BLACK HISTORY EXTRAVAGANZA honoring Dr. Ben-Jochannan is a labor of love for someone intimately associated with the master teacher for some 40 years as student, traveling companion, mentee and friend. In repayment, this effort to help acknowledge and sustain his name, life's work and historical and philosophic outlook is necessary so the younger generation know of the enormous intellectual light this extraordinary scholar represented in those extremely challenging social and intellectual times of the last half century. As the systematic onslaught against the African (Black) personality continued, one particular scholar, lecturer, historian, publisher, archaeologist and tour guide to Egypt stood unmoved and unrelenting in defense of an entire people's history, culture and spiritual well-being. In this, Dr. Ben took on all disparaging comers as he educated and nurtured intellectual "cubs" becoming equipped to challenge historical distortion and omission manifested from the false mantle of global white supremacy. To accomplish the enormous task, Dr. Ben wrote, innovated self-publishing, lectured, and took students to museums and to Egypt pointing out contradictions between the Existential Data and the symbolic Representation of ancient Egypt. Table of Contents, viz., Introduction; The Awesome Egyptian Temple; Who were the Ancient Egyptians;? The Archaeology of Egypt; The Art of Ancient Egypt; Architecture of Ancient Egypt; The Religion of Ancient Egypt; and the History of Egypt, Dr. Ben made a substantial impact while educating students as to the utility and benefits of studying the illustrious African past, emphasizing they accentuate the positive and reject negative aspects of that memorable experience. Like the

many intellectual lights, "warrior scholars," of his age, viz., Dr. John Henrik Clarke, Ivan Van Sertima, Leonard James, Carter G. Woodson, Benjamin Carruthers, J.A. Rogers, Jitu Weusi, Leonard Jeffries, among others, Dr. Ben subscribed to one unmistakable academic admonition pursuing excellence, "Publish or Perish." This continuum of praise (Celebrating Dr. Yosef Ben-Jochannan), *Black History Extravaganza* seeks a starting point for readers, young and old to delve deep and drink from the remarkable fountain represented in fields of study which engaged the great scholar for more than half-a-century.

When Simon Tam started an Asian American dance rock band called The Slants, he didn't realize that he was starting an entire movement around freedom of expression and discussions on identity. The band flipped stereotypes with their bombastic live shows and community activism. But when Simon applied to register a trademark on the band's name, the government dragged him all the way to the Supreme Court of the United States. *Slanted* is the story of an indomitable spirit who so believes in the idea of justice that he's willing to risk everything along the way for the dignity of self-identity. Simon shares a deeply personal account that will take you from anime conventions to the Supreme Court, all in the name of justice. The story provides a raw look at our legal system with unflinching honesty and offers timely insights on freedom of speech, how to connect with others we disagree with, and the power of music. Gripping, funny, enlightening, and ultimately uplifting, *Slanted* proves that no obstacle is too difficult to conquer --as long as you have a little heart and a lot of rock n' roll. It's an irrepressible story that is fresh, alive, and defines what it means to be American.

Are morals always relative? Are private actions--among consenting adults--always beyond the law? Or are there some behaviors which so weaken a society that common beliefs about right and wrong must be enforced to protect the common good? In opposing the decriminalization of private acts of homosexuality in Britain, Patrick Devlin maintained that not only is it reasonable to allow popular morality to influence lawmaking, it is imperative: ". . . For a society is not something that is kept together physically; it is held by the invisible bonds of common thought." Some sidestep this controversial issue by asserting that the law should not be used to enforce any morality. Others invoke John Stuart Mill's doctrine that the only purpose for laws governing any member of society is to prevent harm to others, chiefly physical harm. But, Devlin argued, while breaches of shared morality do not cause harm to other individuals in the way that murder and assault do, they do harm society by undermining its moral structure. Patrick Devlin (1905-1992) studied history and law at Cambridge University and became a successful lawyer.

