focused on the nature of rehabilitation provided to prisoners in correctional facilities in Uganda as offered by the Uganda Prisons Service (UPS). The specific objectives of the research were to: map the kind of rehabilitation programs provided to prisoners; clarify who provides them and how they are organised; and, to critically analyse the rehabilitation programs from the point of view of a human rights framework that is underpinned by basic standards for treatment of prisoners. It was premised on the fact that the UPS is currently shifting its approach from a purely penal role to become a correctional institution that upholds offenders' human rights. The overall finding was that indeed the UPS (attempts to) provide rehabilitation to prisoners. The types of rehabilitation programs are of varying degrees of efficiency. Particularly, programs in the UPS were undermined by prison overcrowding, poor resourcing, and understaffing. They mostly include functional adult literacy for those without prior academic education, and formal education at primary, secondary, and tertiary levels. They also include vocational and skills training, and limited psychosocial interventions. Psychosocial interventions were largely conducted on an informal basis by prison staff and social work volunteers and often took the form of group sensitisation programs. A key observation was that the rehabilitation programs that are being offered by the UPS lacked therapeutic integrity. In other words, they are not well conceived and do not rely on sound academic / criminological theory; they have no standardised curriculum; and they used staff (instructors) who were mostly unqualified and not adequately trained.

Modern African Nationalism Lantern Books

This World Bank report is a rich compilation of information on teaching learning materials (TLM) in Africa based on the extensive and multi-faceted experience of the author's work in the education sector in Africa. The study examines a wide range of issues around TLM provision including curriculum, literacy and numeracy, language of instruction policy, procurement and distribution challenges, TLM development and production and their availability, management and usage in schools. It also looks at the role of information and communication technology (ICT) based TLMs and their availability. The study recognizes that improved TLM system management is a critical component in achieving affordable and sustainable TLM provision for all students. This study, which draws from more than 40 Anglophone, Francophone, Lusophone, and Arabic-speaking countries will be particularly useful for policymakers, development partners, and other stakeholders attempting to understand the wide range of issues surrounding the complexity of textbook provision in Sub Saharan Africa.

Video Games Around the World Centre of African Studies University of Edinburgh

Thirty-nine essays explore the vast diversity of video game history and culture across all the world's continents. Video games have become a global industry, and their history spans dozens of national industries where foreign imports compete with domestic productions, legitimate industry contends with piracy, and national identity faces the global marketplace. This volume describes video game history and culture across every continent, with essays covering areas as disparate and far-flung as Argentina and Thailand, Hungary and Indonesia, Iran and Ireland. Most of the essays are written by natives of the countries they discuss, many of them game designers and founders of game companies, offering distinctively firsthand perspectives. Some of these national histories appear for the first time in English, and some for the first time in any language. Readers will learn, for example, about the rapid growth of mobile games in Africa; how a meat-packing company held the rights to import the Atari VCS 2600 into Mexico; and how the Indonesian MMORPG Nusantara

Online reflects that country's cultural history and folklore. Every country or region's unique conditions provide the context that shapes its national industry; for example, the long history of computer science in the United Kingdom and Scandinavia, the problems of piracy in China, the PC Bangs of South Korea, or the Dutch industry's emphasis on serious games. As these essays demonstrate, local innovation and diversification thrive alongside productions and corporations with global aspirations. Africa • Arab World • Argentina • Australia • Austria • Brazil • Canada • China • Colombia • Czech Republic • Finland • France • Germany • Hong Kong • Hungary • India • Indonesia • Iran • Ireland • Italy • Japan • Mexico • The Netherlands • New Zealand • Peru • Poland • Portugal • Russia • Scandinavia • Singapore • South Korea • Spain • Switzerland • Thailand • Turkey • United Kingdom • United States of America • Uruguay • Venezuela
Mathematics Education in East Africa Springer Science & Business Media

The book offers an overview of international examples, studies, and guidelines on how to create successful partnerships in education. PPPs can facilitate service delivery and lead to additional financing for the education sector as well as expanding equitable access and improving learning outcomes.

Medical Migration: World Bank Publications

This book is the first major study in several decades to consider Uganda as a nation, from its precolonial roots to the present day. Here, Richard J. Reid examines the political, economic, and social history of Uganda, providing a unique and wide-ranging examination of its turbulent and dynamic past for all those studying Uganda's place in African history and African politics. Reid identifies and examines key points of rupture and transition in Uganda's history, emphasising dramatic political and social change in the precolonial era, especially during the nineteenth century, and he also examines the continuing repercussions of these developments in the colonial and postcolonial periods. By considering the ways in which historical culture and consciousness has been ever present - in political discourse, art and literature, and social relationships - Reid defines the true extent of Uganda's viable national history.

