In the current technological world, Web services play an integral role in service computing and social networking services. This is also the case in the traditional FREG (foods, resources, energy, and goods) services because almost all traditional services are replaced fully or partially by Web services.

Handbook of Research on Demand-Driven Web Services: Theory, Technologies, and Applications presents comprehensive and in-depth studies that reveal the cutting-edge theories, technologies, methodologies, and applications of demand-driven Web, mobile, and e-business services. This book provides critical perspectives for researchers and practitioners, lecturers and undergraduate/graduate students, and professionals in the fields

of computing, business, service, management, and government, as well as a variety of readers from all the social strata. Banking Theory and Practice, 21th Edition John Wiley & Sons
E-Banking and Emerging Multidisciplinary Processes: Social, Economical and Organizational Models advances the knowledge and practice of all facets of electronic banking. This cutting edge publication emphasizes emerging e-banking theories, technologies, strategies, and challenges to stimulate and disseminate information to research, business, and banking communities. It develops a comprehensive framework for e-banking through a multidisciplinary approach, while taking into account the implications it has on traditional banks, businesses, and economies. Routledge
Electronic banking (E-banking) is a generic term encompassing internet banking, telephone banking, mobile banking etc. Several initiatives

taken by the Government of India as well as the Reserve Bank of India (RBI) have facilitated the development of E-banking in India. The Government of India enacted the IT Act, 2000 with effect from October 17, 2000, which provides legal recognition to electronic transactions and other means of electronic commerce. The existing regulatory framework over banks has also been extended to E-banking. It covers various issues that fall within the framework of technology, security standards and legal and regulatory issues. This book contains 12 articles by scholars specialising in the area of banking.

The 2014 International Conference on Economics and Management Engineering (ICEME2014) is held in Hangzhou, China from October 18-19, 2014. The conference aims to provide an excellent international academic forum for all the researchers, practitioner,

students and teachers in related fields to share their knowledge and results in theory, methodology and application on economics, management science and management engineering. ICEME2014 features unique mixed topics of Economics, Management Science, Management Engineering and other related ones. ICEME2014 proceeding tends to collect the most up-to-date, comprehensive, and worldwide state-of-art knowledge on economics, management science and management engineering. All the accepted papers have been submitted to strict peer-review by 2-4 expert referees, and selected based on originality, significance and clarity for the purpose of the conference. The conference program is extremely rich, profound and featuring high-impact presentations of selected papers and additional late-breaking contributions. We sincerely hope that the conference would not only show the participants a broad overview of the latest research results on related fields, but also provide them with a significant platform for academic connection and exchange.

This book contributes to the present state of knowledge, offering the reader broad evidence on how new digital technologies impact financial systems. It focuses on both macro- and micro-perspectives of ICT influence on financial markets. The book demonstrates how ICT can impact trading systems or information systems, which are crucial for financial systems to work effectively. It also shows how individuals can benefit from the adoption of digital technologies for everyday financial (e.g., banking) systems usage. The book provides empirical evidence of how digital technologies revolutionize the banking sector and stock exchange trading system and explores the associations between technology and various aspects of firms' functioning. Furthermore, it raises elements of financial inclusion, ICT-based microfinance service and finance-related gender issues. The principal audience of the book will be scholars and academic professionals from a wide variety of disciplines, particularly in the fields of finance and

economics. It will be especially useful for those who are addressing the issues of new technologies and the financial markets, FinTech, financial innovations, stock markets, and the role of technological progress in a broadly defined socio-economic system. It will be a valuable source of knowledge for graduate and postgraduate students in economic and social development, information and technology, worldwide studies, social policy or comparative economics.

The rapid changes in the economic and political climate of the Balkan and the Black Sea countries demand continuous adjustments in the mixture of the implemented economic policy in the area. Under this framework, there is a special interest to investigate the impact of the global economic reality in these economies, the importance of their integration in the European Union, as well as the foundation of various regional organizations that host many countries of the specific area. Taking into consideration the current developments within the European Union, the economic crisis that strikes the peripheral EU countries and the dispute over the credibility of the euro currency, economists need to enhance the

effectiveness of regional development, to underline the value of FDI and entrepreneurship of the countries of the Balkan and the Black Sea, to assist the bank sector in order to support the level of productivity, to control the financial flows with the help of auditing structures and to exploit human resources in order to achieve economical reforms in these countries. The current volume approaches, among others, the above matters and aspires to contribute to the further investigation of the possibilities and the perspectives of the economies of the region.
