In 2004, Android was two people who
wanted to build camera software. But they
couldn't get investors interested. Today,
Android is a large team at Google,
shipping an operating system (including*

camera software) to over three billion devices worldwide. This is the inside story, told by the people who made it happen. "What are the essential ingredients that lead a small team to build software at the sheer scale and impact of Android? We may never fully know, but this first person account is probably the closest set of clues we have." –Dave Burke, VP of Android Engineering "Androids captures a strong picture of what the early development of Android, as well as the Android team, was like." –Dianne Hackborn, Android Framework Engineer "Androids is the engaging tale of a motley group of coders with a passion to make insanely great products who banged out the operating system when that idea seemed nuts. True to his geek genes, Chet Haase tells this remarkable tale of technical and business success from the trenches, an inspiring, massive collective effort of dozens of programmers who flipped their seemingly late timing to their advantage, and presaged a generation of platform builders. Read Androids to discover what it takes to create a hot tech team that shipped a product running today on more than 3 billion devices." –Jonathan Littman,

co-author of The Entrepreneurs Faces: How Makers, Visionaries and Outsiders Succeed, and author of The Fugitive Game All profits from the book will be donated to charity.

The Order Random House

Travel to space and back with astronaut Chris Hadfield's "enthraling" bestseller as your eye-opening guide (Slate). Colonel Chris Hadfield has spent decades training as an astronaut and has logged nearly 4000 hours in space. During this time he has broken into a Space Station with a Swiss army knife, disposed of a live snake while piloting a plane, and been temporarily blinded while clinging to the exterior of an orbiting spacecraft. The secret to Col. Hadfield's success-and survival-is an unconventional philosophy he learned at NASA: prepare for the worst-and enjoy every moment of it. In *An Astronaut's Guide to Life on Earth*, Col. Hadfield takes readers deep into his years of training and space exploration to show how to make the impossible possible. Through eye-opening, entertaining stories filled with the adrenaline of launch, the mesmerizing wonder of spacewalks, and the measured, calm responses mandated by crises, he explains how conventional wisdom can get in the way of achievement — and happiness. His own extraordinary education in space has taught him some counterintuitive lessons: don't visualize success, do care what others think, and

always sweat the small stuff. You might never be able to build a robot, pilot a spacecraft, make a music video or perform basic surgery in zero gravity like Col. Hadfield. But his vivid and refreshing insights will teach you how to think like an astronaut, and will change, completely, the way you view life on Earth — especially your own. "Hadfield proves himself to be not only a fierce explorer of the universe, but also a deeply thoughtful explorer of the human condition." —Maria Popova, *Brain Pickings*

Young Men and Fire Biblioasis

The Shop Manual covers real-world symptoms, diagnostics, and repair information. Known for its comprehensive coverage, accurate and up-to-date technical information, and hundreds of detailed illustrations and vibrant photographs, the text is an ideal resource to prepare for success as an automotive technician or pursue ASE certification.

An Astronaut's Guide to Life on Earth Springer

Vocal health tips, stories from the tour bus, and action items to improve your voice and boost your self-confidence from an award-winning musician and life coach

Performing with David Bowie, surviving the murky depths of the music business, enduring a painful divorce, and making the first music video in outer space, award-winning recording artist Emm Gryner has navigated through life's highs and lows using a secret compass: singing. Her voice, and her desire to express herself in music, has been a constant: from the early days of playing in bands while growing up in a small town, to playing arena rock shows and stadiums. Across these years and on many travels, she's discovered the human voice to be an unlikely guide, with the power to elevate and move people closer to authentic living. This book is about that discovery: part study in the art of singing, part guide to finding one's voice, and part memoir. This book is a must-have for anyone who knows they should be singing.