Lusoga Grammar Routledge

This volume brings together a collection of papers based on presentations given at the 10th and 11th Fora for Linguistic Sharing, organised by the Young Researchers Group of the Centro de Linguística da Universidade Nova de Lisboa (CLUNL) and held at Universidade NOVA de Lisboa, Portugal, on the 27th and 28th November 2015 and on the 25th November 2016, respectively. The papers are authored by young researchers in linguistics and present the results of original research in two broad areas, namely text and discourse linguistics and grammar. This volume also includes a brief history of the Forum for Linguistic Sharing written by its founders, Audria Leal, Carla Teixeira, Isabelle Simões Marques and Matilde Gonçalves; a keynote article on text linguistics by Matilde Gonçalves; and a keynote article on word formation by Maria do Céu Caetano. Given that it brings together contributions from different, yet complementary, subfields of linguistics, the book will appeal to a broad readership of linguists.

The Building of Modern Africa World Bank Publications
Philosophy of education basically deals with learning issues that attempt to explain or answer what we describe as the major questions of its domains, i.e., what education is needed, why such education, and how would societies undertake and achieve such learning possibilities. In different temporal and spatial intersections of people's lives, the design as well as the outcome of such learning program were almost entirely indigenously produced, but later, they became perforce responsive to externally imposed demands where, as far as the history and the actualities of colonized populations were concerned, a cluster of de-philosophizing and de-epistemologizing educational systems were imposed upon them. Such realities of colonial education were not conducive to inclusive social well-being, hence the need to ascertain and analyze new possibilities of decolonizing philosophies of education, which this edited volume selectively aims to achieve. The book should serve as a necessary entry point for a possible re-routing of contemporary learning systems that are mostly of de-culturing and de-historicizing genre. With that in mind, the recommendations contained in the 12 chapters should herald the potential of decolonizing philosophies of education as liberating learning and livelihood praxes. "This collection of critical and scholarly analyses provides an insightful and timely resource for decolonizing philosophies of education

that continue to shape discourses, policies, curricula and practices in all levels of educational and social institutions. It also usefully challenges versions of postcolonial studies that fail to recognize and demystify the continuity of colonial hegemony in contemporary societal formations in both the global north and south." Toh Swee-Hin, Distinguished Professor, University for Peace, Costa Rica & Laureate, UNESCO Prize for Peace Education (2000) "Decolonizing philosophies of education edited by Ali A. Abdi is a collection of twelve essays by noted scholars in the field who provide strong readings of postcolonialism in education with an emphasis on decolonizing epistemologies. It provides a clear and comprehensive introduction to the critical history of colonization, postcolonial studies and the significance of education to the colonial project. This is an important book that provides a global perspective on the existential and epistemological escape from the colonial condition." Michael A. Peters, Professor, Educational Policy Studies, University of Illinois at Urbana-Champaign

Enhance and expand your students' knowledge and understanding of their AQA breadth study through expert narrative, progressive skills development and bespoke essays from leading historians on key debates. - Builds students' understanding of the events and issues of the period with authoritative, well-researched narrative that covers the specification content - Introduces the key concepts of change, continuity, cause and consequence, encouraging students to make comparisons across time as they advance through the course - Improves students' skills in tackling interpretation questions and essay writing by providing clear guidance and practice activities - Boosts students' interpretative skills and interest in history through extended reading opportunities consisting of specially commissioned essays from practising historians on relevant debates - Cements understanding of the broad issues underpinning the period with overviews of the key questions, end-of-chapter summaries and diagrams that double up as handy revision aids

Democracy, Empire and War: Britain 1851-1964 This title explores political and social reform 1851-1914, the impact of both World Wars, the creation of the Welfare State and the transformational social changes of the 1950s and 1960s. It considers breadth issues of change,

continuity, cause and consequence in this period through examining key questions on themes such as democracy, ideology, economy, society, Britain's position in the world and the impact of key individuals.

Schooling for Sustainable Development in South America Information Age Pub Incorporated

The Early Grade Reading Assessment (EGRA) measures students' progress towards reading. EGRA gauges early literacy skills through a 15-minute individual oral assessment of five fundamental reading skills. RTI worked with education experts to develop the EGRA in 2006, and it has been piloted and implemented in more than 40 countries. This volume aims to take stock of the substantial amount of information and experience generated through the use of EGRA, and to share this knowledge with practitioners, policymakers, and international donors. Chapters cover not only particular applications of the instrument but also put EGRA in the context of broader issues and developments in literacy and education.