The debut novel from critically-acclaimed and New York Times–bestselling author of *On Such a Full Sea* and *My Year Abroad*. In *Native Speaker*, author Chang-rae Lee introduces readers to Henry Park. Park has spent his entire life trying to become a true American—a native speaker. But even as the essence of his adopted country continues to elude him, his Korean heritage seems to drift further and further away. Park's harsh Korean upbringing has taught him to hide his emotions, to remember everything he learns, and most of all to feel an overwhelming sense of alienation. In other words, it has shaped him as a natural spy. But the very attributes that help him to excel in his profession put a strain on his marriage to his American wife and stand in the way of his coming to terms with his young son's death. When he is assigned to spy on a rising Korean-American politician, his very identity is tested, and he must figure out who he is amid not only the conflicts within himself but also within the ethnic and political tensions of the New York City streets. *Native Speaker* is a story of cultural alienation. It is about fathers and sons, about the desire to connect with the world rather than stand apart from it, about loyalty and betrayal, about the alien in all of us and who we finally are.

Born out of mid-century social movements, Asian American studies is now an established field of transnational inquiry, diasporic engagement, and rights activism. These histories serve as initial moorings for *Flashpoints for Asian American Studies*, a collection which considers the contemporary possibilities of and limitations inherent in Asian American studies as historically entrenched, politically embedded, and institutionally situated interdisciplinary.

Because of their enormous size, elephants have long been irresistible for kings as symbols of their eminence. In early civilizations—such as Egypt, Mesopotamia, the Indus Civilization, and China—kings used elephants for royal sacrifice, spectacular hunts, public display of live captives, or the conspicuous consumption of ivory—all of them tending toward the elephant's extinction. The kings of India, however, as Thomas R. Trautmann shows in this study, found a use for elephants that actually helped preserve their habitat and numbers in the wild: war. Trautmann traces the history of the war elephant in India and the spread of the institution to the west—where elephants took part in some of the greatest wars of antiquity—and Southeast Asia (but not China, significantly), a history that spans 3,000 years and a considerable part of the globe, from Spain to Java. He shows that because elephants eat such massive quantities of food, it was uneconomic to raise them from birth. Rather, in a unique form of domestication, Indian

kings captured wild adults and trained them, one by one, through millennia. Kings were thus compelled to protect wild elephants from hunters and elephant forests from being cut down. By taking a wide-angle view of human-elephant relations, Trautmann throws into relief the structure of India's environmental history and the reasons for the persistence of wild elephants in its forests.

Few places are as politically precarious as Bangladesh, even fewer as crowded. Its 57,000 or so square miles are some of the world's most inhabited. Often described as a definitive case of the bankruptcy of postcolonial governance, it is also one of the poorest among the most densely populated nations. In spite of an overriding anxiety of exhaustion, there are a few important caveats to the familiar feelings of despair—a growing economy, and an uneven, yet robust, nationalist sentiment—which, together, generate revealing paradoxes. In this book, Nusrat Sabina Chowdhury offers insight into what she calls "the paradoxes of the popular," or the constitutive contradictions of popular politics. The focus here is on mass protests, long considered the primary medium of meaningful change in this part of the world. Chowdhury writes provocatively about political life in Bangladesh in a rich ethnography that studies some of the most consequential protests of the last decade, spanning both rural and urban Bangladesh. By making the crowd its starting point and analytical locus, this book tacks between multiple sites of public political gatherings and pays attention to the ephemeral and often accidental configurations of the crowd. Ultimately, Chowdhury makes an original case for the crowd as a defining feature and a foundational force of democratic practices in South Asia and beyond.

"Chink!," "Jap!," "Where are you from?," "Do you eat dog?," "Why don't you go back to where you came from!," "Do you know Kung-Fu?." From the racist to the innocuous, issues of culture, ethnicity, and discrimination are prevalent themes for Asian minorities in the United States. The Asian desire to be "American" and fit into mainstream society in the U.S. can be challenging as reminders that they are "perpetual foreigners" can be seen in jokes, teasing, and at times outright racism. In addition, many Asians struggle with internal pressure to confine to cultural or family values that may be at odds with their own individual desires. In this poetry collection, Sam Louie touch on themes of feeling ostracized, different, or "not good enough" by drawing on both personal and clinical experiences. In addition, issues related to addiction, mental health, and Christianity are also explored. Sam Louie is a psychotherapist with a private practice specializing in multicultural issues and addictions. He holds a Master's degree in Clinical Psychology and is also an Emmy-Award Winning former television journalist who has produced and reported on stories related to culture, psychology, and mental health.