In *You Are Here*, celebrated astronaut Chris Hadfield gives us the really big picture: this is our home, as seen from space. The millions of us who followed Hadfield's news-making Twitter feed from

the International Space Station thought we knew what we were looking at when we first saw his photos. But we may have caught the beauty and missed the full meaning. Now, through photographs – many of which have never been shared – Hadfield unveils a fresh and insightful look at our planet. He sees astonishing detail and importance in these images, not just because he's spent months in space but because his in-depth knowledge of geology, geography and meteorology allows him to reveal the photos' mysteries. Featuring Hadfield's favourite images, *You Are Here* is divided by continent and represents one (idealized) orbit of the ISS. Surprising, thought-provoking and visually delightful, it opens a singular window on our planet, using remarkable photographs to illuminate the history and consequences of human settlement, the magnificence of never-before-noticed landscapes, and the power of the natural forces shaping our world and the future of our species.

Today's Technician: Basic Automotive Service and Systems, Classroom Manual and Shop Manual Cengage Learning

An exceptional debut thriller and “exciting journey” into the dark heart of the Cold War and the space race from New York Times bestselling author and astronaut Chris Hadfield (Andy Weir, author of *The Martian* and *Project Hail Mary*). 1973: a final, top-secret mission to the Moon. Three astronauts in a tiny spaceship, a quarter million miles from home. A quarter million miles from help. NASA is about to launch Apollo 18. While the mission has been billed as a scientific one, flight controller Kazimieras "Kaz" Zemeckis knows there is a darker objective. Intelligence has discovered a secret Soviet

space station spying on America, and Apollo 18 may be the only chance to stop it. But even as Kaz races to keep the NASA crew one step ahead of their Russian rivals, a deadly accident reveals that not everyone involved is quite who they were thought to be. With political stakes stretched to the breaking point, the White House and the Kremlin can only watch as their astronauts collide on the lunar surface, far beyond the reach of law or rescue. Full of the fascinating technical detail that fans of *The Martian* loved, and reminiscent of the thrilling claustrophobia, twists, and tension of *The Hunt for Red October*, *The Apollo Murders* is a high-stakes thriller unlike any other. Chris Hadfield captures the fierce G-forces of launch, the frozen loneliness of space, and the fear of holding on to the outside of a spacecraft orbiting the Earth at 17,000 miles per hour as only someone who has experienced all of these things in real life can. Strap in and count down for the ride of a lifetime. "Packed with cosmic action... Featuring undercover spies, scheming Russians and psychopathic murderers, sometimes all at once, it teems with authoritative details." —The New York

Times "Nail-biting . . . I couldn't put it down." —James Cameron, writer and director of *Avatar* and *Titanic* "Not to be missed." —Frederick Forsyth, author of *The Day of the Jackal* "An explosive thriller by a writer who has actually been to space . . . Strap in for the ride!" —Gregg Hurwitz, author of *Orphan X*

An Astronaut Photographs the World
Bantam

"Meet Colonel Chris Hadfield, the first Canadian to walk in space - and make a music video while in orbit! When Chris Hadfield was a boy, growing up on a farm in Milton, Ontario, Canada didn't have a space program. But from the moment he saw a man first walk on the moon, young Chris decided he would somehow get to space. And with everything Chris did, from learning to fix farm machinery and joining the Air Cadets to flying fighter planes and becoming a test pilot, he prepared himself to get there. Chris Hadfield has rocketed into space three times, been on two space walks and was the first Canadian to command the International Space Station. And nobody plays a guitar in space or rocks a mustache better! This new picture

book biography series features simple text and full-colour, comic-flavoured illustration with speech balloons that help bring the story alive. Historical photos and timeline support the narrative."--

Today's Technician: Automotive Engine Repair & Rebuilding, Classroom Manual and Shop Manual, Spiral bound Version Classroom Manual for Basic Automotive Service & Systems Resource added for the Automotive Technology program 106023. *Today's Technician: Basic Automotive Service and Systems, Classroom Manual and Shop Manual* Looks at the operations of the International Space Station from the perspective of the Houston flight control team, under the leadership of NASA's flight directors, who authored the book. The book provides insight into the vast amount of time and energy that these teams devote to the development, planning and integration of a mission before it is executed. The passion and attention to detail of the flight control team members, who are always ready to step up when things do not go well, is a hallmark of NASA human spaceflight operations. With tremendous support from

the ISS program office and engineering community, the flight control team has made the International Space Station and the programs before it a success.