Rethinking African History CODESRIA

The Anthropocene has become a field of studies in which the influence of human activity on the Earth System and nature is both the main threat and the potential solution. Social Representations Theory has been evolving since the 1960s. It links knowledge and practice in everyday life and is an effective way to deal with systemic crises based on common sense. This book assembles key contributions by Latin American scholars working with social representations in the social sciences that are of conceptual relevance to the study of the Anthropocene and that investigate the societal consequences of complex interrelations between common sense and topics of global relevance, such as the contradictions of sustainable development, the construction of risks beyond risk-perception, health, negotiation and governance in the field of education, gender equality, the usefulness of longitudinal and systemic ethnography and case studies, and agency and the link between inequality, crises and risk society in the context of COVID-19, presenting theoretical and methodological innovations from Spanish, Portuguese and French research that have rarely been available in English. • This is the first book to address the relevance of Social Representations Theory for the Anthropocene as a societal era • It presents the multidisciplinary scope of Social Representations • This book

covers emerging research contributions in Social Representations Theory from Latin America • This book presents innovative research and commentaries by established researchers in the field • This multidisciplinary book should be in the libraries of many disciplines in the social sciences and humanities
School-based food and nutrition education Pearson College Division

In *Taking the Path of Zen*, Robert Aitken provided a concise guide to zazen (Zen meditation) and other aspects of the practice of Zen. In *The Mind of Clover* he addresses the world beyond the zazen cushions, illuminating issues of appropriate personal and social action through an exploration of the philosophical complexities of Zen ethics. Aitken's approach is clear and sure as he shows how our minds can be as nurturing as clover, which enriches the soil and benefits the environment as it grows. The opening chapters discuss the Ten Grave Precepts of Zen, which, Aitken points out, are "not commandments etched in stone but expressions of inspiration written in something more fluid than water." Aitken approaches these precepts, the core of Zen ethics, from several perspectives, offering many layers of interpretation. Like ripples in a pond, the circles of his interpretation increasingly widen, and he expands his focus to confront corporate theft and oppression, the role of women in Zen and society, abortion, nuclear war, pollution of the environment, and other concerns. *The Mind of Clover* champions the cause of personal responsibility in modern society, encouraging nonviolent activism based on clear convictions. It is a guide that engages, that invites us to realize our own potential for confident and responsible action.
Textbook Africa in World History From Prehistory to the Present An anthology designed for the enjoyment and instruction of students from junior-secondary school onwards. The poems focus on aspects central to African life and culture: love, identity, death, village life, separation, power and freedom. Guidance for teachers is included.

THIS BOOK WILL SOON BE AVAILABLE AS OPEN ACCESS BOOK

This book is a valuable resource for policymakers and practitioners as it brings insights mainly from developing countries where relatively less research activity takes place. It is also a valuable resource for courses in mathematics education in the teacher education colleges, and departments of education in the sub-Saharan Africa region. In the increasingly global and technological world mathematics is seen as a significant gatekeeper of opportunities for social and economic advancement and mobility. Hence, countries and development agencies in the broader sub-Saharan Africa region are looking towards increasing access to relevant and high-quality secondary education as a lever towards economic development. Policy makers and other key decision makers in education look towards improvement in mathematics teaching and learning as a key focus in education reform. In the East Africa region also a number of initiatives have been taken at the national level in the respective countries to improve the quality of mathematics education. This book provides an in-depth comparative analysis of the developments and issues in mathematics education in Kenya, Tanzania, Rwanda and Uganda, and advances our understanding of the state of secondary mathematics education in East Africa.

Toward Sustainable Provision of Teaching and Learning Materials in Sub-Saharan Africa Anthem Press

School-based food and nutrition education (SFNE) helps schoolchildren and the school community to achieve lasting improvements in their food practices and outlooks; build the capacity to change and to adapt to external change; and pass on their learning to others. SFNE has also an important role in complementing efforts that are being made globally to improve food environments, and in empowering children and adolescents to become active participants in shaping the food system to be better able to deliver healthy and sustainable diets. Despite increasing interest for SFNE, the evidence that supports it and its potential, much of traditional SFNE, particularly in LMICs, is largely underfunded, not delivering results, and disconnected from other key interventions that aim to support the food, nutrition, environment, and education nexus. SFNE is under-resourced, with capacity development opportunities lacking throughout the school system. This White Paper is the first document of its kind, and it is based on the evidence, professional expertise, and field experience, lessons learned, and documented

challenges of SFNE work in a variety of contexts. It presents the case for raising the profile and transforming the vision and learning model of SFNE. This document is directed firstly to a technical audience working in governmental organizations that deal with schoolchildren and adolescents and is also of interest to researchers, technical advisors, decision-makers, donors and investors, civil society, and UN organizations.