I have asked permission to dedicate this book to you not only in memory of the happy evenings I have spent with you in Saigon over the last five years, but also because I have quite shamelessly borrowed the location of your flat to house one of my characters, and your name, Phuong, for the convenience of readers because it is simple, beautiful and easy to pronounce, which is not true of all your country- women's names. You will both realise I have borrowed little else, certainly not the characters of anyone in Viet Nam. Pyle, Granger, Fowler, Vigot, Joe— these have had no originals in the life of Saigon or Hanoi, and General The is dead : shot in the back, so thfcy say. Even the historical events have been rearranged. For example, the big bomb near the Continental preceded and did not follow the bicycle bombs. I have no scruples about such small changes. This is a story and not a piece of history, and I hope that as a story about a few imaginary characters it will pass for both of you one hot Saigon evening.

Beyond black and white, native and alien, lies a vast and fertile field of human experience. It is here that Eric Liu, former speechwriter for President Clinton and noted political commentator, invites us to explore. In these compellingly candid essays, Liu reflects on his life as a second-generation Chinese American and reveals the shifting frames of ethnic identity. Finding himself unable to read a Chinese memorial book about his father's life, he looks critically at the cost of his own assimilation. But he casts an equally questioning eye on the effort to sustain vast racial categories like "Asian American." And as he surveys the rising anxiety about China's influence, Liu illuminates the space that Asians have always occupied in the American imagination. Reminiscent of the work of James Baldwin and its unwavering honesty, *The Accidental Asian* introduces a powerful and elegant voice into the discussion of what it means to be an American.

Unlocking the Power of Possibility READ BOOKS

What does it mean to be an engaged American in today's divided political landscape, and how do we restore hope in our country? In a collection of "civic sermons" delivered at gatherings around the nation, popular advocate for active citizenship Eric Liu takes on these thorny questions and provides inspiration and solace in a time of anger, fear, and dismay over the state of the Union. Here are 19 stirring explorations of current and timeless topics about democracy, liberty, equal justice, and powerful citizenship. This book will energize you to get involved, in ways both large and small, to help rebuild a country that you're proud to call home. *Become America* will challenge you to rehumanize our politics and rekindle a spirit of love in civic life.

The world is simpler than it seems. Everything that happens occurs because of cause and effect. Eliminate the cause of relationship problems, poverty, health issues, and disharmony-and you change the effect. Too often, though, we look for external causes, when the true cause lies within our own all-powerful and divine subconscious minds. The universe is made up of interconnected energy-and what are our thoughts if not pure energy? Change the workings of your inner mind, and you can quite literally change your life. In *Sixth Sense*, noted holistic success coach Eugene N. Nwosu provides a set of deceptively simple tools designed to help you "rewire" your subconscious mind, change your life, and acquire the enlightenment and wisdom vital for true balance, equilibrium, and success. Nwosu's practical affirmations help harness the mind's ability to operate in harmony with the

unchanging rules of the infinite, divine universe. Simpler and easier to incorporate into everyday life than The Secret and its complexities, Sixth Sense frees you from the limitations of entrenched thought patterns, creating instead full engagement in your passions and dreams. Once properly aligned with the universe, you will succeed-all the time.

"From the most unlikely of unlikely romances comes a deeply felt, touching, humorous exploration of what love and age mean in today's world. I can't recommend this book highly enough." -- Stan Evans, Emmy-award winning writer, and author of Box of Mustaches When thirty-two-year-old actor Gregor Collins reluctantly interviewed for a job as a caregiver more out of a favor to a friend - he had no idea his life was about to change forever. Seconds into the chance meeting in 2008 with, it would turn out, a world-renowned Holocaust refugee named Maria Altmann, there was an unexplainable magic in the air - it felt as if they had already met. And Collins was suddenly thrown into a situation with which he had never before been confronted: caring for someone other than himself. Gregor offers us a personal and unprecedented look at Maria over the three intimate years he cared for her - her thrilling escape from the Nazis, her fight and subsequent win in the landmark Supreme Court Case to return original Gustav Klimt artwork that belonged to her family in Austria, and the extraordinary people she met along the way. But the real heart of the story transcends mere historical facts. Through a refreshingly raw portrayal of their unlikely and unbreakable bond, imbued with humorous, candid anecdotes about his mercurial relationship with Hollywood, Gregor takes us on a deeply emotional journey of how he opened up his heart to a 92-year-old woman in need - and in turn experienced the love he had been searching for his entire life.