Prisoner Rehabilitation in the Uganda Prison Service Sense Pub

This classic, bestselling study of the !Kung San, foragers of the Dobe area of the Kalahari Desert describes a people's reactions to the forces of modernization, detailing relatively recent changes to !Kung rituals, beliefs, social structure, marriage and kinship system. It documents their determination to take hold of their own destiny, despite exploitation of their habitat and relentless development to assert their political rights and revitalize their communities. Use of the name Ju/'hoansi (meaning real people) acknowledges their new sense of empowerment. Since the publication of the Third Edition in 2003, Richard Lee has made eight further trips to the Kalahari, the most recent in 2010 and 2011. The Dobe and Nyae Nyae Areas have continued to transform and the people have had to respond and adapt to the pressures of capitalist economics and bureaucratic governance of the Namibian and Botswana states. This Fourth Edition chronicles and bears witness to these evolving social conditions and their impacts on lives of the Ju/'hoansi. The Role and Impact of Public-private Partnerships in Education World Bank Publications

What role does history play in contemporary society? Has the frenetic pace of today's world led people to lose contact with the past? A high-profile team of researchers from across Canada sought to answer these questions by launching an ambitious investigation into how Canadians engage with history in their everyday lives. The results of their survey form the basis of this eye-opening book. *Canadians and Their Pasts* reports on the findings of interviews with 3,419 Canadians from a variety of cultural and linguistic communities. Along with yielding rich qualitative data, the surveys generated revealing quantitative data that allows for comparisons based on gender, ethnicity,

migration histories, region, age, income, and educational background. The book also brings Canada into international conversation with similar studies undertaken earlier in the United States, Australia, and Europe. *Canadians and Their Pasts* confirms that, for most Canadians, the past is not dead. Rather, it reveals that our histories continue to shape the present in many powerful ways.

Grammar and Text Cambridge Scholars Publishing

"Nowhere in archaeology is the gap between theory and practice more evident than in its ambivalent engagement with economic development. This groundbreaking volume assembles practicing archaeologists, economists, and NGO officials in an extensive exploration of the theoretical, practical and ethical issues raised by archaeologists' use of cultural heritage to support economic development. The first chapters consider the problem of articulating the value of tangible and intangible heritage when economic measures alone are inadequate. Subsequent chapters present regional perspectives on archaeology and development, and present a host of case studies from around the globe that describe archaeologists' development projects, including some that are successful and others that are less so. These studies both suggest best practices in the implementation of development projects and illuminate the obstacles to success created by political conflict and competing human needs. Ethical issues and practical considerations converge in chapters that explore the

role that members of local communities should play in the design, management and governance of archaeological and heritage resources. In this volume, archaeologists and heritage professionals will encounter a thought-provoking international discourse concerning the path forward for archaeology as the field engages with economic development."

A white paper on the current state, principles, challenges and recommendations for low- and middle-income countries RTI Press

A volume in International Review of History Education Series Editor Peter Lee, Rosalyn Ashby, Stuart Foster As educators in the United States and Europe develop national history standards for K-12 students, the question of what to do with national history canons is a subject of growing concern. Should national canons still be the foundation for the teaching of history? Do national canons develop citizenship or should they be modified to accommodate the new realities of globalization? Or should they even be discarded outright? These questions become blurred by the debates over preserving national heritages, by so-called 'history wars' or 'culture wars,' and by debates over which pedagogical frameworks to use. These canon and pedagogical debates often overlap, creating even more confusion. A misconceived "skills vs. content" debate often results. Teaching students to think chronologically and historically is not the same

as teaching a national heritage or a cosmopolitan outlook. But what exactly is the difference? Policy-makers and opinion leaders often confuse the pedagogical desirability of using a 'framework' for studying history with their own efforts to reaffirm the centrality of national identity rooted in a vision of their nation's history as a way of inculcating citizenship and patriotism. These are the issues discussed in this volume." Today's students are citizens of the world and must be taught to think in global, supranational terms. At the same time, the traditionalists have a point when they argue that the ideal of the nation-state is the cultural glue that has traditionally held society together, and that social cohesion depends on creating and inculcating a common national culture in the schools. From an educational perspective, the problem is how to teach chronological thinking at all. How are we to reconcile the social, political and intellectual realities of a globalizing world with the continuing need for individuals to function locally as citizens of a nation-state, who share a common past, a common culture, and a common political destiny? Is it a duty of history education to create a frame of reference, and if so, what kind of frame of reference should this be? How does frame-of-reference knowledge relate to canonical knowledge and the body of knowledge of history as a whole?
